

Disease in African History

An Introductory Survey and Case Studies

Edited by Gerald W. Hartwig and K. David Patterson

"This is not simply a collection of good articles, each making an original contribution to the common subject. It is a major breakthrough into a kind of history that has been very much neglected in the study of Africa." Philip D. Curtin, The Johns Hopkins University

Papers by Gerald W. Hartwig, K. David Patterson, Charles M. Good, Mario Joaquim Azevedo, Mark W. DeLancey, and James W. Brown. The book is a pioneering work on a continent whose medical past is still largely uncharted, and should be of interest to historians of medicine. **\$13.75**

The Royal College of San Carlos

Surgery and Spanish Medical Reform
in the Late Eighteenth Century

Michael E. Burke

"As little of a scholarly nature has been written in English on the history of Spanish medicine, Professor Burke's excellent book is most welcome. Based on his broad knowledge of the Spanish Enlightenment, he is able to depict the founding in Madrid of this College in 1787 and its chequered career thereafter. The problems assailing its development were much the same as in other countries . . . but their full analysis, with reference to the European context, could only be made by a scholar of Burke's stature and knowledge. . . . Can be recommended unreservedly as an important contribution to the history of European medicine." *Medical History* **\$10.75**

Antique Medical Instruments

ELISABETH BENNION

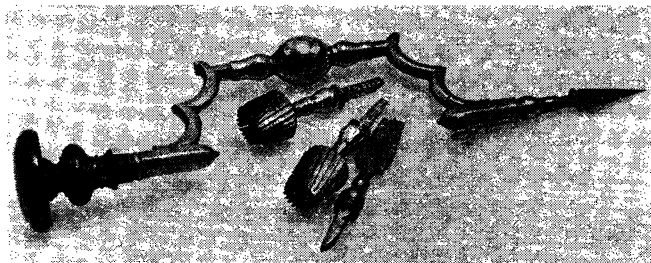

With a Foreword by Reginald Murley,
President of the Royal College of Surgeons of England

This book is the first of its kind to be written and covers the history of medical and surgical instruments from the Middle Ages to 1870; with it are chapters on dental and veterinary pieces and such adjuncts of the sickroom as feeding utensils, medicine receptacles, and those items of the toilet concerned with hygiene, as well as early spectacles and ear trumpets. Through the instruments one may find a mass of social comment and a dramatic account of medical history, culminating in Lister's victory over septicaemia which separates the instruments in this book from those of today. With the introduction of antisepsis and the eventual acceptance of sterilization for all instruments, they necessarily became plainer and less interesting, and the more decorative materials were precluded from use.

For the growing number of collectors this book is long overdue and for them the Directory of Surgical Instrument Makers will be invaluable providing, as it does, a framework for the dating of pieces by named makers. Included for the layman is a simple glossary of terminology and a chart showing, internationally, the comparative dates of doctors and surgeons. The book is profusely illustrated with 382 photographs originating from many different sources.

Elisabeth Bennion has, for the last six years, worked for Simon Kaye Ltd., Silversmiths, where instruments made in silver first excited her enthusiasm for wider study.

HISTORY OF SCIENCE

is the only review of literature and research in the history of science, medicine and technology in its intellectual and social context.

FOUNDED IN 1962 AS AN ANNUAL VOLUME, *History of Science* discusses problems and sources for future research in the history of science, medicine and technology, and surveys recent publications. It now appears each year in quarterly parts of about 80 pages each.

VOLUME 17 (1979) will include

- HENRY GUERLAC *Some Areas for Further Newton Study*
DAVID EDGE *Quantitative Measures of Communication in Science*
IRIS SANDLER *Some Reflections on the Protean Nature of the Scientific Precursor*
P. M. HEIMANN *Newton and Continental Controversy*
M. BUTTNER *The Significance of the Reformation for the Reorientation of Geography in Lutheran Germany*
D. R. OLDROYD *Historicism and the Rise of Historical Geology*
MICHAEL BARTHOLOMEW *The Singularity of Lyell*
THOMAS L. HANKINS *In Defence of Biography*
A. M. HASSANI *Arab Scientists Revisited: Ibn ash-Shatir and Taqi ed-Din*

together with other articles, essay reviews and supporting material.

THE ANNUAL SUBSCRIPTION is £13.50 post free outside the Americas and Japan (£10.50 post free to direct private subscribers). New subscribers may purchase the first sixteen volumes (bound) for £70.00 post free, including the subscription to Volume 17 (1979). Write to: Circulation Manager, *History of Science*, Whipple Museum, Free School Lane, Cambridge CB2 3RH, England.
