

INSTRUCTIONS FOR CONTRIBUTORS

SUBMISSION OF MANUSCRIPTS

Manuscripts should be submitted online via our manuscript submission and tracking site, <http://www.editorialmanager.com/psm/>. Full instructions for electronic submission are available directly from this site. To facilitate rapid reviewing, communications for peer review will be electronic and authors will need to supply a current e-mail address when registering to use the system.

Papers for publication from Europe (except those on genetic topics, irrespective of country), and all papers on imaging topics, should be submitted to the UK Office.

Papers from the Americas, Asia, Africa, Australasia and the Middle East (except those dealing with imaging topics), and all papers dealing with genetic topics, irrespective of country, should be sent to US Office.

Generally papers should not have text more than 4500 words in length (excluding these sections) and should not have more than a combined total of 5 tables and/or figures. Papers shorter than these limits are encouraged. For papers of unusual importance the editors may waive these requirements. A structured abstract of no more than 250 words should be given at the beginning of the article using the headings: Background; Methods; Results; Conclusions. The name of an author to whom correspondence should be sent must be indicated and a full postal address given in the footnote. Any acknowledgements should be placed at the end of the text (before the References section).

Declaration of Interest: A statement must be provided in the acknowledgements listing all financial support received for the work and, for all authors, any financial involvement (including employment, fees, share ownership) or affiliation with any organization whose financial interests may be affected by material in the manuscript, or which might potentially bias it. This applies to all papers including editorials and letters to the editor.

Contributors should also note the following:

1. S.I. units should be used throughout in text, figures and tables.
2. Authors should spell out in full any abbreviations used in their manuscripts.
3. Foreign quotations and phrases should be followed by a translation.
4. If necessary, guidelines for statistical presentation may be found in: **Altman DG, Gore SM, Gardner MJ & Pocock SJ** (1983). Statistical guidelines for contributors to medical journals. *British Medical Journal* **286**, 1489–1493.

REFERENCES (1) The Harvard (author-date) system should be used in the text and a complete list of References cited given at the end of the article. In a text citation of a work by more than two authors cite the first author's name followed by et al. (but the names of all of the authors should be given in the References section). Where several references are cited together they should be listed in rising date order. (2) The References section should be supplied in alphabetical order (authors' names in **bold**, journal titles in full), following the text. Some examples follow:

Miller PM, Byrne M, Hodges A, Lawrie SM, Johnstone EC (2002). Childhood behaviour, psychotic symptoms and psychosis onset in young people at high risk of schizophrenia: early findings from the Edinburgh high risk study. *Psychological Medicine* **32**, 173–179.

Cleckley HJ (1941). *The Mask of Sanity*, 2nd edn. Mosby: St. Louis, MO.

Brewer WJ, Wood SJ, DeLuca C, Pantelis C (2006). Models of olfaction for exploring neurodevelopment. In *Olfaction and the Brain* (ed. W. J. Brewer, D. Castle and C. Pantelis), pp. 97–121. Cambridge University Press: Cambridge.

(3) Online citations

doi (when published online prior to printed issue)

Lauritsen MB, Pedersen CB, Mortensen CB (2004). The incidence and prevalence of pervasive developmental disorders: a Danish population-based study. *Psychological Medicine*. Published online: 21 October 2004. doi:10.1017/S0033291704002387.

[Authors are requested to print-out and keep a copy of any online-only material, in case the URL changes or is no longer maintained.]

FIGURES AND TABLES Only essential figures and tables should be included. Further tables, figures, photographs and appendices, may be included with the online version on the journal website. To ensure that your figures are reproduced to the highest possible standards, Cambridge Journals recommends the following formats and resolutions for supplying electronic figures. Please ensure that your figures are saved at final publication size and are in our recommended file formats. Following these guidelines will result in high quality images being reproduced in both the print and the online versions of the journal. **Line artwork:** Format: tif or eps, Colour mode: black and white (also known as 1-bit), Resolution: 1200 dpi; **Combination artwork (line/tone):** Format: tif or eps, Colour mode: grayscale (also known as 8-bit), Resolution: 800 dpi; **Black and white halftone artwork:** Format: tif, Colour mode: grayscale (also known as 8-bit), Resolution: 300 dpi; **Colour halftone artwork:** Format: tif, Colour mode: CMYK colour, Resolution: 300 dpi. All photographs, graphs, and diagrams should be referred to as figures and should be numbered consecutively in Arabic numerals. Captions for figures should be typed double-spaced on separate sheets. **Tables** Tables should be numbered consecutively in the text in Arabic numerals and each typed on a separate sheet after the References section. Titles should be typed above the table.

PROOFS AND OFFPRINTS Page proofs will be sent to the author designated to receive correspondence. corrections other than to printer's errors may be charged to the author. The corresponding author of each paper will receive a PDF file of their article and hard copy offprints may be purchased if they are ordered on the form supplied when the proof is returned.

PSYCHOLOGICAL MEDICINE

CONTENTS

EDITORIAL

A neurodevelopment and neuroplasticity-based framework for early intervention in psychotic disorders

Bora E 353

REVIEW ARTICLES

Virtual reality in the assessment and treatment of psychosis: a systematic review of its utility, acceptability and effectiveness

Rus-Calafell M, Garety P, Sason E, Craig TJK & Valmaggia LR 362

Cognitive development prior to onset of psychosis

Mollon J & Reichenberg A 392

ORIGINAL ARTICLES

Gender associated developmental trajectories of SDQ-dysregulation profile and its predictors in children

Kunze B, Wang B, Isensee C, Schlack R, Ravens-Sieberer U, Klasen F, Rothenberger A, Becker A & the BELLA-study group 404

Cardiovascular fitness in late adolescent males and later risk of serious non-affective mental disorders: a prospective, population-based study

Nyberg J, Henriksson M, Åberg MAI, Rosengren A, Söderberg M, Åberg ND, Kuhn HG & Waern M 416

Fever and infections during pregnancy and psychosis-like experiences in the offspring at age 11. A prospective study within the Danish National Birth Cohort

Dreier JW, Berg-Beckhoff G, Andersen AMN, Susser E, Nordentoft M & Strandberg-Larsen K 426

Recovery from DSM-IV post-traumatic stress disorder in the WHO World Mental Health surveys

Rosellini AJ, Liu H, Petukhova MV, Sampson NA, Aguilar-Gaxiola S, Alonso J, Borges G, Bruffaerts R, Bromet EJ, de Girolamo G, de Jonge P, Fayyad J, Florescu S, Gureje O, Haro JM, Hinkov H, Karam EG, Kawakami N, Koenen KC, Lee S, Lépine JP, Levinson D, Navarro-Mateu F, Oladeji BD, O'Neill S, Pennell B-E, Piazza M, Posada-Villa J, Scott KM, Stein DJ, Torres Y, Viana MC, Zaslavsky AM & Kessler RC on behalf of the WHO World Mental Health Survey Collaborators 437

The structure of schizotypal personality traits: a cross-national study

Fonseca-Pedrero E, Debbané M, Ortúñoz-Sierra J, Chan RCK, Cicero DC, Zhang LC, Brenner C, Barkus E, Linscott RJ, Kwapil T, Barrantes-Vidal N, Cohen A, Raine A, Compton MT, Tone EB, Suhr J, Muñiz J, Fumero A, Giakoumaki S, Tsaoasis I, Preti A, Chmielowski M, Laloyaux J, Mechri A, Lahmar MA, Wuthrich V, Laroi F, Badcock JC & Jablensky A 451

Psychoneurometric assessment of dispositional liabilities for suicidal behavior: phenotypic and etiological associations

Venables NC, Yancey JR, Kramer MD, Hicks BM, Krueger RF, Iacono WG, Joiner TE & Patrick CJ 463

The prevalence, age-of-onset and the correlates of DSM-IV psychiatric disorders in the Tianjin Mental Health Survey (TJMHS)

Yin H, Xu G, Tian H, Yang G, Wardenaar KJ & Schoevers RA 473

Improving patient experiences of mental health inpatient care: a randomised controlled trial

Wykes T, Csipke E, Williams P, Koeser L, Nash S, Rose D, Craig T & McCrone P 488

Cumulative exposure to childhood adversity, and treated attention deficit/hyperactivity disorder: a cohort study of 543650 adolescents and young adults in Sweden

Björkenstam E, Björkenstam C, Jablonska B & Kosidou K 498

Cue reactivity towards bodies in anorexia nervosa – common and differential effects in adolescents and adults

Horndasch S, Kratz O, Van Doren J, Graap H, Kramer R, Moll GH & Heinrich H 508
