

## SUBSCRIPTION RATES

Subscription rates (post free) for volume 40 (2003) of the *Journal of Applied Probability* are as follows:

US\$223.00; \$A413.00; £145.50 for libraries and institutions;

US\$74.25; \$A137.75; £48.50 for individuals belonging to a recognised scientific society.

Members of the London Mathematical Society should apply direct to the Secretary of the Society for copies of the *Journal*.

Please send all enquiries to: Applied Probability, School of Mathematics and Statistics, University of Sheffield, Sheffield S3 7RH, UK.

We can provide back issue prices on application. Cheques, money orders, etc. should be made out to APPLIED PROBABILITY. Payment is accepted in US, UK or Australian currency or by VISA or Mastercard (phone: +44 114 222 3922; fax: +44 114 272 9782).

## NOTES FOR CONTRIBUTORS

Papers published in the *Journal* are of two kinds:

(1) *research papers* not exceeding 20 printed pages;

(2) *short communications* of a few printed pages in the nature of notes or brief accounts of work in progress.

*Review papers, longer research papers and letters to the editor* are published in *Advances in Applied Probability*, a companion journal. (Note: Letters relating specifically to papers which have appeared in the *Journal of Applied Probability* will continue to appear in the *Journal*.)

The editors may publish accepted papers in either journal, according to the space available, in order to meet the 15-month deadline in publication referred to below.

### Submission of papers

Papers submitted to the Applied Probability journals are considered on the understanding that they have not been published previously and are not under consideration by another publication. Papers will not be reprinted without the written permission of the Trust. It is the policy not to accept for publication papers which cannot appear in print within 15 months of the date of receipt of the final version. Fifty reprints of each paper will be provided free; additional reprints are available at cost.

Papers should be written in English or French; papers in other languages may be accepted by the editors, but will appear (subject to the author's agreement) in English or French translation. Please supply *three* double-spaced hard copies, at least one of which should be printed on one side of the paper only. The paper should include: (1) a short abstract of approximately 4–10 lines giving a non-mathematical description of the subject matter and results; (2) list of keywords detailing the contents for the purpose of computerised information retrieval; (3) primary and secondary classifications according to the 2000 Mathematics Subject Classification.

Authors are advised to consult *The Author's Guide to the Applied Probability Journals* when preparing papers for submission. A copy of this guide may be obtained free of charge from the Applied Probability Office. An updated version of the guide, with LATEX style files, can be obtained in electronic form on <http://www.appliedprobability.org> or on PC-compatible disk from the Applied Probability Office. For instructions on how papers may be submitted electronically, please consult the notes for contributors at the above URL.

For efficiency in processing, authors are requested to send all submissions to the Applied Probability Office in Sheffield, rather than to individual editors. The address for all submissions is:

**Executive Editor, Applied Probability, School of Mathematics and Statistics,  
University of Sheffield, Sheffield S3 7RH, UK.**

## COPYRIGHT

The copyright of all published papers is vested in the Trust. When a paper is accepted for publication, the Trust asks the author(s) to assign copyright to the Trust by signing a form in which the terms of copyright are listed. Failure to do this promptly may delay or prevent publication.

Authorisation to photocopy items for internal or personal use, or the internal or personal use of specific clients, is granted by the Applied Probability Trust for libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the base fee of \$00.70 per copy, plus .20 per page is paid directly to CCC, 222 Rosewood Drive, Danvers, MA 01923, USA (<http://www.copyright.com>). 0021-9002/03 \$00.70 + .20.

*Research Papers*

- 839 SERIK SAGITOV. Convergence to the coalescent with simultaneous multiple mergers
- 855 MICHAEL SCHRÖDER. Brownian excursions and Parisian barrier options: a note
- 865 ARUPBOSE, SREELAGANGOPADHYAY, ANISH SARKAR AND ARINDAM SENGUPTA. Convergence of lower records and infinite divisibility
- 881 VALERI T. STEFANOV. The intersite distances between pattern occurrences in strings generated by general discrete- and continuous-time models: an algorithmic approach
- 893 PER HÖRFELT. Geometric bounds on certain sublinear functionals of geometric Brownian motion
- 906 YOURI DAVYDOV AND RIČARDAS ZITIKIS. Generalized Lorenz curves and convexifications of stochastic processes
- 926 DAVAR KHOSHNEVISAN AND THOMAS M. LEWIS. Optimal reward on a sparse tree with random edge weights
- 946 PETER CAITHAMER. Large and small deviations of a string driven by a two-parameter Gaussian noise white in time
- 961 ERIC FONTENAS AND OLIVIER FRANÇOIS. Improved bounds for the large-time behaviour of simulated annealing
- 970 A. YU. MITROPHANOV. Stability and exponential convergence of continuous-time Markov chains
- 980 JOHANNES MÜLLER AND MARTIN MÖHLE. Family trees on continuous-time birth-and-death processes
- 995 M. GONZÁLEZ, M. MOLINA AND I. DEL PUERTO. On the geometric growth in controlled branching processes with random control function
- 1007 CHRISTINE REDER. Transient behaviour of a Galton–Watson process with a large number of types
- 1031 LAM YEH. An inspection–repair–replacement model for a deteriorating system with unobservable state
- 1043 HAIJUN LI AND MOSHE SHAKED. Imperfect repair models with preventive maintenance
- 1060 VALERIE GIRARDIN AND NIKOLAOS LIMNIOS. On the entropy for semi-Markov processes
- 1069 ARTURO KOHATSU-HIGA AND MARKOTO YAMAZATO. On moments and tail behaviors of storage processes
- 1087 QI-MING HE. The classification of matrix GI/M/1-type Markov chains with a tree structure and its applications to queueing
- 1103 ANTONIS ECONOMOU. On the stochastic domination for batch-arrival, batch-service and assemble-transfer queueing networks
- 1121 JOHN T. CHEN. A lower bound using Hamilton-type circuits and its applications
- 1133 CHUNSHENG MA. Long-memory continuous-time correlation models

*Short Communications*

- 1147 AIKO KURUSHIMA AND KATSUNORI ANO. A note on the full-information Poisson arrival selection problem
- 1155 E. D. ANDJEL. Stochastic order for invariant measures of the contact process
- 1158 Index
