The BULLETIN, the JOURNAL and the REVIEW OF SYMBOLIC LOGIC are the official organs of the Association for Symbolic Logic, an international organization for furthering research in logic and the exchange of ideas among mathematicians, computer scientists, linguists, and others interested in this field. The BULLETIN encourages submissions of *Articles* and *Communications* in all areas of logic, including mathematical or philosophical logic, logic in computer science or linguistics, the history or philosophy of logic, and applications of logic to other fields. It also encourages the submissions of abstracts for doctoral level theses in logic.The BULLETIN also publishes reviews of publications in logic.

Thesis abstracts editor
Sandra Müller sandra.mueller@tuwien.ac.at

Articles present topics of broad interest in a way that is accessible to a large audience. They can be purely expository, survey, or historical articles or they may contain, in addition, new ideas or results or new approaches to old ones.

Communications should be announcements of important new results and ideas in any aspect of logic; they may be short papers in their final form or preliminary announcements (extended abstracts, position papers) of longer, full papers that will be published elsewhere. In any case, they should include, in addition to a description of the new results or ideas, enough history, background, and explanation to make the significance of the work apparent to a wide audience. *Communications* will be quickly refereed and published within six months of the submission of final version.

To submit *Articles* or *Communications* please follow the procedure described at https://aslonline.org/journals/the-bulletin-of-symbolic-logic/the-bulletin-of-symbolic-logic-submission-guidelines.

To submit *Thesis Abstracts* please follow the procedure described at https://aslonline.org/journals/the-bulletin-of-symbolic-logic/logic-thesis-abstracts-in-the-bulletin-of-symbolic-logic.

Books for review in the BULLETIN should be sent to **ASL, Department of Mathematics, University of Connecticut, 341 Mansfield Road, U-1009, Storrs, CT 06269-1009, USA.**

TABLE OF CONTENTS

Articles

The universal theory of the hyperfinite II_1 factor is not computable
by Isaac Goldbring and Bradd Hart 181

Iterated priority arguments in descriptive set theory
by Adam Day, Noam Greenberg, Matthew Harrison-Trainor and Dan Turetsky 199

Categorical quantification
by Constantin C. Brîncuş 227

One-variable fragments of first-order logics
by Petr Cintula, George Metcalfe and Naomi Tokuda 253

Reviews

Compactness of ω_1 and strong axioms of determinacy
Reviewed by Takehiko Gappo 279

Christopher Pincock. *Mathematics and Explanation*. Elements in the Philosophy of Mathematics. Cambridge University Press, Cambridge, UK, 2023, 80 pp.
Reviewed by Daniele Molinini 282

Thesis Abstracts

Martina Iannella, *From real-life to very strong axioms. Classification problems in Descriptive Set Theory and regularity properties in Generalized Descriptive Set Theory*. Università degli studi di Udine, Udine, Italy. 2023. Supervised by Alberto Marcone and co-supervised by Vincenzo Dimonte 285

Vittorio Cipriani, *Many problems, different frameworks: classification of problems in computable analysis and algorithmic learning theory*. Università degli studi di Udine, Udine, Italy, 2023. Supervised by Alberto Marcone and co-supervised by Luca San Mauro 287

Nicholas Pischke. *Proof-Theoretical Aspects of Nonlinear and Set-Valued Analysis*. Technische Universität Darmstadt, Darmstadt, Germany. 2024. Supervised by Prof. Dr. Ulrich Kohlenbach 288

Meeting Reports

Proof Society Autumn School and Workshop 2022, Co-Sponsored by the Association for Symbolic Logic, Utrecht, The Netherlands, November 7–12, 2022 290

Workshop: Finite Model Theory and Many-Valued Logic: Challenges and Interactions, Co-Sponsored by the Association for Symbolic Logic, Brisbane, Australia (online), November 10–12, 2022 292
