

## Index of Subjects

- Adenoviruses in the faeces of normal children, 441  
 Adenoviruses from simian tonsils associated with illness in captive monkeys, 383  
 Adenovirus type 14, histological study of its development in cell cultures, 99  
 Analysis of a simple micro-titration immune cytolytic test, 369  
 Antarctic communities, staphylococci in noses and streptococci in throats of, 105  
 Antibacterial, antifungal and antiprotozoal agents, the effect of on various strains of *Mycoplasma*, 1  
 Antibody response of rabbits to inactivated vaccinia virus, 525  
 Aseptic meningitis, a probable association with echovirus 14 infection, 277
- Bacteriology of tropical pyomyositis in Uganda, 517
- Caribbean, nutrition in the, 137  
 Cattle and their feedingstuffs, salmonellae in, 223  
 Children, respiratory infection in, at Edinburgh City Hospital, 187  
 Colds, experiments on the spread of, II, 327  
 Common cold, the epidemiology of, IV, 427  
 Complement-fixation test, estimating titres and their approximate standard errors in, 201  
 Coxsackievirus A21, studies with, in experiments on the spread of colds, 327  
 Cross-infection in dermatological wards, 59  
 Cytomegalovirus, the incidence of infection in a normal population, 79
- Dermatophyte lesions in the hedgehog as a reservoir of penicillin-resistant staphylococci, 293
- Echovirus 14 infection, two outbreaks of in Japan, 277  
 Enteric and cholera vaccination combined, given by the intradermal route, 345  
 Enteroviruses, susceptibility of the LLC-MK<sub>2</sub> line of monkey kidney cells to, 169  
 Enteroviruses and adenoviruses in the faeces of normal children, 441  
*Eperythrozoon coccoides* infection, elimination from mouse colonies, 73  
 Epidemiology of the common cold. IV. The effect of weather, 427  
 Estimating titres and their approximate standard errors in complement fixation tests, 201  
 Evolutionary changes in myxoma virus in Britain, 175
- Faeces of normal children, enteroviruses and adenoviruses in, 441  
 Faeces, routine examination of using Rappaport's medium, 491  
 Foot-and-mouth disease virus. Isolation of variants during passage in partly immunized cattle, 357
- Gummed paper, the transmission of bacteria and viruses on, 411
- Hedgehog, dermatophyte lesions in, as a reservoir of penicillin-resistant staphylococci, 293  
 Hedgehog, *Staphylococcus aureus* strains associated with the, 285  
 Histological study of adenovirus type 14 development in cell cultures, 99  
 Hospital infections and hospital hygiene at Malmö General Hospital: 1. The incidence of staphylococcal infections during three years, 25; 2. Hygienic measures and their correlation with the incidence of infection, 35  
 Houseflies, wire mesh screening for the exclusion of, 305
- Immunization of guinea-pigs against tetanus. The influence of mineral carriers, 243  
 Immunization of mice, calves and pigs against *Salmonella dublin* and *Salmonella cholerae-suis* infections, 117  
 Incidence of infection with cytomegalovirus in a normal population, 79  
 Infections acquired in medical wards, 457  
 Influenza A viruses, serological epidemiological studies with, 479  
 Intradermal vaccination against enteric and cholera combined, 345

- Langat virus infections of sheep and monkeys, giving cross-protection against other viruses of the Russian spring-summer complex, 213
- Medical wards, infections acquired in, 457
- Mice, control of ringworm carriage in, 507
- Mice, suspected resistance to warfarin in, 417
- Micro-titration immune cytolytic test, description and analysis of, 369
- Mineral carriers, their influence on the simultaneous active and passive immunization of guinea-pigs against tetanus, 243
- Monkey kidney cells, susceptibility of the LLC-MK<sub>2</sub> line to human enteroviruses, 169
- Mouse colonies, elimination of *Eperythrozoon coccoides* infection, 73
- Mycoplasma*, effect of antibacterial, antifungal and antiprotozoal agents on, 1
- Myxoma virus in Britain, evolutionary changes in, 175
- Neutralizing activity of antisera, a comparison of the plaque and quantal method for assaying, 311
- Nutrition in the Caribbean, 137
- Pathogenesis of rinderpest in experimental cattle. III, 263; IV, 497
- Photodynamic inactivation of vaccinia virus and its effect on immunogenicity, 395
- Plaque and quantal methods for assaying the neutralizing activity of antisera to type 1 poliovirus, a comparison of, 311
- Poliovirus vaccine, a possible interference with in echovirus 14 infection, 277
- Rappaport's magnesium chloride/malachite green medium in the routine examination of faeces, 491
- Respiratory infections by viruses in a general community, 155
- Respiratory infection in children, Edinburgh City Hospital, 187
- Rinderpest, studies on the pathogenesis of in experimental cattle. III, 263; IV, 497
- Ringworm carriage and its control in mice, 507
- Russian spring-summer complex, cross-protection against viruses of by infection of sheep and monkeys with Langat virus, 213
- Salmonella dublin* and *Salmonella cholerae-suis* infections, the immunization of mice, calves and pigs against, 117
- Salmonellae in cattle and their feedingstuffs, and the relation to human infection, 223
- Serological epidemiological studies with influenza A viruses, 479
- Staphylococcal infections during three years at Malmö General Hospital, 25
- Staphylococci in noses and streptococci in throats of isolated and semi-isolated Antarctic communities, 105
- Staphylococci, penicillin-resistant strains of in dermatophyte lesions of the hedgehog, 293
- Staphylococcus aureus* strains associated with the hedgehog, *Erinaceus europaeus*, 285
- Susceptibility of the LLC-MK<sub>2</sub> line of monkey kidney cells to human enteroviruses, 169
- Tetanus, the influence of mineral carriers on the simultaneous active and passive immunization against, 243
- Toxoplasma skin- and dye-test surveys of severely subnormal patients in Lincolnshire, 89
- Toxoplasmosis and Tristan da Cunha, 389
- Transmission of bacteria and viruses on gummed paper, 411
- Tropical pyomyositis in Uganda, 517
- Typhoid outbreak in Zermatt in 1963, 537
- Vaccinia virus, photodynamic inactivation of, 395
- Vaccinia virus, inactivated, the antibody response of rabbits to, 525
- Variants isolated during passage of a strain of foot-and-mouth disease virus in partly immunized cattle, 357
- Variola minor, clinical and subclinical, in a ward outbreak, 49

- Viruses: Adeno, 99, 383, 441; Coxsackie, 327; Cytomegalo, 79; Echo, 277; Entero, 169, 441; Foot-and-Mouth disease, 357; Influenza, 479; Langat, 213; Myxoma, 175; Polio, 277, 311; Respiratory, 155, 187; Rinderpest, 263, 497; Russian spring-summer, 213; Vaccinia, 395, 525; Variola minor, 49
- Viruses in acute respiratory infection in a general community, 155
- Ward outbreak of clinical and subclinical variola minor, 49*
- Warfarin resistant house mice, toxicity tests on, 417
- Weather, the effect of in the epidemiology of the common cold, 427
- Wire mesh screening for the exclusion of houseflies, 305
- Zermatt typhoid outbreak in 1963, 537
