Topic: 305 - Core Symposium: Treatment of Depression and Anxiety in Adult, Children and Adolescent Populations. An Update.

TREATMENT OF DEPRESSION IN CHILDREN AND ADOLESCENTS

A. Apter

Schneiders Childrens Medical Center, Tel Aviv University, Petah Tikva, Israel

The presentation will attempt to critically assess the various treatment modalities for child and adolescent depression including biological, psychological and social therapies. There will be an emphasis on personalizing treatment both as regards pharmaco-and psycho therapy. An attempt will be made to predict where the next advances will come from
