## PARTIAL LIABILITY —CORRIGENDUM

Alex Kaiserman

<https://doi.org/10.1017/S1352325217000040>, published by Cambridge University Press, 31 July 2017

At the top of page 7 of the article by Kaiserman in the March 2017 issue of *Legal Theory*, two equations are reversed. The sentence containing these equations should read as follows:

Suppose for the sake of argument that  $P(c \mid d \wedge b) = 0.9$  and  $P(c \mid r \wedge b) = 0.2$ ; then it follows from CAUSAL CONTRIBUTION that  $f(D, [R, D] \rightarrow C)^b \approx 0.82$  and  $f(R, [R, D] \rightarrow C)^b \approx 0.18$ .
