An investigation of big life decisions – ERRATUM

Adrian R. Camilleri

Keywords: decision-making; autobiographical memory; life events; life story; prospection; erratum

DOI: <https://doi.org/10.1017/jdm.2023.30>, Published 5 September 2023

This article was published with errors in the labelling of three figures, for which the publisher apologises. The corrected figures and captions are below.

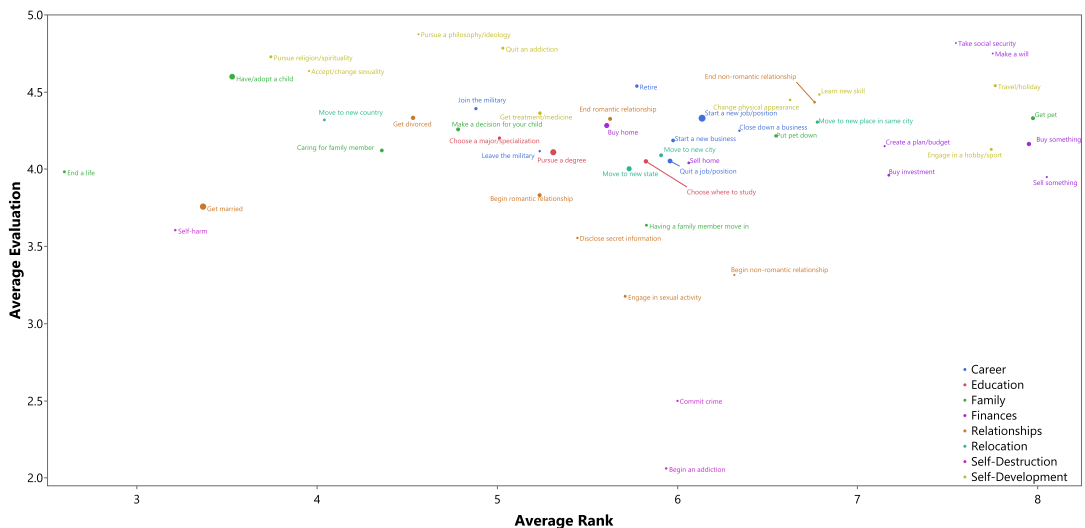

Figure 3. Scatterplot of average decision rank against average decision evaluation for each decision type in Study 3.

Note: The size of the point indicates the relative frequency of each decision type.

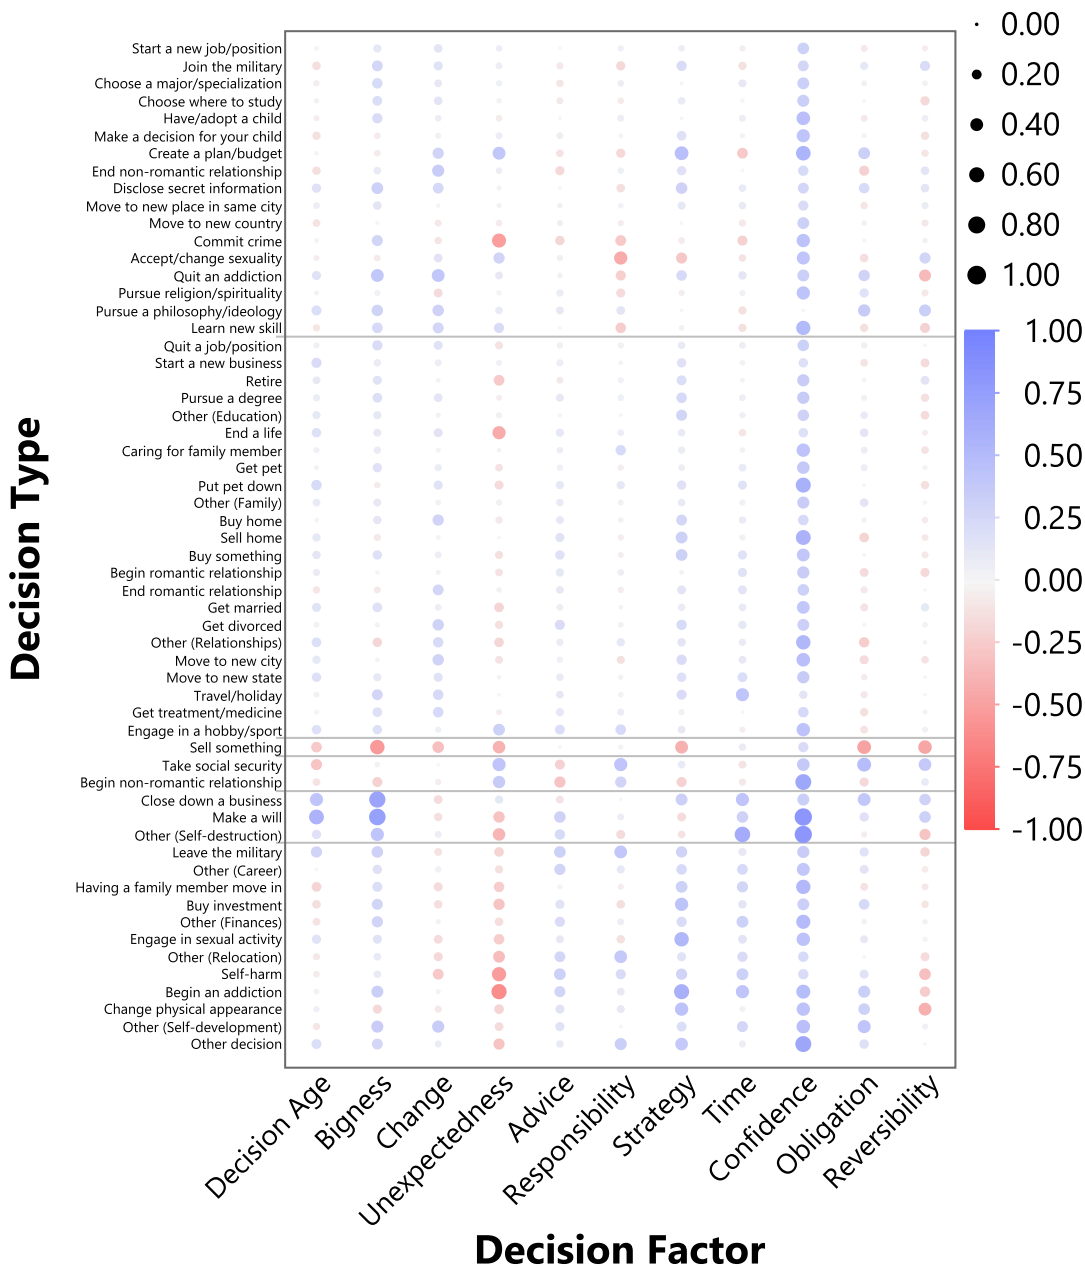

Figure 4. Correlations between decision factors and decision evaluation for each decision type and cluster in Study 3.

Note: Horizontal lines demarcate different clusters. Clusters are based on the correlation between the decision factor and decision evaluation for each decision type.

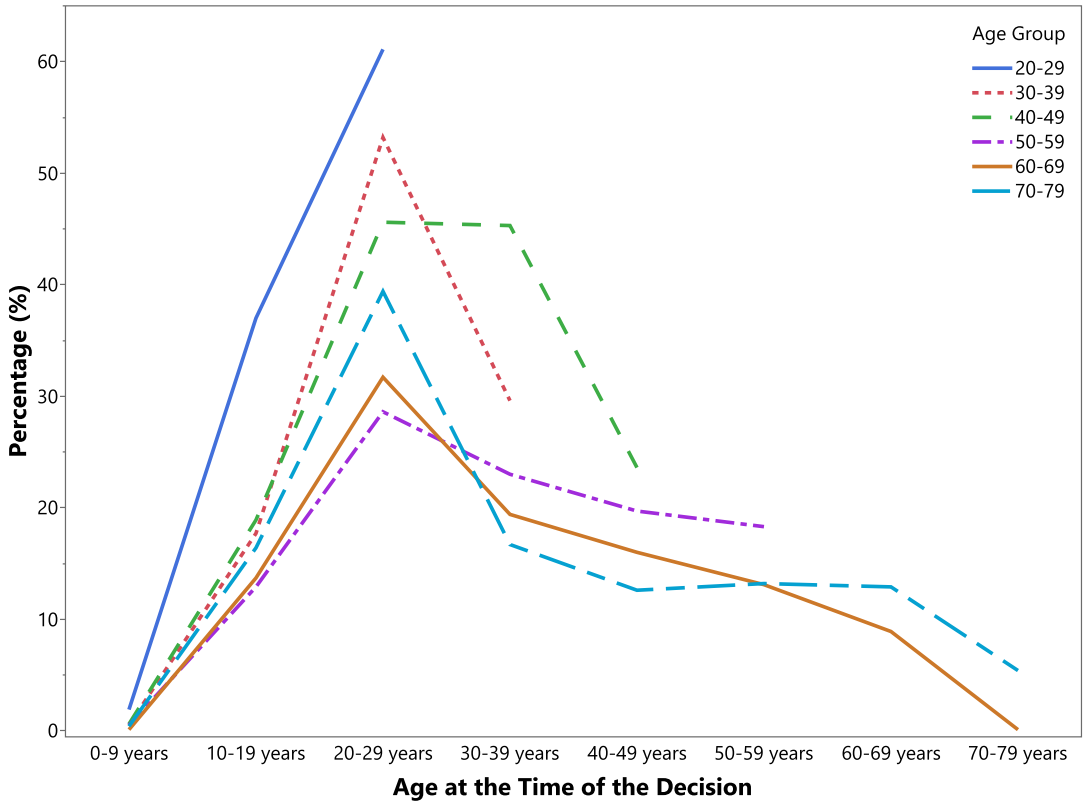

Figure 5. Percent of recalled past big decisions for each decision age period and age group in Study 3.
