# JOURNAL OF BIOSOCIAL SCIENCE

Supplement No. 2

## BIOSOCIAL ASPECTS OF SEX

Proceedings of the sixth annual symposium of the Eugenics Society  
London, September 1969

### Genetic and environmental aspects

- |                |   |
|----------------|---|
| C. E. FORD     | Cytogenetics and sex determination in man and animals |
| W. A. MARSHALL | Sex differences at puberty                            |
| D. J. WEST     | Aspects of homosexuality                              |

### Sex ratios in different populations

- |                  |  |
|------------------|--|
| A. W. F. EDWARDS | The search for genetic variability of the sex ratio  |
| M. S. TEITELBAUM | Factors affecting the sex ratio in large populations |
| P. R. COX        | Sex differences in age at marriage                   |
| ROSEMARY FIRTH   | The social images of man and woman                   |

### Comparative occupational performances

- |                    |  |
|--------------------|--|
| R. R. DALE         | A comparison of the academic performance of male and female students in schools and universities |
| B. T. DAVIES       | The comparative employability of men and women in different industries                           |
| KATHLEEN M. KENYON | <b>The Galton Lecture 1969:</b> Women in academic life   |

### Sociological aspects

- |                    |   |
|--------------------|---|
| ROBERT CHESTER     | Sex differences in divorce behaviour                  |
| FRANCES HEIDENSOHN | Sex, crime and society                                |
| K. BERGMANN        | Sex differences in the neurotic reactions of the aged |
| D. M. POTTS        | Which is the weaker sex?                              |

Price £2.50; US \$7.00

# THE GALTON FOUNDATION

## For the promotion of biosocial science

The Galton Foundation was established as a charitable Trust in memory of Sir Francis Galton and in recognition of his outstanding contributions to biosocial science. Its interests lie in the common ground between the biological and social sciences.

### Trustees

Mrs Mary Adams  
Mrs Frances Dennis  
Professor Sir Alan Parkes (Chairman)

Dr G. Ainsworth Harrison  
The Lord Platt

### Journal of Biosocial Science

The Foundation owns and manages the *Journal of Biosocial Science* which, as detailed in the Notice to Contributors, caters for material within the biological aspects of the social sciences and the social aspects of human biology. *JBS* is published quarterly in January, April, July and October.

### Grants

The Foundation is not in a position to make large grants, but will consider applications for small amounts, especially in connection with the study of the circumstances attending unwanted conception. There is also a small fund available for facilitating overseas travel (usual maximum £50).

### Equipment Pool

The Foundation has a number of Harpenden anthropometers and skinfold calipers in its pool of instruments and other equipment appropriate to field or laboratory work of a biosocial nature. The Foundation's aim is to make equipment available, by loan or hire according to circumstances, where the requirement is short-term or funds inadequate. No single item will exceed £100 in value.

### *Inquiries to:*

London SW1V 1PJ**

# JOURNAL OF BIOSOCIAL SCIENCE

## Notice to Contributors

The *Journal of Biosocial Science* publishes original papers, reviews, lectures, proceedings and major book reviews dealing with social aspects of human biology, including reproduction and its control, gerontology, ecology, genetics and applied psychology; with biological aspects of the social sciences, including sociology, social anthropology, education and criminology; and with biosocial aspects of demography. Preference will be given to material which is clearly interdisciplinary.

Papers are considered for publication on the understanding that they have not been, and will not be, published elsewhere in whole or in part, and that, where customary, they have been approved for publication by the relevant Head of Department. The Editor is not responsible for any loss of or damage to manuscripts or illustrations and his decision on all editorial matters is final. This journal is covered by *Current Contents* and *Biological Abstracts*.

**Manuscripts** should be sent in duplicate to the Executive Editor, *Journal of Biosocial Science*, 7 Downing Place, Cambridge CB2 3EL. They should be clearly typewritten, on one side of the paper only, with a 1½ inch margin, and be double-spaced and in the English language. Spelling should follow that of the *Concise Oxford Dictionary*. Where English is not the language of the country of origin, a translation of the English summary into that language may additionally be provided for publication.

Papers must be written clearly, simply and concisely. They should be checked very carefully before being submitted. The author is responsible for the accuracy of quotations, tabular matter and references.

An original paper should not include an extensive review of the literature, but only sufficient references to indicate the purpose and relevance of the investigation. Methods which have been recorded previously should be described only briefly and in general terms, but the author's modifications, if any, may be given in detail. Text, tables and figures must be internally consistent and not repetitious. Results should be described concisely and discussion limited to the significant new findings. Theoretical exercises should be such as to lead to conclusions of general interest. Reviews should be authoritative and well documented.

The Editor reserves the right to make minor literary emendations in the final editing, but manuscripts will not be altered substantially without consultation with the author or marked unless the paper is thought provisionally to be acceptable.

Manuscripts should bear the title of the paper, name of the Institution where the work was done and, as a footnote, the present postal address of the author if different from that of the Institution. Titles should be brief, but informative, and should indicate the nature of the contents, not their import. A short title, to serve as a running head and consisting of not more than 50 letters (including spaces), should also be given on the title page. A summary not exceeding 5% of the length of the paper should precede the text. Section headings may be of four orders which in print will appear as: centre bold, centre italics, side raised italics and side inset italics; of these, the first and third are normally sufficient. Acknowledgments should be made at the end of the text in a separate section. Footnotes should be avoided except as indicated above.

**Diagrams** must be numbered as Text-figures and should bear the author's name, short title of the paper and figure number on the back. Captions for Text-figures should be typed on a separate sheet. Visual aids of this kind should be used where possible to replace or supplement tabular matter.

**Tables** should be typed on separate sheets, be given Arabic numbers and be headed by adequate captions. Their approximate position in the text should be indicated by a note in the margin. They should not exceed in size the equivalent of one page of print. Weights and measurements should be given in metric units, with standard abbreviations ( $\mu\text{g}$ , mg, g, kg; ml, l; mm, cm, m, km, °C). Other abbreviations which should be used include %, <, >, hr, min. The 24-hr clock should be used to indicate the time of day. Abbreviations as such, should not be followed by, and initials need not be separated by, full points (e.g. FPA). Mean values should, where possible, be accompanied by standard errors or similar statistical indications of variance.

**References** in the text should be given in the manner that is standard in the Journal. Titles of journals should be abbreviated according to the *World List of Scientific Periodicals*, 4th edn (1964) and its supplements, and as also given in *World Medical Periodicals*.

An unpublished paper should not be cited among the references unless it has specifically been accepted for publication by a particular Journal, in which case the words (in press) should be used in place of the volume and page number of the journal.

**Proofs** will be sent to contributors for minor corrections, and should be returned to the Editor within one week. Special attention should be given to the checking of tables, mathematical formulae and Text-figures. Major alterations to the text will be accepted only at the author's expense. Overseas contributors are advised to arrange for a proof-reader in Great Britain. The date of receipt given at the head of the paper is that on which the script as published was received or agreed.

**Offprints.** 25 offprints together with a copy of the issue of the Journal in which the paper appears will be supplied free to the author, or, where there are two or more, to the author responsible for ordering offprints. Additional offprints up to the limit of 500 may be purchased if ordered on the form sent out with the proofs.

**Page charge.** There is no charge to authors for publication in *J. biosoc. Sci.*

© Galton Foundation. No part of this publication may be reproduced or stored in a retrieval system in any form or by any means without the permission of both the Galton Foundation and the author.

## The Eugenics Society

A symposium on *Equalities and Inequalities in Health* will be held on 25th and 26th September 1975 in the Meeting Rooms of the Zoological Society of London, Regent's Park, London.

*Thursday, 25th September*

### Session 1. GENETIC ASPECTS

The global incidence of genetic illnesses	Dr C. O. CARTER
Sexual differences in disease and mortality	Dr D. F. ROBERTS
Single-locus predisposition to disease	Dr J. EDWARDS

### Session 2. ENVIRONMENTAL ASPECTS

The geography of disease	Professor M. HOWE
The assessment of risks to health	Professor W. R. LEE
THE GALTON LECTURE: Inequality, is it inevitable?	Sir JOHN BROTHERSTON

*Friday, 26th September*

### Session 3. SOCIAL ASPECTS

How doctors generate disease	Dr D. GOULD
Class difference	Mrs M. BLAXTER
Urban and suburban differentials	Dr R. DONALDSON

### Session 4. COMPARATIVE ASPECTS

Some European comparisons	Dr D. M. PRINSLEY
Problems and solutions in developing countries	Dr D. M. POTTS
Health as aid: the need for medical advisers	Professor P. HUNTINGFORD

---

Admission to the symposium is free but by ticket. Application should be made to the General Secretary, The Eugenics Society, 69 Eccleston Square, London SW1V 1PJ.

# POPULATION STUDIES

## A Journal of Demography

Edited for The Population Investigation Committee  
Editors: D. V. Glass and E. Grebenik

VOL. XXIX, No. 2

CONTENTS

JULY 1975

- DALLAS F. S. FERNANDO. Changing Nuptiality Patterns in Sri Lanka 1901–1971
- GERALDINE B. TERRY. Rival Explanations in the Work–Fertility Relationship
- I. SIRAGELDIN, D. NORRIS and M. AHMED. Fertility in Bangladesh: Facts and Fancies
- R. ROSS. The ‘White’ Population of South Africa in the Eighteenth Century
- S. H. PRESTON. The Changing Relation between Mortality and Level of Economic Development
- P. NEAL RITCHEY. The Effect of Minority Group Status on Fertility: A Re-examination of Concepts
- I. O. ORUBULOYE and J. C. CALDWELL. The Impact of Public Health Services on Mortality: A Study of Mortality Differentials in a Rural Area of Nigeria
- C. H. COOMBS, LOLAGENE C. COOMBS and G. M. MCCLELLAND. Preference Scales for Number and Sex of Children
- E. A. WRIGLEY. Baptism Coverage in Early Nineteenth Century England: The Colyton Area

### Book Reviews

Subscription price per volume of 3 parts £6.00 (US \$18.00), post free.

Single parts of current volumes £2.50 (US \$7.50), post free.
