
Manuscripts of the Greek Bible

An Introduction to Palaeography

Bruce M. Metzger

In the first section, Professor Metzger considers the details of palaeography as they apply to Greek versions of the Old and New Testaments. He discusses the origins of the Greek alphabet, the pronunciation of Greek, the making of ancient books, transcribing of Greek manuscripts, and special features of Biblical manuscripts such as Lectionaries, palimpsests, musical neumes, illustrations of Biblical scenes accompanying various texts, and bilingual texts. The second section contains facsimile reproductions of some forty-five important manuscripts, with a description, analysis and bibliography on the facing page for each example. Illustrated £14.50
