

Index of Subjects

Abomasal infusion

Protein metabolism in growing lambs fed on fresh ryegrass (*Lolium perenne*)-clover (*Trifolium repens*) pasture *ad lib.* 1. Protein and energy deposition in response to abomasal infusion of casein and methionine. 46, 521, 1981

Absorption mechanism

Zinc absorption in the rat. 46, 15, 1981

Acetate metabolism

Acetate supply and utilization by the tissues of sheep *in vivo*. 46, 97, 1981

Aflatoxin

The effect of dietary fibre sources on aflatoxicosis in the weanling male rat. 46, 315, 1981

Allergic reaction

Adverse reactions to foods. 46, 403, 1981

Amino acid absorption

Protein metabolism in growing lambs fed on fresh ryegrass (*Lolium perenne*)-clover (*Trifolium repens*) pasture *ad lib.* 1. Protein and energy deposition in response to abomasal infusion of casein and methionine. 46, 521, 1981

Amino acid analogues

Utilization of amino acid analogues in diets of young turkeys. 46, 77, 1981

Amino acid availability

Availability to pigs of amino acids in cereal grains.

1. Endogenous levels of amino acids in ileal digesta and faeces of pigs given cereal diets. 46, 149, 1981

Availability to pigs of amino acids in cereal grains.

2. Apparent and true ileal availability. 46, 159, 1981

Availability to pigs of amino acids in cereal grains.

3. A comparison of ileal availability values with faecal, chemical and enzymic estimates. 46, 173, 1981

Availability to pigs of amino acids in cereal grains.

4. Factors influencing the availability of amino acids and energy in grains. 46, 181, 1981

Amino acid digestion

Utilization of free lysine by growing pigs. 46, 87, 1981

Ammonia metabolism

The maximum capacity of the liver of the adult dairy cow to metabolize ammonia. 46, 481, 1981

Anaemia

The ingestion of sow's faeces by suckling piglets. 46, 451, 1981

Appetite control

A possible control of food intake during pregnancy in the rat. 46, 29, 1981

Artificial rearing

Digestion in the pig between 7 and 35 d of age. 6. The digestion of hydrolyzed milk and soya-bean proteins. 46, 59, 1981

Bile acid excretion

The effect of dietary protein source and saponins on serum lipids and the excretion of bile acids and neutral sterols in rabbits. 46, 421, 1981

Body composition

Differences in body compositions, growth and food intakes between mice which have been selected for a small and large body size. 46, 441, 1981

Brain development

The subcellular localization of administered *N*-acetylneuraminic acid in the brains of well-fed and protein restricted rats. 46, 231, 1981

Bran

Wheat bran increases high-density-lipoprotein cholesterol in the rat. 46, 385, 1981

Breadmaking

Hydrolysis of the phytate of wheat flour during breadmaking. 46, 1, 1981

Caecum

Effects of removal of the forestomach and caecum on the utilization of dietary urea in golden hamsters (*Mesocricetus auratus*) given two different diets. 46, 503, 1981

Caecum-colon digestion

The digestive capacity of the caecum-colon and the value of the nitrogen absorbed from the hind gut for protein synthesis in pigs. 46, 209, 1981

Calcium metabolism

The absorption and secretion of calcium in the gastrointestinal tract of germ-free and conventional chicks. 46, 549, 1981

Cardiovascular risk

High-fibre and low-fat diets in diabetes mellitus. 46, 289, 1981

Carrier protein

Zinc transport proteins in plasma. 46, 111, 1981

Central nervous system

Effects of essential fatty acid deficiency during late gestation on brain *N*-acetylneuraminic acid metabolism and behaviour in the progeny. 46, 223, 1981

Cereal grains

Availability to pigs of amino acids in cereal grains.

1. Endogenous levels of amino acids in ileal digesta and faeces of pigs given cereal diets. 46, 149, 1981

Availability to pigs of amino acids in cereal grains.

2. Apparent and true ileal availability. 46, 159, 1981

Availability to pigs of amino acids in cereal grains.

3. A comparison of ileal availability values with faecal, chemical and enzymic estimates. 46, 173, 1981

Availability to pigs of amino acids in cereal grains.

4. Factors influencing the availability of amino acids and energy in grains. 46, 181, 1981

Cholesterol

Wheat bran increases high-density-lipoprotein cholesterol in the rat. 46, 385, 1981

Cholesterol metabolism

The effect of dietary protein source and saponins on serum lipids and the excretion of bile acids and neutral sterols in rabbits. 46, 421, 1981

Cobalt deficiency

Effects of cobalt deficiency in pregnant and post-parturient ewes and their lambs. 46, 337, 1981

Copper supplementation

An attempt to distinguish between the direct and indirect effects, in the laying domestic fowl, of added dietary copper sulphate. 46, 71, 1981

Copper toxicity

Intravenous administration of thiomolybdate for the prevention and treatment of chronic copper poisoning in sheep. 46, 457, 1981

An investigation of the effects of intravenous administration of thiomolybdate on copper metabolism in chronic Cu-poisoned sheep. 46, 469, 1981

Diabetes

Guar bread: acceptability and efficacy combined. Studies on blood glucose, serum insulin and satiety in normal subjects. 46, 267, 1981

Diabetes mellitus

High-fibre and low-fat diets in diabetes mellitus. 46, 289, 1981

Diabetic sheep

Acetate supply and utilization by the tissues of sheep in vivo. 46, 97, 1981

Diarrhoea

Neonatal diarrhoea in calves given milk-substitutes differing in fat source and fed by different procedures. 46, 543, 1981

Dietary fibre

The effect of guar gum on the viscosity of the gastrointestinal contents and on glucose uptake from the perfused jejunum in the rat. 46, 239, 1981

A method to measure the water-holding properties of dietary fibre using suction pressure. 46, 247, 1981

Guar bread: acceptability and efficacy combined. Studies on blood glucose, serum insulin and satiety in normal subjects. 46, 267, 1981

The effect of dietary fibre sources on aflatoxicosis in the weanling male rat. 46, 315, 1981

Wheat bran increases high-density-lipoprotein cholesterol in the rat. 46, 385, 1981

Digestion composition

Changes in the composition of digesta during passage through the small intestines of steers. 46, 431, 1981

Dried grass

The effect of grinding and pelleting on the digestion of Italian ryegrass and timothy by sheep. 46, 357, 1981

Early-weaned piglet

Digestion in the pig between 7 and 35 d of age. 6. The digestion of hydrolyzed milk and soya-bean proteins. 46, 59, 1981

Energy intake

Nitrogen balance in Indian preschool children receiving the safe level of protein at varying levels of energy. 46, 295, 1981

Epithelial bacteria

Influences of dietary sucrose and urea on transfer of endogenous urea to the rumen of sheep and numbers of epithelial bacteria. 46, 533, 1981

Erythrocyte stability

Glutathione peroxidase activity and erythrocyte stability in calves differing in selenium and vitamin E status. 46, 345, 1981

Erythrocytes

Riboflavin deficiency in man: effects on haemoglobin and reduced glutathione in erythrocytes of different ages. 46, 257, 1981

Essential fatty acids

Effects of essential fatty acid deficiency during late gestation on brain *N*-acetylneuraminic acid metabolism and behaviour in the progeny. 46, 223, 1981

Faecal iron

The ingestion of sow's faeces by suckling piglets. 46, 451, 1981

Fasting

The effects of short periods of fasting on the absorption of heavy metals. 46, 277, 1981

Fatty acid deficiency

Essential fatty acid deficiency and evidence for arachidonate synthesis in the cat. 46, 93, 1981

Effects of essential fatty acid deficiency during late gestation on brain *N*-acetylneuraminic acid metabolism and behaviour in the progeny. 46, 223, 1981

Fatty acid synthesis

Essential fatty acid deficiency and evidence for arachidonate synthesis in the cat. 46, 93, 1981

Fatty acids

Effects of cobalt deficiency in pregnant and post-parturient ewes and their lambs. 46, 337, 1981

Fibre

The effect of type and level of protein, fibre and starch on nitrogen excretion patterns in rats. 46, 301, 1981

Food intake

A possible control of food intake during pregnancy in the rat. 46, 29, 1981

Food intolerance

Adverse reactions to foods. 46, 403, 1981

Formaldehyde treatment

The digestion by cattle of trass silage made with formic acid and formic acid-formaldehyde. 46, 193, 1981

Formic acid treatment

The digestion by cattle of trass silage made with formic acid and formic acid-formaldehyde. 46, 193, 1981

Frequency of feeding

Utilization of free lysine by growing pigs. 46, 87, 1981

Germ-free chicks

The absorption and secretion of calcium in the gastrointestinal tract of germ-free and conventional chicks. 46, 549, 1981

Glucose absorption

The effect of guar gum on the viscosity of the gastrointestinal contents and on glucose uptake from the perfused jejunum in the rat.

46, 239, 1981

Glucose production

The maximum capacity of the liver of the adult dairy cow to metabolize ammonia.

46, 481, 1981

Grinding and pelleting

The effect of grinding and pelleting on the digestion of Italian ryegrass and timothy by sheep.

46, 357, 1981

Growth

Protein synthesis in tissues of growing lambs.

46, 409, 1981

Differences in body compositions, growth and food intakes between mice which have been selected for a small and large body size.

46, 441, 1981

Growth rate

Characteristics of skeletal muscle growth and protein turnover in a fast-growing rat strain.

46, 7, 1981

Guar bread

Guar bread: acceptability and efficacy combined. Studies on blood glucose, serum insulin and satiety in normal subjects.

46, 267, 1981

Guar gum

The effect of guar gum on the viscosity of the gastrointestinal contents and on glucose uptake from the perfused jejunum in the rat.

46, 239, 1981

Haemoglobin

Riboflavin deficiency in man: effects on haemoglobin and reduced glutathione in erythrocytes of different ages.

46, 257, 1981

Heavy metal absorption

The effects of short periods of fasting on the absorption of heavy metals.

46, 277, 1981

High-fibre diets

High-fibre and low-fat diets in diabetes mellitus.

46, 289, 1981

Hind gut absorption

The digestive capacity of the caecum-colon and the value of the nitrogen absorbed from the hind gut for protein synthesis in pigs.

46, 209, 1981

Hydrolysed protein

Digestion in the pig between 7 and 35 d of age. 6. The digestion of hydrolyzed milk and soya-bean proteins.

46, 59, 1981

Ileal digesta

Availability to pigs of amino acids in cereal grains. 1. Endogenous levels of amino acids in ileal digesta and faeces of pigs given cereal diets.

46, 149, 1981

Availability to pigs of amino acids in cereal grains. 2. Apparent and true ileal availability.

46, 159, 1981

Availability to pigs of amino acids in cereal grains. 3. A comparison of ileal availability values with faecal, chemical and enzymic estimates.

46, 173, 1981

Iron intake

The ingestion of sow's faeces by suckling piglets.

46, 451, 1981

Isotopic labelling

Intrinsic labelling of chicken meat with stable isotopes of zinc, for intended use in human feeding studies: feasibility and design considerations.

46, 395, 1981

The excretion of selenium in bile and urine of steers: the influence of form and amount of Se salt.

46, 487, 1981

Jaw movement recordings

Silage intake, rumination and pseudo-rumination activity in sheep studied by radiography and jaw movement recordings.

46, 327, 1981

Laying domestic fowl

An attempt to distinguish between the direct and indirect effects, in the laying domestic fowl, of added dietary copper sulphate.

46, 71, 1981

Leaf protein

Characteristics of the rumen proteolysis of fraction I (18S) leaf protein from lucerne (*Medicago sativa* L.).

46, 39, 1981

Liver

The maximum capacity of the liver of the adult dairy cow to metabolize ammonia.

46, 481, 1981

Low-fat diets

High-fibre and low-fat diets in diabetes mellitus.

46, 289, 1981

Lysine availability

Availability of lysine in protein concentrates as determined by the slope-ratio assay with chicks and comparisons with rat, pig and chemical assays.

46, 513, 1981

Lysine utilization

Utilization of free lysine by growing pigs.

46, 87, 1981

Manganese metabolism

The effect of low dietary manganese intake on rainbow trout (*Salmo gairdneri*).

46, 495, 1981

Microbial protein synthesis

The effect of grinding and pelleting on the digestion of Italian ryegrass and timothy by sheep.

46, 357, 1981

Milk-substitute

Neonatal diarrhoea in calves given milk-substitutes differing in fat source and fed by different procedures.

46, 543, 1981

Mineral metabolism

The effect of low dietary manganese intake on rainbow trout (*Salmo gairdneri*).

46, 495, 1981

Monensin

Effect of monensin on the fermentation of basal rations in the Rumen Simulation Technique (Rusitec).

46, 131, 1981

Muscle growth

Characteristics of skeletal muscle growth and protein turnover in a fast-growing rat strain.

46, 7, 1981

N-acetylneuraminic acid

The subcellular localization of administered N-acetylneuraminic acid in the brains of well-fed and protein restricted rats.

46, 231, 1981

Neurotransmitters

A possible control of food intake during pregnancy in the rat.

46, 29, 1981

- The subcellular localization of administered *N*-acetylneuraminic acid in the brains of well-fed and protein restricted rats. 46, 231, 1981
- Nitrogen balance**
Nitrogen balance in Indian preschool children receiving the safe level of protein at varying levels of energy. 46, 295, 1981
- Nitrogen excretion**
The effect of type and level of protein, fibre and starch on nitrogen excretion patterns in rats. 46, 301, 1981
- Phytate hydrolysis**
Hydrolysis of the phytate of wheat flour during breadmaking. 46, 1, 1981
- Poultry rations**
Utilization of amino acid analogues in diets of young turkeys. 46, 77, 1981
- Pregnancy**
A possible control of food intake during pregnancy in the rat. 46, 29, 1981
- Protein concentrates**
Availability of lysine in protein concentrates as determined by the slope-ratio assay with chicks and comparisons with rat, pig and chemical assays. 46, 513, 1981
- Protein-energy malnutrition**
Nitrogen balance in Indian preschool children receiving the safe level of protein at varying levels of energy. 46, 295, 1981
- Protein intake**
Nitrogen balance in Indian preschool children receiving the safe level of protein at varying levels of energy. 46, 295, 1981
- Protein metabolism**
Protein metabolism in growing lambs fed on fresh ryegrass (*Lolium perenne*)-clover (*Trifolium repens*) pasture *ad lib.* 1. Protein and energy deposition in response to abomasal infusion of casein and methionine. 46, 521, 1981
- Protein restriction**
The subcellular localization of administered *N*-acetylneuraminic acid in the brains of well-fed and protein restricted rats. 46, 231, 1981
- Protein source**
Digestion in the pig between 7 and 35 d of age. 6. The digestion of hydrolyzed milk and soya-bean proteins. 46, 59, 1981
The effect of type and level of protein, fibre and starch on nitrogen excretion patterns in rats. 46, 301, 1981
The effect of dietary protein source and saponins on serum lipids and the excretion of bile acids and neutral sterols in rabbits. 46, 421, 1981
- Protein synthesis**
The digestive capacity of the caecum-colon and the value of the nitrogen absorbed from the hind gut for protein synthesis in pigs. 46, 209, 1981
Protein synthesis in tissues of growing lambs. 46, 409, 1981
- Protein turnover**
Characteristics of skeletal muscle growth and protein turnover in a fast-growing rat strain. 46, 7, 1981
- Protozoa**
Kinetics of large ciliate protozoa in the rumen of cattle given sugar cane diets. 46, 371, 1981
- Pseudo-rumination**
Silage intake, rumination and pseudo-rumination activity in sheep studied by radiography and jaw movement recordings. 46, 327, 1981
- Rainbow trout**
The effect of low dietary manganese intake on rainbow trout (*Salmo gairdneri*). 46, 495, 1981
- Riboflavin deficiency**
Riboflavin deficiency in man: effects on haemoglobin and reduced glutathione in erythrocytes of different ages. 46, 257, 1981
- Rumen bacteria**
Influences of dietary sucrose and urea on transfer of endogenous urea to the rumen of sheep and numbers of epithelial bacteria. 46, 533, 1981
- Rumen fermentation**
Effect of monensin on the fermentation of basal rations in the Rumen Simulation Technique (Rusitec). 46, 131, 1981
- Rumen micro-organisms**
Kinetics of large ciliate protozoa in the rumen of cattle given sugar cane diets. 46, 371, 1981
- Rumen proteolysis**
Characteristics of the rumen proteolysis of fraction I (18S) leaf protein from lucerne (*Medicago sativa* L.). 46, 39, 1981
- Rumen Simulation Technique**
Effect of monensin on the fermentation of basal rations in the Rumen Simulation Technique (Rusitec). 46, 131, 1981
- Rumination**
Silage intake, rumination and pseudo-rumination activity in sheep studied by radiography and jaw movement recordings. 46, 327, 1981
- Saponins**
The effect of dietary protein source and saponins on serum lipids and the excretion of bile acids and neutral sterols in rabbits. 46, 421, 1981
- Satiety**
Guar bread: acceptability and efficacy combined. Studies on blood glucose, serum insulin and satiety in normal subjects. 46, 267, 1981
- Selenium**
The excretion of selenium in bile and urine of steers: the influence of form and amount of Se salt. 46, 487, 1981
- Selenium deficiency**
Glutathione peroxidase activity and erythrocyte stability in calves differing in selenium and vitamin E status. 46, 345, 1981
- Silage digestion**
The digestion by cattle of trass silage made with formic acid and formic acid-formaldehyde. 46, 193, 1981
- Silage intake**
Silage intake, rumination and pseudo-rumination activity in sheep studied by radiography and jaw movement recordings. 46, 327, 1981
- Slope-ratio assay**
Availability of lysine in protein concentrates as determined by the slope-ratio assay with chicks and comparisons with rat, pig and chemical assays. 46, 513, 1981

- Small intestine**
Changes in the composition of digesta during passage through the small intestines of steers. 46, 431, 1981
- Soya-bean oil**
Neonatal diarrhoea in calves given milk-substitutes differing in fat source and fed by different procedures. 46, 543, 1981
- Starch**
The effect of type and level of protein, fibre and starch on nitrogen excretion patterns in rats. 46, 301, 1981
- Starvation**
The effects of short periods of fasting on the absorption of heavy metals. 46, 277, 1981
- Stress**
Measurement of zinc flux through plasma in normal and endotoxin-stressed pigs and the effects of Zn supplementation during stress. 46, 119, 1981
- Sucrose**
Influences of dietary sucrose and urea on transfer of endogenous urea to the rumen of sheep and numbers of epithelial bacteria. 46, 533, 1981
- Sugar cane diets**
Kinetics of large ciliate protozoa in the rumen of cattle given sugar cane diets. 46, 371, 1981
- Thiomolybdate treatment**
Intravenous administration of thiomolybdate for the prevention and treatment of chronic copper poisoning in sheep. 46, 457, 1981
An investigation of the effects of intravenous administration of thiomolybdate on copper metabolism in chronic Cu-poisoned sheep. 46, 469, 1981
- Transport protein**
Zinc transport proteins in plasma. 46, 111, 1981
- Urea transfer**
Influences of dietary sucrose and urea on transfer of endogenous urea to the rumen of sheep and numbers of epithelial bacteria. 46, 533, 1981
- Urea utilization**
Effects of removal of the forestomach and caecum on the utilization of dietary urea in golden hamsters (*Mesocricetus auratus*) given two different diets. 46, 503, 1981
- Viscosity**
The effect of guar gum on the viscosity of the gastrointestinal contents and on glucose uptake from the perfused jejunum in the rat. 46, 239, 1981
- Vitamin B₁₂**
Effects of cobalt deficiency in pregnant and post-parturient ewes and their lambs. 46, 337, 1981
- Vitamin E**
Glutathione peroxidase activity and erythrocyte stability in calves differing in selenium and vitamin E status. 46, 345, 1981
- Water-holding capacity**
A method to measure the water-holding properties of dietary fibre using suction pressure. 46, 247, 1981
- Wheat bran**
Wheat bran increases high-density-lipoprotein cholesterol in the rat. 46, 385, 1981
- Zinc absorption**
Zinc absorption in the rat. 46, 15, 1981
Intrinsic labelling of chicken meat with stable isotopes of zinc, for intended use in human feeding studies: feasibility and design considerations. 46, 395, 1981
- Zinc supplementation**
Measurement of zinc flux through plasma in normal and endotoxin-stressed pigs and the effects of Zn supplementation during stress. 46, 119, 1981
- Zinc transport proteins**
Zinc transport proteins in plasma. 46, 111, 1981
