

# 2<sup>nd</sup> International Conference and Exhibition on **Mechanical & Aerospace Engineering**

Philadelphia, USA September 08-10, 2014

OMICS Group invites all the participants across the globe to attend the 2<sup>nd</sup> International Conference and Exhibition on Mechanical & Aerospace Engineering during September 8-10, 2014 at Philadelphia, USA with the theme of "Surging into the future of Mechanical & Aerospace Engineering".

**Mech Aero-2014** is a remarkable event which brings together unique and international academic scientists, leading engineers, universities and industries making the congress a perfect platform to share experience, foster collaborations across industry and academia and evaluate emerging technologies across the globe. Initiation of cross-border co-operations between scientists and institutions will be also facilitated. It unites applications from various scientific disciplines, pushing the frontiers of Mechanical, Aerospace, Aerodynamics and Aeronautics. It represents the huge area where the focus lies on developing product-related technologies with rapid advancement in research in recent years. It is true that fundamental work on materials has turned up with unexpected momentous discoveries, but more frequently, the importance and significance can be gauged by the fact that it has made huge advancements over the course of time and is continuing to influence various sectors.
