
PREPARATION OF MANUSCRIPTS
submitted for publication in
The Journal of the Australian Mathematical Society

Authors of articles submitted for publication in the *Journal* are particularly asked to ensure that their manuscripts are in a form appropriate for sending to the printer. The necessary preparation should be done by the author before the initial submission to the Editor. We set out below a brief statement of the main points we ask authors to observe. A fuller discussion of the problems of preparing mathematical manuscripts will be found in 'The printing of mathematics', by T. W. Chaundy, P. R. Barrett and Charles Batey (O.U.P.).

1. The author should keep a complete copy of the submitted article.
2. Manuscripts should be typed, on high quality quarto bond paper, with at least double spacing, and with a margin of at least one inch all around. If possible, a duplicate copy should accompany the submitted manuscript.
3. Do not supply a separate title page. Please adopt the form of heading in use in the *Journal*, leaving a space for insertion of the date of receipt. If the title is long, supply also a shortened form of title. If the author wishes to give acknowledgements of support and the like, these should be given in the body of the article, or by footnote attached to the name of the author. If the author supplies an initial abstract, it will usually be printed in small type. Affiliation is shown at the end of the article, not at the beginning.
4. The setting out of the manuscript should imitate as closely as possible the final printed page, particularly with regard to paragraphing and use and spacing of displayed formulae. The *Journal* places headings centrally, and equation numbers on the left.
5. The ordinary forms of grammar should be observed, both in the text and in the mathematics, including the displayed formulae. In particular, please ensure that the punctuation carries through the mathematics in the proper manner. Eschew abbreviations such as 'eqn', 'etc.', 'Thm', 'w.r.t.'. Spelling and use of hyphens should be consistent.
6. Authors are particularly asked to note the following points, and carefully to mark the manuscript accordingly.
 - a. Latin italics are indicated by a single underline, thus: a, A.
Latin symbols which are to be in italics should be indicated in this way at every appearance other than in displayed formulae (where italics are taken for granted).
Formal statements of lemmas and theorems are in italics, and should be so shown in the manuscript.
 - b. Explain clearly what symbols, if any, are to be set in script and fraktur (= German) founts, and what is required with any unusual symbols. This is best done by attaching to the manuscript a separate page, entitled 'Notes to the compositor', in which the author's conventions and requirements are fully and clearly set out, and by drawing attention to particular symbols at their first appearance in the manuscript.
 - c. References in the text to other articles listed at the end are by Roman numerals in square brackets. The preferred style for listing references at the end is shown by the following examples:
 - [1] E. A. Clarkson and Y. Midei, 'Weakly open translation-invariant functionals', *Ann. of Math.* (2) 42 (1941), 276—285.
 - [2] L. Grüşchen, 'Quasi-ergodic theorems', *J. Aust. Math. Soc.* 2 (1960), 2—3.
 - [3] I. N. Märchenmacher, *Introduction to cybernetics* (G.U.P., 2nd ed. 1962).

LECTURES ON TENSOR CALCULUS AND DIFFERENTIAL GEOMETRY*J. C. H. Gerretsen*

xii, 204 pp. 1962. Cloth Dfl. 27.50 / US \$ 7.60 / A. \$ 6.90

MATRIX MECHANICS / *H. S. Green*

With a foreword by Max Born

118 pp. 1965. Cloth Dfl. 19.75 / US \$ 5.50 / A. \$ 4.90

THE APPLICATION OF CONTINUED FRACTIONS AND THEIR GENERALIZATIONS TO PROBLEMS IN APPROXIMATION THEORY*A. N. Khovanskii*

Translated from the Russian by P. Wynn

212 pp. 1963. Cloth Dfl. 30.— / US \$ 8.40 / A. \$ 7.40

POSITIVE SOLUTIONS OF OPERATOR EQUATIONS / *M. A. Krasnoselskii*

Translated by R. E. Flaherty; edited by Leo F. Boron

381 pp. 1964. Cloth Dfl. 49.50 / US \$ 13.75 / A. \$ 12.40

**THE COLLECTED MATHEMATICAL WORKS OF
J. H. AND A. G. M. MICHELL**

Edited by F. W. Niedenfuhr and J. R. M. Radok. With a foreword by T. N. Cherry

340 pp. 1965. Cloth Dfl. 25.50 / US \$ 7.10 / A. \$ 6.40

DIFFERENTIAL AND INTEGRAL CALCULUS / *N. Piskunov*

Translated by G. Yankovsky

895 pp. 1965. Cloth Dfl. 35.— / US \$ 9.75 / A. \$ 8.75

MONGE-AMPERE EQUATIONS OF ELLIPTIC TYPE / *A. V. Pogorelov*

Translated by Leo F. Boron, a.o.

vii, 116 pp. 1965. Cloth Dfl. 17.50 / US \$ 4.90 / A. \$ 4.40

LECTURES ON THE FOUNDATIONS OF GEOMETRY

Translated from the Russian by Leo F. Boron, a.o.

Publication Spring 1966.

VECTOR SPACES / *D. A. Raikov*

Translated from the Russian by Leo F. Boron, a.o.

202 pp. 1965. Cloth Dfl. 27.50 / US \$ 7.60 / A. \$ 6.90

SECOND ORDER PARTIAL DIFFERENTIAL EQUATIONS / *M. M. Smirnov*

Translated by S. Chomet

Publication Summer 1966.

**COLLECTION OF PROBLEMS FOR PARTIAL DIFFERENTIAL
EQUATIONS IN MATHEMATICAL PHYSICS** / *M. M. Smirnov*

Translated by W. I. M. Wils

Publication Summer 1966.

HIGHER MATHEMATICS / *I. Suvorov*

Translated from the Russian by M. V. Oak; edited by G. Yankovsky

313 pp. 1965. Cloth Dfl. 19.75 / US \$ 5.50 / A. \$ 4.90

SCIENCE AWAKENING / *B. L. van der Waerden*

Translated from the Dutch by A. Dresden with additions of the Author.

2nd edition. 134 fig. 28 half-tone plates. 291 pp. 1961. Cloth Dfl. 29.75 / US \$ 8.75 / A. \$ 7.50
