## THE QUATERNARY OF ISRAEL

By AHARON HOROWITZ

Israel occupies a crucial position in the study of the Quaternary. The country has served as a bridge between Africa, Asia and Europe at least since Miocene times. Israel is divided into three longitudinal belts: the coastal plain, the mountainous backbone and the Jordan-Arava Rift Valley which runs through the country from north to south. Different erosional and depositional processes prevail in each of these belts, responding in various ways to common causes such as climate and sea levels. The steep environmental gradient of Israel—the north is covered by Mediterranean forests while the south is a bare desert—results from the location of the area in a border zone influenced by Euro-Siberian, Mediterranean, Irano-Turanian, Saharan and

Sudanese environments. The combination of the environmental gradient and the longitudinal belts results in a great number of bio types, in which every minor change is recorded in a number of different ways.

The book is divided into three parts: the first describes the present-day environments, the pre-Quaternary geology and the structural evolution of the region; the second summarizes the data; and the third brings discussions and interpretations of the paleogeographic, paleoclimatic and environmental development of Israel as they relate to human settlement. Chapters dealing with the fauna and anthropology are contributed by colleagues who specialize in these fields.

## New From Brian M. Fagan

### **PEOPLE OF THE EARTH: AN INTRODUCTION TO WORLD PREHISTORY**

Third Edition. paper / c. 464 pages / \$10.95 tentative / available in February.

Brian Fagan's narrative account of world prehistory will soon be available in a new edition. As before, this beautifully written and illustrated text traces the origins of humanity up to the start of literate civilization, with coverage of *all* geographic areas and theoretical approaches. But now **PEOPLE OF THE EARTH** is more accessible to students, with new chapter previews highlighting major themes, more maps and chronological tables, and expanded use of marginal notations. Completely updated, the new edition also features increased coverage of several important geographical areas, and new material on the systems approach and multi-linear cultural evolution.

### **Also By Brian M. Fagan**

**WORLD PREHISTORY: A BRIEF INTRODUCTION.** paper/208 pages/\$4.95/1979.

A clearly written, concise survey of the major theories and developments of prehistory with background chapters on archaeological method and theory.

**ARCHAEOLOGY: A BRIEF INTRODUCTION.** paper/194 pages/\$4.95/1978.

A brief, up-to-date, and jargon-free survey of the basic methods and principles of archaeology.

**IN THE BEGINNING: AN INTRODUCTION TO ARCHAEOLOGY,** Third Edition. cloth/562 pages/\$15.95/1978.

A thorough introduction to the science of archaeology in both the Old and New Worlds, lavishly illustrated and clearly written.

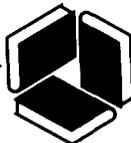

### **By Richard E. W. Adams**

**PREHISTORIC MESOAMERICA.** cloth/370 pages/\$15.95/1977.

An interpretive synthesis of the prehistoric native cultures of Mexico, Guatemala, Honduras, and Belize.
