

INSTRUCTIONS FOR CONTRIBUTORS

SUBMISSION OF MANUSCRIPTS

Manuscripts should be submitted online via our manuscript submission and tracking site, <http://www.editorialmanager.com/psm/>. Full instructions for electronic submission are available directly from this site. To facilitate rapid reviewing, communications for peer review will be electronic and authors will need to supply a current e-mail address when registering to use the system.

Papers for publication from Europe (except those on genetic topics, irrespective of country), and all papers on imaging topics, should be submitted to the UK Office.

Papers from the Americas, Asia, Africa, Australasia and the Middle East (except those dealing with imaging topics), and all papers dealing with genetic topics, irrespective of country, should be sent to US Office.

Generally papers should not have text more than 4500 words in length (excluding these sections) and should not have more than a combined total of 5 tables and/or figures. Papers shorter than these limits are encouraged. For papers of unusual importance the editors may waive these requirements. A structured abstract of no more than 250 words should be given at the beginning of the article using the headings: Background; Methods; Results; Conclusions. The name of an author to whom correspondence should be sent must be indicated and a full postal address given in the footnote. Any acknowledgements should be placed at the end of the text (before the References section).

Declaration of Interest: A statement must be provided in the acknowledgements listing all financial support received for the work and, for all authors, any financial involvement (including employment, fees, share ownership) or affiliation with any organization whose financial interests may be affected by material in the manuscript, or which might potentially bias it. This applies to all papers including editorials and letters to the editor.

Contributors should also note the following:

1. S.I. units should be used throughout in text, figures and tables.
2. Authors should spell out in full any abbreviations used in their manuscripts.
3. Foreign quotations and phrases should be followed by a translation.
4. If necessary, guidelines for statistical presentation may be found in: **Altman DG, Gore SM, Gardner MJ & Pocock SJ** (1983). Statistical guidelines for contributors to medical journals. *British Medical Journal* **286**, 1489–1493.

REFERENCES (1) The Harvard (author-date) system should be used in the text and a complete list of References cited given at the end of the article. In a text citation of a work by more than two authors cite the first author's name followed by et al. (but the names of all of the authors should be given in the References section). Where several references are cited together they should be listed in rising date order. (2) The References section should be supplied in alphabetical order (authors' names in **bold**, journal titles in full), following the text. Some examples follow:

Miller PM, Byrne M, Hodges A, Lawrie SM, Johnstone EC (2002). Childhood behaviour, psychotic symptoms and psychosis onset in young people at high risk of schizophrenia: early findings from the Edinburgh high risk study. *Psychological Medicine* **32**, 173–179.

Cleckley HJ (1941). *The Mask of Sanity*, 2nd edn. Mosby: St. Louis, MO.

Brewer WJ, Wood SJ, DeLuca C, Pantelis C (2006). Models of olfaction for exploring neurodevelopment. In *Olfaction and the Brain* (ed. W. J. Brewer, D. Castle and C. Pantelis), pp. 97–121. Cambridge University Press: Cambridge.

(3) Online citations

doi (when published online prior to printed issue)

Lauritsen MB, Pedersen CB, Mortensen CB (2004). The incidence and prevalence of pervasive developmental disorders: a Danish population-based study. *Psychological Medicine*. Published online: 21 October 2004. doi:10.1017/S0033291704002387.

URL

[Authors are requested to print-out and keep a copy of any online-only material, in case the URL changes or is no longer maintained.]

FIGURES AND TABLES Only essential figures and tables should be included. Further tables, figures, photographs and appendices, may be included with the online version on the journal website. To ensure that your figures are reproduced to the highest possible standards, Cambridge Journals recommends the following formats and resolutions for supplying electronic figures. Please ensure that your figures are saved at final publication size and are in our recommended file formats. Following these guidelines will result in high quality images being reproduced in both the print and the online versions of the journal. **Line artwork:** Format: tif or eps, Colour mode: black and white (also known as 1-bit), Resolution: 1200 dpi; **Combination artwork (line/tone):** Format: tif or eps, Colour mode: grayscale (also known as 8-bit), Resolution: 800 dpi; **Black and white halftone artwork:** Format: tif, Colour mode: grayscale (also known as 8-bit), Resolution: 300 dpi; **Colour halftone artwork:** Format: tif, Colour mode: CMYK colour, Resolution: 300 dpi. All photographs, graphs, and diagrams should be referred to as figures and should be numbered consecutively in Arabic numerals. Captions for figures should be typed double-spaced on separate sheets. *Tables* Tables should be numbered consecutively in the text in Arabic numerals and each typed on a separate sheet after the References section. Titles should be typed above the table.

PROOFS AND OFFPRINTS Page proofs will be sent to the author designated to receive correspondence. corrections other than to printer's errors may be charged to the author. The corresponding author of each paper will receive a PDF file of their article and hard copy offprints may be purchased if they are ordered on the form supplied when the proof is returned.

Increased serotonin transporter gene (*SERT*) DNA methylation is associated with bullying victimization and blunted cortisol response to stress in childhood: a longitudinal study of discordant monozygotic twins
Ouellet-Morin I, Wong CCY, Danese A, Pariante CM, Papadopoulos AS, Mill J & Arseneault L 1813

Resting-state functional connectivity in adults with childhood emotional maltreatment
van der Werf SJA, Pannekoek JN, Veer IM, van Tol M-J, Aleman A, Veltman DJ, Zitman FG, Rombouts SARB, Elzinga BM & van der Wee NJA 1825

Course of post-traumatic stress disorder following war in the Balkans: 1-year follow-up study
Priebe S, Gavrilovic J, Bremner S, Ajdukovic D, Franciskovic T, Neri G, Kucukalic A, Lecic-Tosevski D, Morina N, Popovski M, Schützwohl M, Bogic M & Matanov A 1837

Cannabis use as an indicator of risk for mental health problems in adolescents: a population-based study at secondary schools
van Gastel WA, Tempelaar W, Bun C, Schbart CD, Kahn RS, Plevier C & Boks MPM 1849

Alcohol consumption in men is influenced by qualitatively different genetic factors in adolescence and adulthood
Edwards AC & Kendler KS 1857

A whole-of-population study of the prevalence and patterns of criminal offending in people with schizophrenia and other mental illness
Morgan VA, Morgan F, Valuri G, Ferrante A, Castle D & Jablensky A 1869

Impacts of duration of untreated psychosis on cognition and negative symptoms in first-episode schizophrenia: a 3-year prospective follow-up study
Chang WC, Hui CLM, Tang JYM, Wong GHY, Chan SKW, Lee EHM & Chen EYH 1883

Symptom-specific self-referential cognitive processes in bipolar disorder: a longitudinal analysis
Pavlickova H, Varese F, Turnbull O, Scott J, Morriss R, Kinderman P, Paykel E & Bentall RP 1895

Behavioral activation system moderates self-referent processing following recovery from depression
Kircanski K, Mazur H & Gotlib IH 1909

Decreased functional connectivity between the amygdala and the left ventral prefrontal cortex in treatment-naive patients with major depressive disorder: a resting-state functional magnetic resonance imaging study
Tang Y, Kong L, Wu F, Womer F, Jiang W, Cao Y, Ren L, Wang J, Fan G, Blumberg HP, Xu K & Wang F 1921

Predicting onset of major depression in general practice attendees in Europe: extending the application of the predictD risk algorithm from 12 to 24 months
King M, Bottomley C, Bellón-Saameño J, Torres-Gonzalez F, Švab I, Rotar D, Xavier M & Nazareth I 1929

Common mental disorder diagnosis and need for treatment are not the same: findings from a population-based longitudinal survey
Sareen J, Henriksen CA, Stein MB, Affi TO, Lix LM & Enns MW 1941

Facial emotion recognition in borderline personality disorder
Daros AR, Zakzanis KK & Ruocco AC 1953

Estimating the heritability of reporting stressful life events captured by common genetic variants
Power RA, Wingenbach T, Cohen-Woods S, Uher R, Ng MY, Butler AW, Ising M, Craddock N, Owen MJ, Korszun A, Jones L, Jones I, Gill M, Rice JP, Maier W, Zobel A, Mors O, Placentino A, Rietschel M, Lucae S, Holsboer F, Binder EB, Keers R, Tozzi F, Muglia P, Breen G, Craig IW, Müller-Myhsok B, Kennedy JL, Strauss J, Vincent JB, Lewis CM, Farmer AE & McGuffin P 1965

Different heritabilities but shared etiological influences for parent, teacher and self-ratings of ADHD symptoms: an adolescent twin study
Merwood A, Greven CU, Price TS, Rijdsdijk F, Kuntsi J, McLoughlin G, Larsson H & Asherson PJ 1973

Attentional switching forms a genetic link between attention problems and autistic traits in adults
Polderman TJC, Hoekstra RA, Vinkhuyzen AAE, Sullivan PF, van der Sluis S & Posthuma D 1985

Familiarity of neural preparation and response control in childhood attention deficit-hyperactivity disorder
Albrecht B, Brandeis D, Uebel H, Valko L, Heinrich H, Drechsler R, Heise A, Müller UC, Steinhausen H-C, Rothenberger A & Banaschewski T 1997
