One hospital One antiseptic Four applicators Chloraprep®

Chlorhexidine Gluconate (CHG) 2% w/v & Isopropyl Alcohol (IPA) 70% v/v

- **Fast** – Apply for 30 seconds, dry for 30 seconds
- **Long-lasting** – Persistent up to 48 hours
- **Effective** – 2% chlorhexidine is preferred by the CDC*
- **Easy to use** – one-step, back and forth application
- **Durable** – works in the presence of blood and organic matter
- **Clear solution** – allows for unobstructed site visualization

* See "Guidelines for the Prevention of Intravascular Catheter-Related Infections," MMWR 2002

Available in cartons of single-use sterile applicators
