INDEX FOR VOLUME 169

	PAGE
<b>Antolín-Camarena, O., Gritschacher, S.P. &amp; Villarreal, B.</b> Classifying spaces for commutativity of low-dimensional Lie groups . . . . .	433
<b>Baader, S. &amp; Kjúchukova, A.</b> Symmetric quotients of knot groups and a filtration of the Gordian graph . . . . .	141
<b>Belk, J., Bleak, C. &amp; Matucci, F.</b> Embedding right-angled Artin groups into Brin-Thompson groups . . . . .	225
<b>Caprace, P.-E., Kropholler, P.H., Reid, C.D. &amp; Wesolek, P.</b> On the residual and profinite closures of commensurated subgroups . . . . .	411
<b>Davison, B., Ongaro, J. &amp; Szendrői, B.</b> Enumerating coloured partitions in 2 and 3 dimensions . . . . .	479
<b>Devin, L.</b> Chebyshev’s bias for analytic $L$ -functions . . . . .	103
<b>Díaz, L.J., Gelfert, K. &amp; Santiago, B.</b> Weak* and entropy approximation of nonhyperbolic measures: a geometrical approach . . . . .	507
<b>Erlandsson, V. &amp; Parlier, H.</b> Short closed geodesics with self-intersections . . . . .	623
<b>de la Bretèche, R. &amp; Fiorilli, D.</b> Entiers friables dans des progressions arithmétiques de grand module . . . . .	75
<b>Fox, J., Sah, A., Sawhney, M., Stoner, D. &amp; Zhao, Y.</b> Triforce and corners . . . . .	209
<b>Françoise, J.-P., Gavrilov, L. &amp; Xiao, D.</b> Hilbert’s 16th problem on a period annulus and Nash space of arcs . . . . .	377
<b>Gadre, V. &amp; Maher, J.</b> Recurrence of quadratic differentials for harmonic measure . . . . .	299
<b>Goel, K., Verma, J.K. &amp; Mukundan, V.</b> Tight closure of powers of ideals and tight hilbert polynomials . . . . .	335
<b>González-Álvarez, D. &amp; Zibrowius, M.</b> Open manifolds with non-homeomorphic positively curved souls . . . . .	357
<b>Gylterud, H.R.</b> Multisets in type theory . . . . .	1
<b>Huang, J., Levitina, G. &amp; Sukochev, F.</b> $M$ -embedded symmetric operator spaces and the derivation problem . . . . .	607
<b>Hubard, A. &amp; Karasev, R.</b> Bisecting measures with hyperplane arrangements . . . . .	639
<b>Hubert, P. &amp; Matheus Santos, C.</b> An origami of genus 3 with arithmetic Kontsevich–Zorich monodromy . . . . .	19
<b>Huggett, S. &amp; Moffatt, I.</b> Types of embedded graphs and their Tutte polynomials . . . . .	255
<b>Lumsdaine, P.L. &amp; Shulman, M.</b> Semantics of higher inductive types . . . . .	159
<b>Mangerel, A.P.</b> On the bivariate Erdős–Kac theorem and correlations of the Möbius function . . . . .	547
<b>Nenadov, R., Sudakov, B. &amp; Tyomkyn, M.</b> Proof of the Brown–Erdős–Sós conjecture in groups . . . . .	323
<b>Oliveira e Silva, D. &amp; Quilodrán, R.</b> A comparison principle for convolution measures with applications . . . . .	307
<b>Peyerimhoff, N. &amp; Samiou, E.</b> A support theorem for the X-ray transform on manifolds with plane covers . . . . .	149
<b>Pirashvili, I.</b> Topos points of quasi-coherent sheaves over monoid schemes . . . . .	31
<b>Wildon, M.</b> The multistep homology of the simplex and representations of symmetric groups . . . . .	231

# INSTRUCTIONS TO AUTHORS

## 1. Preparation of Manuscripts

A paper should be submitted electronically to [mpeditor@hermes.cam.ac.uk](mailto:mpeditor@hermes.cam.ac.uk) in pdf form only. Authors are encouraged to prepare their manuscripts in LaTeX 2 $\epsilon$  using the PSP class file. The class file, together with a guide, `PSP2egui.tex`, and sample pages, `PSP2esam.tex`, can be downloaded from <ftp://ftp.cambridge.org/pub/texarchive/journals/latex/pspscls> in either packed or unpacked form. These files will be updated periodically: please ensure that you have the latest version.

A cover page should give the title, the author's name and institution, with the address to which mail should be sent.

The title, while brief, must be informative (e.g. *A new proof of the prime-number theorem*, whereas, *Some applications of a theorem of G. H. Hardy* would be useless).

Authors are asked to provide an abstract as a basis for search on the Web. This may be an explicit abstract at the start of the paper. Otherwise the first paragraph or two should form a summary of the main theme of the paper, providing an abstract intelligible to mathematicians. Please note that the abstract should be able to be read independently of the main text. References should therefore not be included in the abstract.

Authors are encouraged to check that where references are given, they are used in the text. Experience has shown that unused references have a habit of surviving into the final version of the manuscript.

For a typescript to be accepted for publication, it must accord with the standard requirements of publishers, and be presented in a form in which the author's intentions regarding symbols etc. are clear to a printer (who is not a mathematician). Please also check the Cambridge University Press website for information about the style in which the paper should be submitted.

## 2. Notation

Notation should be chosen carefully so that mathematical operations are expressed with all possible neatness, to lighten the task of the compositor and to reduce the chance of error. For instance  $n$  sub  $k$  is common usage, but avoid if possible using  $c$  sub  $n$  sub  $k$ . Fractions are generally best expressed by a solidus. Complicated exponentials like:

$$\exp\{z^2 \sin \theta / (1 + y^2)\}$$

should be shown in this and no other way.

It helps if displayed equations or statements which will be quoted later are numbered in order on the right of their line. They can then be referred to by, for example 'from (7)'.  
The author must enable the printer (if necessary by pencilled notes in the margin) to distinguish between similar symbols such as  $o$ ,  $O$ ,  $o$ ,  $O$ ,  $0$ ;  $x$ ,  $X$ ,  $\times$ ;  $\phi$ ,  $\Phi$ ,  $\emptyset$ ;  $l$ ,  $1$ ;  $\epsilon$ ,  $k$ ,  $\kappa$ ,  $k$ .

Footnotes should be avoided.

Please use typewriter font for all addresses and email addresses.

Omit \* from the end of proofs.

In listing assertions, conclusions, etc. do not use a vertical column of dots and do not follow (a) or (i) by a capital letter (eg. (i) the absolute value . . .)

In making references precise use [3, theorem 5.1]

## 3. Diagrams

Diagrams should be in black ink or from a high-quality laser printer and should not be larger than 30 cm by 45 cm. Lettering to be inserted by the printer should be shown clearly on copies of the figures rather than on the original drawings. Please note that a charge may be made if hand-drawn diagrams need to be re-drawn for publication.

Figure 1 here

A typed list of captions may be provided at the end of the manuscript in the following format:

Figure 1. *A basis for . . .*

Note that there is no point at the end of the heading. All headings should be centred.

## 4. Tables

Tables should be numbered (above the table) and set out on separate sheets. Indicate the position of each in the text as for figures:

Table 3 here

Heading for tables should be shown in the following way:

Table 1. *A basis for . . .*

Note that there is no point at the end of the heading. All headings should be centred over columns.

## 5. References

References should be collected at the end of the paper numbered in alphabetical order of the authors' names. Where references are given, they should be used in the text. Titles of journals should be abbreviated as in *Mathematical Reviews*. The following examples show the preferred style for references to a paper in a journal, a paper in a proceedings volume, a book and an unpublished dissertation:

- [1] J. F. ADAMS. On the non-existence of elements of Hopf invariant one. *Ann of Math.* (2) **72** (1960), 20-104.
- [2] M. P. FOURAM and D. S. SCOTT. Sheaves and logic. *In Applications of Sheaves* Lecture Notes in Math. vol. 753 (Springer-Verlag, 1979), pp. 302-401.
- [3] P. T. JOHNSTONE. *Stone Spaces*. Cambridge Studies in Advanced Math. no. 3 (Cambridge University Press, 1982).
- [4] F. W. LAWVERE. Functional semantics of algebraic theories. PhD. thesis. Columbia University (1963).

## 6. Submission of papers accepted for publication

When a paper has been accepted for publication the relevant TeX files of the final version, accompanied by a pdf file, should be sent to the Editor by e-mail.

This journal issue has been printed on FSC-certified paper and cover board. FSC is an independent, non-governmental, not-for-profit organization established to promote the responsible management of the world's forests. Please see [www.fsc.org](http://www.fsc.org) for information.
