

## AUTHOR INDEX FOR VOLUME 96

|  |     |
|--|-----|
| AGARWAL, R. P., MAHMOUD, R. R., O'REGAN, D. and SAKER, S. H.;<br>Some reverse dynamic inequalities on time scales                            | 445 |
| AIEMSOMBOON, L. and SINTUNAVARAT, W.; A note on the generalised<br>hyperstability of the general linear equation                             | 263 |
| ALFURAIIDAN, M. R. and KHAMSI, M. A.; Fibonacci–Mann iteration for<br>monotone asymptotically nonexpansive mappings                          | 307 |
| AMENTA, A. and TEUWEN, J.; $L^p$ – $L^q$ off-diagonal estimates for the Ornstein–<br>Uhlenbeck semigroup: some positive and negative results | 154 |
| AN HUEF, A.; see CLARK, L. O.  | 212 |
| AXLER, C.; A new upper bound for the sum of divisors function  | 374 |
| BRZDEK, J. and JABŁOŃSKA, E.; On extensions of the generalised Jensen<br>functions on semigroups   | 110 |
| CHEN, Q. and ZHAO, G.; A Schwarz lemma for $V$ -harmonic maps and their<br>applications  | 504 |
| CHEN, X. and LEWIS, M. L.; Itô's theorem and monomial Brauer characters  | 426 |
| CHEN, Y.-G.; see LI, Y.-L.   | 380 |
| CHEN, Y.-G.; see MA, M.-M.   | 30  |
| CHEN, Z.; Dynamics of mathematical models for bioreactors  | 519 |
| CLARK, L. O., AN HUEF, A. and LUITEN-APIRANA, P.; Subsets of vertices<br>give Morita equivalences of Leavitt path algebras                   | 212 |
| CORTES, W. and TAMUSIUNAS, T.; A characterisation for a groupoid Galois<br>extension using partial isomorphisms                              | 59  |
| DADASHI, V.; Shrinking projection algorithms for the split common null point<br>problem  | 299 |
| DANERS, D. and GLÜCK, J.; The role of domination and smoothing conditions<br>in the theory of eventually positive semigroups                 | 286 |
| DE LIMA, H. F.; see OLIVEIRA, A. M. S.   | 317 |
| DELIZIA, C., SHUMYATSKY, P. and TORTORA, A.; On groups with finite<br>conjugacy classes in a verbal subgroup                                 | 429 |
| DING, Y. and LI, J.; Lie $n$ -higher derivations and Lie $n$ -higher derivable<br>mappings   | 223 |
| DOLINKA, I.; Finite regular bands are finitely related – Retraction  | 352 |
| DUTRA, E. R. F.; On killers of cable knot groups   | 171 |
| EFIMOV, A., GAÁL, M. and RÉVÉSZ, SZ. GY.; On integral estimates of<br>nonnegative positive definite functions                                | 117 |
| EGROT, R.; Closure operators, frames and neatest representations   | 361 |
| FERRADA-SALAS, A., HERNÁNDEZ, R. and MARTÍN, M. J.; On convex<br>combinations of convex harmonic mappings                                    | 256 |
| FURTADO, M. F. and ZANATA, H. R.; Multiple solutions for a Kirchhoff<br>equation with nonlinearity having arbitrary growth                   | 98  |
| GAÁL, M.; see EFIMOV, A.   | 117 |

| ZHAO, G.; see CHEN, Q.   | 504 |
| ZHU, J.; see LIU, H.   | 353 |

## INFORMATION FOR AUTHORS

The *Bulletin of the Australian Mathematical Society* aims at quick publication of original research in all branches of mathematics. To ensure speedy publication, only articles which are sufficiently well presented, able to be published without revision, and which are judged by the Editor (often in consultation with an Associate Editor) to be competitive are refereed. This policy is in the interests of authors, as a quick rejection is better than a slow rejection. The *Bulletin* receives more than five times the material that can be published, therefore there are many commendable papers not accepted. Editorial decisions on acceptance or otherwise are taken quickly, normally within a month of receipt of the paper. Papers are accepted only after peer review.

Manuscripts are accepted for review with the understanding that the same work is not concurrently submitted elsewhere. For a paper to be acceptable for publication, not only should it contain new and interesting results, but also

- (i) the exposition should be clear and attractive, and
- (ii) the manuscript should be in publishable form, without revision.

Further information regarding these requirements may be found through our website [www.austms.org.au/Bulletin](http://www.austms.org.au/Bulletin). Authors are asked to avoid, as far as possible, the use of mathematical symbols in the title.

Articles should be prepared in  $\LaTeX$  using  $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\LaTeX$  packages and submitted as a PDF file via our journal management system, at [www.austms.org.au/Publications/Submissions/BAustMS](http://www.austms.org.au/Publications/Submissions/BAustMS). This permits authors to track their papers through the editorial process. Recent versions of  $\TeX$  are able to produce PDF files directly. A  $\LaTeX$  class file for the *Bulletin* can be downloaded from the website. Authors who need assistance may email the secretary of the *Bulletin* at [editor@bulletin.austms.org.au](mailto:editor@bulletin.austms.org.au).

Authors are advised to keep copies of all files of the submitted article; the *Bulletin* will not accept responsibility for any loss.

## EDITORIAL POLICY

**1. References.** Arrange references alphabetically (by surname of the first author) and cite them numerically in the text. Ensure the accuracy of the references: authors' names should appear as in the work quoted. Include in the list of references only those works cited, and avoid citing works which are in preparation or submitted. Where the work cited is not readily accessible (for example, a preprint) a copy of the article should be included with your submission.

### 2. Abstracts.

1. Each paper must include an abstract of not more than 150 words, which should contain a brief but informative summary of the contents of the paper, but no inessential details.
2. The abstract should be self-contained, but may refer to the title.
3. Specific references (by number) to a section, proposition, equation or bibliographical item should be avoided.

**3. Subject Classification and Key Words.** Authors should include a few key words and phrases and one or more classification numbers, following the American Mathematical Society 2010 Mathematics Subject Classification for all codes. Details of this scheme can be found on the web at [www.ams.org/msc](http://www.ams.org/msc).

**4. Abstracts of PhD Theses.** The *Bulletin* endeavours to publish abstracts of all accepted Australasian PhD theses in mathematics. One restriction, however, is that the abstract must be received by the Editor within six months of the degree being approved.

This journal issue has been printed on FSC-certified paper and cover board. FSC is an independent, non-governmental, not-for-profit organisation established to promote the responsible management of the world's forests. Please see [www.fsc.org](http://www.fsc.org) for information.

## Table of Contents

|  |     |
|--|-----|
| <b>Two new lower bounds for the spark of a matrix</b><br><i>Liu, H., Zhu, J. &amp; Peng, J.</i>  | 353 |
| <b>Closure operators, frames and neatest representations</b><br><i>Egrot, R.</i>   | 361 |
| <b>A new upper bound for the sum of divisors function</b><br><i>Axler, C.</i>  | 374 |
| <b>On additive representation functions</b><br><i>Li, Y.-L. &amp; Chen, Y.-G.</i>  | 380 |
| <b>Congruence of symmetric inner products over finite commutative rings of odd characteristic</b><br><i>Sriwongsa, S.</i>                      | 389 |
| <b>CM fields without unit-primitive elements</b><br><i>Greither, C. &amp; Zaïmi, T.</i>  | 398 |
| <b>The short resolution of a semigroup algebra</b><br><i>Ojeda, I. &amp; Vigneron-Tenorio, A.</i>  | 400 |
| <b>Symmetric square-central elements in products of orthogonal involutions in characteristic two</b><br><i>Nokhodkar, A.-H.</i>                | 412 |
| <b>Itô's theorem and monomial Brauer characters</b><br><i>Chen, X. &amp; Lewis, M. L.</i>  | 426 |
| <b>On groups with finite conjugacy classes in a verbal subgroup</b><br><i>Delizia, C., Shumyatsky, P. &amp; Tortora, A.</i>                    | 429 |
| <b>Regular orbits of coprime linear groups in large characteristic</b><br><i>Sambale, B.</i>   | 438 |
| <b>Some reverse dynamic inequalities on time scales</b><br><i>Agarwal, R. P., Mahmoud, R. R., O'Regan, D. &amp; Saker, S. H.</i>               | 445 |
| <b>Holomorphic automorphisms and proper holomorphic self-mappings of a type of generalised minimal ball</b><br><i>Rong, F. &amp; Zhang, B.</i> | 455 |
| <b>Iterated logarithm speed of return times</b><br><i>Pawełec, L.</i>  | 468 |
| <b>K-spherical functions on abelian semigroups</b><br><i>Lukasik, R.</i>   | 479 |
| <b>Some convergence theorems in Fourier algebras</b><br><i>Mustafayev, H. S.</i>   | 487 |
| <b>Functional versions of some refined and reversed operator mean inequalities</b><br><i>Raissouli, M.</i>                                     | 496 |
| <b>A Schwarz lemma for V-harmonic maps and their applications</b><br><i>Chen, Q. &amp; Zhao, G.</i>  | 504 |
| <b>A special class of quasi-cyclic codes</b><br><i>Shi, M., Tang, J., Ge, M., Sok, L. &amp; Solé, P.</i>                                       | 513 |
| <b>Abstracts of PhD Theses</b>   |     |
| <b>Dynamics of mathematical models for bioreactors</b><br><i>Chen, Z.</i>  | 519 |
| <b>Fluid flow and particle transport through periodic capillaries</b><br><i>Islam, N.</i>  | 521 |
| <b>Stability theory and Hamiltonian dynamics in the Euler ideal fluid equations</b><br><i>Worthington, J.</i>                                  | 523 |
| <b>Author Index for Volume 96</b>  | 525 |
