CAMBRIDGE JOURNALS

European Journal of Applied Mathematics

Co-Editors-in-Chief
S. D. Howison, *University of Oxford, UK*
A. A. Lacey, *DPMMS, Heriot-Watt University, UK*
M. J. Ward, *University of British Columbia, Canada*

Since 2008 *EJAM* surveys have been expanded to cover Applied and Industrial Mathematics. Coverage of the journal has been strengthened in probabilistic applications, while still focusing on those areas of applied mathematics inspired by real-world applications, and at the same time fostering the development of theoretical methods with a broad range of applicability. Survey papers contain reviews of emerging areas of mathematics, either in core areas or with relevance to users in industry and other disciplines. Research papers may be in any area of applied mathematics, with special emphasis on new mathematical ideas, relevant to modelling and analysis in modern science and technology, and the development of interesting mathematical methods of wide applicability.

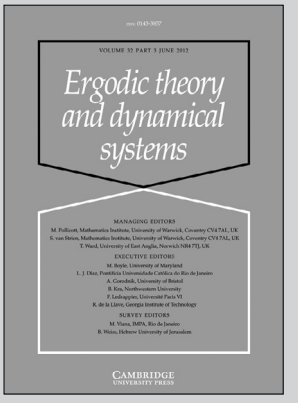
CAMBRIDGE JOURNALS

Ergodic Theory and Dynamical Systems

Managing Editors
Mark Pollicott, *University of Warwick, UK*
Thomas Ward, *University of East Anglia, UK*
Sebastian van Strien, *Imperial College, London, UK*



Ergodic Theory and Dynamical Systems focuses on a rich variety of research areas which, although diverse, employ as common themes global dynamical methods. The journal provides a focus for this important and flourishing area of mathematics and brings together many major contributions in the field. The journal acts as a forum for central problems of dynamical systems and of interactions of dynamical systems with areas such as differential geometry, number theory, operator algebras, celestial and statistical mechanics, and biology.

CAMBRIDGE JOURNALS

Glasgow Mathematical Journal

Published for
The Glasgow Mathematical Journal Trust

Editor-in-Chief
I. A. B. Strachan, *University of Glasgow, UK*

Glasgow Mathematical Journal publishes original research papers in any branch of pure and applied mathematics. An international journal, its policy is to feature a wide variety of research areas, which in recent issues have included ring theory, group theory, functional analysis, combinatorics, differential equations, differential geometry, number theory, algebraic topology, and the application of such methods in applied mathematics.

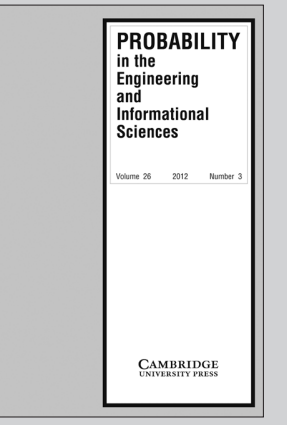
CAMBRIDGE JOURNALS

Probability in the Engineering and Informational Sciences

Editor
Sheldon M. Ross, *University of Southern California, USA*



The primary focus of the journal is on stochastic modelling in the physical and engineering sciences, with particular emphasis on queueing theory, reliability theory, inventory theory, simulation, mathematical finance and probabilistic networks and graphs. Papers on analytic properties and related disciplines are also considered, as well as more general papers on applied and computational probability, if appropriate. Readers include academics working in statistics, operations research, computer science, engineering, management science and physical sciences as well as industrial practitioners engaged in telecommunications, computer science, financial engineering, operations research and management science.

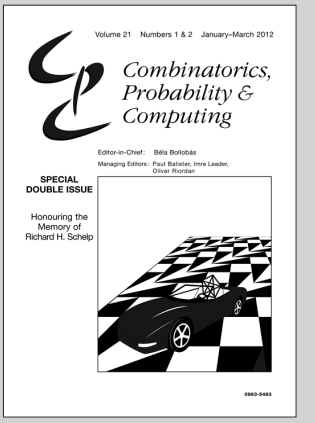
CAMBRIDGE JOURNALS

Combinatorics, Probability & Computing

Editor-in-Chief
Béla Bollobás, *DPMMS, Cambridge, UK; University of Memphis, USA*



Published bimonthly, *Combinatorics, Probability & Computing* is devoted to the three areas of combinatorics, probability theory and theoretical computer science. Topics covered include classical and algebraic graph theory, extremal set theory, matroid theory, probabilistic methods and random combinatorial structures; combinatorial probability and limit theorems for random combinatorial structures; the theory of algorithms (including complexity theory), randomised algorithms, probabilistic analysis of algorithms, computational learning theory and optimisation.

1 Sinking inside the box
D. Pritchard

5 Growth and dissipation of wind-forced, deep-water waves
L. Grare, W. L. Peirson, H. Branger, J. W. Walker, J.-P. Giovanangeli & V. Makin

51 Turbulent wake past a three-dimensional blunt body. Part 1. Global modes and bi-stability
M. Grandemange, M. Gohlke & O. Cadot

85 Transient fluid-combustion phenomena in a model scramjet
S. J. Laurence, S. Karl, J. Martinez Schramm & K. Hannemann

121 Rigid ring-shaped particles that align in simple shear flow
V. Singh, D. L. Koch & A. D. Stroock

159 Radial lift on a suspended finite-sized sphere due to fluid inertia for low-Reynolds-number flow through a cylinder
S. Bhattacharya, D. K. Gurung & S. Navardi

187 Response of a hypersonic turbulent boundary layer to favourable pressure gradients
N. R. Tichenor, R. A. Humble & R. D. W. Bowersox

214 Blood flow in small tubes: quantifying the transition to the non-continuum regime
H. Lei, D. A. Fedosov, B. Caswell & G. E. Karniadakis

240 Travelling convectons in binary fluid convection
I. Mercader, O. Batiste, A. Alonso & E. Knobloch

267 Turbulent drag reduction through rotating discs
P. Ricco & S. Hahn

291 Dynamics and stability of the wake behind tandem cylinders sliding along a wall
A. Rao, M. C. Thompson, T. Leweke & K. Hourigan

S 317 The importance of bubble deformability for strong drag reduction in bubbly turbulent Taylor–Couette flow
D. P. M. van Gils, D. Narezo Guzman, C. Sun & D. Lohse

348 Wavy liquid films in interaction with a confined laminar gas flow
G. F. Dietze & C. Ruyer-Quil

394 Electrokinetic flows about conducting drops
O. Schnitzer, I. Frankel & E. Yariv

424 Direct numerical simulation of a breaking inertia–gravity wave
S. Remmler, M. D. Fruman & S. Hickel

S 437 The trapping and release of bubbles from a linear pore
G. Dawson, S. Lee & A. Juel

461 Resonance theory of water waves in the long-wave limit
T. Kataoka

496 Lubrication theory for electro-osmotic flow in a slit microchannel with the Phan-Thien and Tanner model
O. Bautista, S. Sánchez, J. C. Arcos & F. Méndez

533 Receptivity of a high-speed boundary layer to temperature spottiness
A. V. Fedorov, A. A. Ryzhov, V. G. Soudakov & S. V. Utyuzhnikov

554 Invariant recurrent solutions embedded in a turbulent two-dimensional Kolmogorov flow
G. J. Chandler & R. R. Kerswell

596 Turbulent flow in the bulk of Rayleigh–Bénard convection: small-scale properties in a cubic cell
M. Kaczorowski & K.-Q. Xia

618 Stability and sensitivity analysis in a simplified solid rocket motor flow
G. Boyer, G. Casalis & J. L. Estivalèzes

S 645 Self-similar coalescence of clean foams
P. S. Stewart & S. H. Davis
