New from MIT

ESSENTIALS OF PROGRAMMING LANGUAGES

Daniel P. Friedman, Mitchell Wand, and Christopher T. Haynes

foreword by Hal Abelson

"Friedman, Wand, and Haynes have done a landmark job... The sample interpreters in this book are outstanding models. Indeed, since they are runnable models, I'm sure that these interpreters will find themselves at the cores of many programming systems over the years."— from the foreword by Hal Abelson

568 pp., 138 illus. $49.95

CATEGORIES, TYPES, AND STRUCTURES

An Introduction to Category Theory for the Working Computer Scientist

Andrea Asperti and Giuseppe Longo

Foundations of Computing Series 325 pp $32 50

ADVANCED RESEARCH IN VLSI AND PARALLEL SYSTEMS

Proceedings of the 1992 Brown/MIT Conference

edited by Thomas Knight and John Savage

400 pp. $55 00 (April)

THE ART OF THE METAOBJECT PROTOCOL

Gregor Kiczales, Jim des Rivières, and Daniel Bobrow

350 pp. $45.00 cloth, $24 95 softcover

BASIC CATEGORY THEORY FOR COMPUTER SCIENTISTS

Benjamin C. Pierce

128 pp $17 95 softcover

Logic Programming Series

TYPES IN LOGIC PROGRAMMING

edited by Frank Pfenning

Type theory is a well-established branch of theoretical computer science that has played an important role in the development of imperative and functional programming languages. This collection covers all of the major themes in this burgeoning field.

325 pp $37 50

LOGIC PROGRAMMING AND NONMONOTONIC REASONING

Proceedings of the First International Workshop

June 22-24, 1991 Washington, D.C.

edited by Anil Nerode, Wiktor Marek, and V. S. Subrahmanian

432 pp $32 50 softcover

HANDBOOK OF THEORETICAL COMPUTER SCIENCE

Volume A: Algorithms and Complexity
Volume B: Formal Models and Semantics

J. Van Leeuwen

Volume A. 996 pp. $135.00 Volume B. 1,273 pp. $150.00
Two Volume Set $250.00
Copublished with Elsevier Science Publishers. Distributed in the U.S., Canada, and Japan by The MIT Press

Now Available in Paperback

OPTICAL COMPUTING

A Survey for Computer Scientists

Dror G. Feitelson

"An extremely wide overview of this area of research.... The author has done a good job collecting and sorting out the work of 20 years.... A valuable reference source."
— Karl-Heinz Brenner, *Applied Optics*

416 pp $24.95 paper

INSTRUCTIONS TO AUTHORS

Scope

Papers may describe original technical work, survey an area, or present a tutorial; and may be either short or long. Anything related to functional programming is of interest, including: *foundations* (semantics, abstract interpretation, lambda calculi, rewriting, logic, type theory, category theory); *implementation* (compilation, architectures, parallelism, garbage collection, I/O, debugging, profiling); *linguistics* (pure and impure language features, non-determinism, side effects, logical variables, relation to other programming paradigms, proofs about programs, program transformation, program synthesis, partial evaluation); *applications* (applications programs, practical experience, programming techniques, prototyping).

Submission of manuscripts

Papers may be submitted to any of the editors. Four copies should be sent, accompanied by the author's mailing address, telephone number and, if possible, an electronic mailing address. Papers should not be submitted in the same form elsewhere. Upon acceptance of a paper, the author will be asked to transfer copyright to the publisher.

Layout of Manuscripts

Papers should be type-written or type-set in double spacing throughout, on one side of the paper. Please avoid footnotes if possible. Papers must begin with an abstract of not more than 300 words.

Illustrations

Figures should be drawn in indian ink on good quality white paper or produced by computer to comparable quality. Wherever possible they will be reproduced with the author's original lettering. Originals of figures should not be sent until the paper has been accepted. A list of captions for figures should be attached separately.

Proof reading

Please submit papers in their final form. Typographical or factual errors only may be changed at the proof stage. Authors may be charged for correction of non-typographical errors. No page charge is made.

References

The Harvard system of references will be used in order to make alterations easier. Papers should be referred to in the text by author's surname and year of publication and listed in alphabetical order at the end of the main text. Please include the article's title in the reference, which should be in the order: author's surname, initials; year in parentheses; article title; journal name, abbreviated in accordance with the World List of Scientific Periodicals (4th Edn); volume number (underlined); inclusive page numbers.

Offprints

25 offprints of each article will be supplied free to each first named author. Extra offprints may be purchased from the publisher.

Please contact the editors for clarification of any of the above points.

COPYING

This journal is registered with the Copyright Clearance Center, 27 Congress Street, Salem, MA 01970. Organisations in the USA who are also registered with the C.C.C. may therefore copy material (beyond the limits permitted by sections 107 and 108 of US copyright law) subject to payment to C.C.C. of the per-copy fee of $5.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 0956-7968/92 $5.00 + .00.

ISI Tear Service, 3501 Market Street, Philadelphia, Pennsylvania 19104, USA, is authorised to supply single copies of separate articles for private use only.

For all other use, permission should be sought from Cambridge or the American branch of Cambridge University Press.

JOURNAL OF
Functional Programming

VOLUME 2 PART 1 JANUARY 1992

CONTENTS

Modelling operating system structures by timed stream processing functions
MANFRED BROY AND CLAUS DENDORFER 1

A categorical understanding of environment machines
ANDREA ASPERTI 23

A study of sparse matrix representations for solving linear systems in a functional language
ROGER L. WAINWRIGHT AND MARIAN E. SEXTON 61

Tail recursion without space leaks
RICHARD JONES 73

A practical functional program for the CRAY X-MP
JAMES M. BOYLE AND TERENCE J. HARMER 81
