

## Corrigendum

# The Oslo University Adolescent and Young Adult Twin Project: Recruitment and Attrition – CORRIGENDUM

S. Torgersen and T. Waaktaar

<https://doi.org/10.1017/thg.2019.51>, Published by Cambridge University Press, 8 August 2019

**Keywords:** Twins; sample recruitment; attrition; personality; Big Five; HIPIC; DSM-IV clinical conditions; personality disorders

The authors regret that a number in the Abstract is slightly wrong, and that four percentages and one number is wrong in one table.

The number 1422 shall be 1425 in the sentence ‘Of these, again 1538 twin families (61.9%) actually participated in at least one wave and twins from 1425 (57.3%) participated in the interview’ in line 10-11, page 641. The percentage (57.3%) is correct.

The column of percentages for FMZ in Table 4 was simply a repetition of the column of percentages for MMZ. Furthermore, the ‘Sum’ of ‘Total number interviewed’ was 1425, not 1725 (See correct Table 4).

**Table 4.** Number (%) of twin pairs participated in the wave of data collection and/or interview by sex and zygosity (corrected)

	MMZ		FMZ		MDZ		FDZ		ODZ		SUM	
	<i>n</i>	%	<i>n</i>	%	<i>n</i>	%	<i>n</i>	%	<i>n</i>	%	<i>n</i>	%
At least one wave, no Interview	64	19.5	46	14.0	64	19.5	45	13.7	109	33.2	328	100.0
At least one wave and Interview	166	13.7	297	24.5	161	13.3	237	19.6	349	28.8	1210	100.0
Interview only	31	14.4	52	24.2	27	12.6	32	14.9	73	34.0	215	100.0
Total number interviewed	197	13.8	349	24.5	188	13.2	269	18.9	422	29.6	1425	100.0

Note: MMZ, Male monozygotic; FMZ, Female monozygotic; MDZ, Male dizygotic; MDZ, Male dizygotic; FDZ, Female dizygotic; ODZ, Opposite sex dizygotic.
