

NOTES FOR AUTHORS

Submitting a paper

Full details on submitting a paper, including the style guide and L^AT_EX class file and macro package, can be found at <https://www.cambridge.org/core/journals/proceedings-of-the-royal-society-of-edinburgh-section-a-mathematics/information/instructions-contributors>

Proceedings of the Royal Society of Edinburgh: Section A considers for publication papers in all areas of mathematics. Please note that this journal does not consider simultaneous submissions from the same author.

- Authors will be asked to state the primary AMS 2010 Classification Number and between three and six keywords.
- Authors should nominate the most appropriate Editor for their paper.
- It is assumed that the author uploading the paper will be responsible for correspondence. A paper by more than one author should be approved in its entirety by the joint authors. An acknowledgement e-mail will be sent to all authors.
- Proceedings A has a page limit of 25pp but may consider papers up to five pages longer to allow for variation in final typeset length. Authors must prepare their papers as concisely as possible. Longer papers can be difficult to review in a reasonable time and can be judged more harshly.
- Each paper must be accompanied by an abstract, in general not exceeding 200 words, which will be printed.
- References should be listed at the end of the paper in alphabetical order, numbered sequentially. References within the text should be indicated by numbers in square brackets.

To submit your paper visit https://rse.msp.org/submit_new.php?jpath=rse_proc_a_math and follow the instructions for uploading.

Once a paper has been accepted for publication, authors will be asked to supply the appropriate file. This should be a single file, with any relevant macros included in the preamble, and named after the article reference number (e.g. 150421-authorname.tex). Figures should be submitted as eps or pdf files at the same time as the code for the paper. Detailed instructions will be given on acceptance.

Language

We recommend that non-English-speaking authors have their manuscripts checked by an English language native speaker before submission, to ensure that submissions are judged exclusively on academic merit. Third-party services specialising in language editing and/or translation can be found here: <https://www.cambridge.org/core/services/authors/language-services>. Use of any of these services is voluntary, and at the authors' own expense.

Proofs and offprints

Authors will be sent proofs of their paper by e-mail in pdf format for checking. A pdf of the final 'publisher's version' of the paper will be sent to the corresponding author shortly after print publication in lieu of hard copy offprints.

Copyright/Open Access

The RSE now operates a 'hybrid' Open Access model for its journals, for accepted papers submitted on or after 1 April 2013. On acceptance, authors will be given the option of having their paper published **either** under a regular publication agreement **or** under a fully Open Access agreement. Under the regular publication option, authors will be asked to sign the Journal's standard transfer of copyright form.

If authors choose the Open Access option, they will be asked to sign the alternative Open Access form and, upon payment of a one-off Article Processing Charge of UK£2320/US\$3450 (in 2024) the final published Version of Record shall be made freely available to all in perpetuity, and will be published under a creative commons licence, enabling its free re-use and re-distribution.

Please note that publication under a fully Open Access agreement is part of the Cambridge Open option. (For more details, please see: <https://www.cambridge.org/core/services/open-access-policies>)

Authors are also asked to ensure that any electronic versions of their paper clearly state the official place of publication.

Except as otherwise permitted under the Copyright, Designs and Patents Act, 1988, papers published in *Proceedings A* may only be reproduced, stored or transmitted with the prior permission of the copyright holder, or, in the case of reprographic reproduction, in accordance with the terms of a licence issued by the Copyright Licensing Agency. The Society permits the making of a single photocopy of an article from an issue (under Sections 29 & 38 of the Act) for an individual for the purposes of research or private study.

(Section A)

Volume 154

2024

Part 1

CONTENTS

SAMEER CHAVAN AND JAN STOCHEL	
Weakly concave operators	1–32
MARCOS T. O. PIMENTA, GELSON CONCEIÇÃO G. DOS SANTOS AND JOÃO R. SANTOS JÚNIOR	
On a quasilinear elliptic problem involving the 1-Laplacian operator and a discontinuous nonlinearity	33–59
GUILLERMO PEÑAFORT SANCHIS AND FARID TARI	
On k -folding map-germs and hidden symmetries of surfaces in the Euclidean 3-space	60–104
FRANCESCO DELLA PIETRA, FRANCESCANTONIO OLIVA AND SERGIO SEGURA DE LEÓN	
Behaviour of solutions to p -Laplacian with Robin boundary conditions as p goes to 1	105–130
ANA GRANADOS, DOMINGO PESTANA, ANA PORTILLA, JOSÉ M. RODRÍGUEZ AND EVA TOURÍS	
Liouville property and quasi-isometries on negatively curved Riemannian surfaces	131–153
ALEXANDER STOIMENOW	
Subsymmetric exchanged braids and the Burau matrix	154–187
CLAUDIO PESSOA, LUCAS QUEIROZ AND JARNE D. RIBEIRO	
Cyclicity of rigid centres on centre manifolds of three-dimensional systems	188–200
FAN WU	
A note on energy equality for the fractional Navier-Stokes equations	201–208
ELÍAS GABRIEL MINIAN	
Morse theory of Bestvina–Brady type for posets and matchings	209–220
YASUHIKO ASAO, YASUAKI HIRAOKA AND SHU KANAZAWA	
Girth, magnitude homology and phase transition of diagonality	221–247
RAVINDER KRISHNA RAINA, JANUSZ SOKÓŁ AND KATARZYNA TRĄBKA-WIĘCŁAW	
On a class of difference operator and its applications to a family of analytic functions	248–258
ADAM LECKO	
A new inner approach for differential subordinations	259–272
JIAN-WEN SUN AND PENG-FEI FANG	
Asymptotic profiles for positive solutions of diffusive logistic equations	273–284
MIN LI AND XIONG LI	
The existence of unbounded solutions of asymmetric oscillations in the degenerate resonant case	285–303
HIDDE SCHÖNBERGER	
Extending linear growth functionals to functions of bounded fractional variation	304–327
SHANSHAN GUO, GUOCHUN WU AND YINGHUI ZHANG	
Global existence and large time behaviour for the pressureless Euler–Naver–Stokes system in \mathbb{R}^3	328–352
