

# Cambridge University Press Journals

## Cambridge Journals of Interest...

### Applied and Preventive Psychology

#### Current Scientific Perspectives

Editor: Samuel Osipow, *Ohio State University*

**Applied and Preventive Psychology** was launched in 1992 to promote the integration of science and public interest with the practice of psychology. This review journal is intended for the "scientist-practitioner."

Vol. 5, 1996 (Quarterly, ISSN 0962-1849)

### Behavioral and Brain Sciences

#### An International Journal of Current Research and Theory with Open Peer Commentary

Editor: Stevan Harnad, *Princeton University*

**Behavioral and Brain Sciences** is the internationally renowned journal with the innovative format "Open Peer Commentary." BBS features a fascinating and unique forum that contributes to the communication, criticism, stimulation, and unification of research in its field.

Vol. 19, 1996 (Quarterly, ISSN 0140-525X)

### Development and Psychopathology

Editor: Dante Cicchetti, *University of Rochester,  
Mt. Hope Family Center*

Deputy Editor: Barry Nurcombe, *Vanderbilt  
University College of Medicine*

This multidisciplinary journal is devoted to the publication of original, empirical, theoretical and review papers which address the interrelationship of normal and pathological development in adults and children.

Vol. 8, 1996 (Quarterly, ISSN 0954-5794)

### Psychological Medicine

Editor: Eugene Paykel, *University of  
Cambridge, Department of Psychiatry*

**Psychological Medicine** publishes original research in clinical psychiatry and the basic sciences related to it. Authoritative articles provide up-to-date surveys of recent findings and issues, and offer an historical and interdisciplinary perspective not often found in more traditional journals.

Vol. 26, 1996 (Bimonthly, ISSN 0033-2917)

### Psychological Science

Editor: John Kihlstrom, *University of Arizona,  
Tucson*

**Psychological Science** is a forum for research, theory and application in psychology and the closely related behavioral, cognitive, neural and social sciences. The journal also covers psychology in government and public affairs.

Vol. 7, 1996 (Bimonthly, ISSN 0956-7976)

### Psychophysiology

#### An International Journal

Editor: John T. Cacioppo, *Ohio State University*

This prestigious international journal plays a key role in advancing psychophysiological science. The premier journal in its field, it publishes new theoretical, empirical and methodological papers of the highest standards, covering research on the interrelationships between the physiological and psychological aspects of behavior.

Vol. 33, 1996 (Bimonthly plus abstracts  
supplement, ISSN 0048-5772)

CAMBRIDGE  
UNIVERSITY PRESS

# CAMBRIDGE – Important Topics in Neuropsychology and Related Fields

## Neurotransmitter Release and its Modulation

Biochemical Mechanisms, Physiological  
Function and Clinical Relevance

**David A. Powis and  
Stephen J. Bunn, Editors**

A concise description of the basic  
mechanisms involved in neurotransmitter  
release modulation within the nervous  
system, including a quantitative evaluation  
of the significance of modulation, a  
summary of its biological ramifications,  
and potential clinical relevance.

1995 364 pp.  
44068-8 Hardback \$115.00  
44616-3 Paperback \$49.95

## Neurobiological Effects of Sex Steroid Hormones

**Paul E. Micevych and  
Ronald P. Hammer, Jr., Editors**

Examines the neurobiological bases for the  
understanding of the interactions between  
the sex hormones and the brain. It covers a  
broad range of topics, extending from the  
molecular and cellular processes, through the  
action of steroids on neurotransmission, all  
the way to defining the brain circuitry  
involved in both male and female behavior.

1995 462 pp.  
45430-1 Hardback \$84.95

## Remembering Our Past

Studies in Autobiographical Memory

**David C. Rubin, Editor**

Reviews the subject of autobiographical  
memory from the perspective of cognitive  
psychology, while integrating social devel-  
opmental, and clinical views. Covers such  
topics as emotions, eyewitness memory,  
false memory syndrome, and amnesia.

1995 448 pp.  
46145-6 Hardback \$59.95

## The Psychology of Associative Learning

**David R. Shanks**

Considers the informational basis of  
learning, in terms of the memorization  
of instances. It discusses at length the  
application of connectionist models to  
human learning.

*Problems in the Behavioral Sciences 13*  
1995 206 pp.  
44515-9 Hardback \$54.95  
44976-6 Paperback \$24.95

## The Depressed Child and Adolescent

Developmental and Clinical Perspectives

**Ian M. Goodyer, Editor**

Examines the nature and characteristics  
of depression in children and adolescents  
including the historical development of  
the concept.

*Cambridge Monographs on Child and  
Adolescent Psychiatry 1*  
1995 378 pp.  
43326-6 Hardback \$79.95

## Theoretical Approaches to Obsessive-Compulsive Disorder

**Ian Jakes**

Offers a critical discussion of the most  
important theories explaining this disorder  
and offers an entirely new approach to its  
definition.

*Problems in the Behavioral Sciences 14*  
1996 224 pp.  
46058-1 Hardback about \$59.95

## Photosensitive Epilepsy

New and Expanded Second Edition

**Graham F.A. Harding and  
Peter M. Jeavons**

Includes details of many recent studies  
including drug therapy and the genetics of  
photosensitivity and also looks at the long  
term prognosis for therapy.

*Clinics in Developmental Medicine 133*  
1995 192 pp.  
1-898-68302-6 Hardback \$59.95

## Schizotypal Personality

**Adrian Raine, Todd Lencz, and  
Sarnoff A. Mednick, Editors**

Explores the categorical and dimensional  
approaches to the understanding of  
schizotypal disorder, and its relationship  
to schizophrenia, and reviews methodol-  
ogical issues.

1995 c.300 pp.  
45422-0 Hardback \$89.95

## Akathisia and Restless Legs

**Preminder Sachdev**

The first comprehensive account of the  
scientific and clinical aspects of akathisia  
and related syndromes such as restless legs  
syndrome (RLS), other forms of motor  
restlessness, and neuroleptic-induced  
dysphoria focusing on drug-induced  
akathisia and its various subtypes.

1995 439 pp.  
44426-8 Hardback \$69.95

Available in  
bookstores or from

# JOURNAL OF THE INTERNATIONAL NEUROPSYCHOLOGICAL SOCIETY

## Instructions for Contributors

### AIMS and Scope

The *Journal of the International Neuropsychological Society* welcomes scholarly contributions broadly reflecting the interests of all areas of neuropsychology. Coverage will include, but is not limited to, topics in adult neuropsychology, child neuropsychology, developmental neuropsychology, disorders of speech and language, and the interfaces of neuropsychology with related areas such as behavioral neurology, neuropsychiatry, neuroimaging and electrophysiology. *Book Reviews* will also be published.

Neuropsychological topics include theoretical considerations such as the development of cognitive processes, and brain-behavior relationships. Submissions are also encouraged that employ neuropsychological methods as either independent or outcome variables to illuminate the processes of various neurological, medical, and psychiatric disorders. The focus of the work may be primarily experimental, more applied or clinical. The key requirements are that it be original, creative, and of high quality.

To assure maximum flexibility and to promote diverse mechanisms of scholarly communication, it is intended to offer at least the following formats in addition to regular research articles: *Rapid Communications* which should be brief and are intended for "fast-breaking" new work which does not yet justify a full length article; *Case Studies* that report interesting individual cases; *Critical Reviews* which should be thoughtful considerations of topics of importance to neuropsychologists; *Updates* intended to provide an educational exposition of cognate fields, e.g., functional brain imaging, neuroepidemiology, ethical issues, etc; *Symposia* consisting of several research articles on a thematically linked area; *Dialogues* publishing arguments in a point-counterpoint form with two or more authors taking different positions on controversial issues in neuropsychology; and *Letters to the Editor* which should briefly report on observations or respond to recent articles in the *Journal of the International Neuropsychological Society*.

*Critical Reviews, Updates, Symposia and Dialogues* may be invited by the Department Editor responsible, or may be proposed by authors. Such proposals should be discussed with the Editor-in-Chief or the appropriate Department Editor before submission.

### Originality and Copyright

To be considered for publication in the *Journal of the International Neuropsychological Society*, a manuscript cannot have been published previously, nor can it be under review for publication elsewhere. Papers with multiple authors are reviewed with the assumption that all authors have approved the submitted manuscript and concur with its submission to the *Journal of the International Neuropsychological Society*. A Copyright Transfer Agreement, with certain specified rights reserved by the author, must be signed and returned to the Editor by senior authors of accepted manuscripts, prior to publication. This is necessary for the wide distribution of research findings, and the protection of both author and the society under copyright law.

### Manuscript Submission and Review

An original and four complete copies including figures and illustrations should be sent to:

Igor Grant, MD  
Editor-in-Chief  
*Journal of the International Neuropsychological Society*  
Department of Psychiatry  
Clinical Sciences Building, Room 249  
University of California, San Diego  
9500 Gilman Drive  
La Jolla, CA 92093-0680

Phone: (619) 534-4306  
Fax: (619) 552-4318  
E-mail: jins@ucsd.edu

In a cover letter, the author should indicate the category under which a manuscript is submitted and should identify the corresponding author including phone number, fax number and electronic mail address (if available).

The Editor-in-Chief will acknowledge receipt of the manuscript, provide it with a manuscript reference number, and assign it for review to an Associate or Department Editor and at least two other reviewers. Every effort will be made to provide the author with a review within 10 weeks of manuscript assignment. *Rapid Communications* and *Letters to the Editor* will be reviewed within 6 weeks. If the Editor requests that revisions be made to a manuscript before publication, a maximum of 4 months will be allowed for preparation of the revision, except in unusual circumstances.

### Manuscript Length

*Regular Research Articles*—maximum of 5,000 words and a 200 word abstract (approximately 20 double-spaced manuscript pages, not including references and tables) but exceptions will be considered for unusually large or complex studies. *Rapid Communications*—maximum 2,500 words and a 150 word abstract, approximately 10 double-spaced manuscript pages, with a maximum of two tables and/or two figures. *Rapid Communications* should list no more than 20 references. *Case Studies*—for interesting cases, maximum 2,500 words with an informative literature review and an abstract not exceeding 150 words. *Letters to the Editor*—maximum 500 words with up to five references, one table or one figure.

### Manuscript Preparation and Style

The entire manuscript should be typed double-spaced throughout on 8-1/2" x 11" of A4 paper. Unless otherwise specified, the guideline for preparation of manuscripts is the *Publication Manual of the American Psychological Association* (4th edition). This may be ordered from: APA Order Dept., 750 1st St. NE, Washington DC 20002-4242, USA.

Pages should be numbered sequentially beginning with the Title Page. The Title Page should contain the full title of the manuscript, the full names and affiliations of all authors, a contact address with telephone and fax numbers, acknowledgments and support, and the name and address for requests for reprints. At the top right provide also a running headline (shortened title) of up to forty-five characters preceded by the lead author's last name. Example: Smith-Implicit Memory in Parkinson's. This running headline should be repeated at the top right of every following page.

The Abstract and Keywords Page (page 2) should include a brief statement of the problem, the method, the key findings, and the conclusions. For *Case Studies* there should be a brief summary of the case and its relevance to the existing literature. A list of three or four key words or terms should also be included.

The full text of the manuscript should begin on page 3. For scientific articles, including regular *Research Articles* and *Rapid Communications*, the format would include an Introduction, Method, Results, and Discussion. This should be followed by References, Tables, Figures, and Figure Legends printed on a separate sheet.

The use of abbreviations, except those that are widely used, is strongly discouraged. They should be used only if they contribute to better comprehension of the manuscript. Acronyms should be spelled out at first mention. Metric system (SI) units should be used.

### Figures

High quality laser-printed copies or photocopies are acceptable. Figures should be numbered consecutively as they appear in the text. Mark each figure with the first author's name, the figure number and the orientation on the reverse of the originals and copies. Any indication of features of special interest should also be included. Figures should be drawn or composed on computer to about twice their intended final size and authors should do their best

to construct figures with notation and data points of sufficient size to permit legible photoreduction to one column of a two-column format. As a guide, no character should be smaller than 1 mm wide following reduction.

Color figures can be accepted. However, the extra costs of printing these figures must be paid by the author.

### References

References should be in American Psychological Association style (see *Manuscript Preparation and Style* above).

Text references should be cited as follows: "The findings duplicated the results of an earlier study (Brown & Greene 1991)," or "The method used was an enhancement of Bell and Tower's (1973) and Jones et al.'s (1977). . . ." If multiple works by Jones et al. (1977) are cited, use a, b, c, in the order these appear in the text. Multiple references should be cited alphabetically: "Previous studies (Adams et al., 1980; Davies and Engler, 1985; Watson, 1987). . . ." References cited in the text with three or more authors should state et al. even at first mention. Reference entries should be alphabetically listed in the reference section with all authors being cited. Examples of the APA reference style are as follows:

### Scientific Article:

Heaton, R.K., Grant, I., Anthony, W.Z., & Lehman, R.A.W. (1981). A comparison of clinical and automated interpretation of the Halstead-Reitan Battery. *Journal of Clinical Neuropsychology*, 3, 121-141.

### Book:

Russel, E.W., Neuringer, C., & Goldstein, G. (1970). *Assessment of brain damage: A neuropsychological key approach*. New York: Wiley.

### Chapter in Book:

Reitan, R.M. (1966). A research program on the psychological effects of brain lesions in human beings. In N.R. Ellis (Ed.), *International Review of Research in Mental Retardation, Vol. 1* (pp. 153-218). New York: Academic Press.

### Report at a Scientific Meeting:

Berman, K.F., Zec, R.F. & Weinberger, D.R. (1989, May). *Frontal cortical dysfunction in schizophrenia*. Symposia presentation, American Psychiatric Association, Washington, DC.

### Manual, Diagnostic Scheme, etc.:

American Psychiatric Association (1994). *Diagnostic and Statistical Manual of Mental Disorders* (4th ed.). Washington, DC: American Psychiatric Association Press.

### Manuscript Disk

When a manuscript has been accepted for publication, the authors are requested to submit a disk version of their manuscript along with two hard copies. The disk should be labeled with the manuscript number, the author's name and the original word-processing file. It should be noted that the disk file will be considered the final version of the manuscript.

### Proofs

The publisher reserves the right to copyedit manuscripts. The corresponding author will receive page proofs for final proofreading. These should be checked and returned within 2 days of receipt. The publisher reserves the right to charge authors for excessive correction of nontypographical errors.

### Offprints

The corresponding author will receive 25 free offprints. Additional offprints must be ordered when page proofs are returned. Price lists and order forms will be sent with page proofs.
