

THE EDINBURGH MATHEMATICAL SOCIETY

The Edinburgh Mathematical Society was instituted in 1883 for "the promotion and extension of Mathematical Science, Pure and Applied".

Members may subscribe to the *Proceedings* at a reduced rate. Further information about membership can be obtained from the Secretary.

The Society's address is

The Edinburgh Mathematical Society
James Clerk Maxwell Building
The King's Buildings
Edinburgh EH9 3JZ

Submission of papers

Papers to be considered for publication (2 copies) should be sent to the appropriate Subject Editor, or to the Secretary. The style and arrangement should conform to current practice in the *Proceedings*. Each manuscript should contain a short abstract of not more than 200 words and also a primary classification number from the American Mathematical Society's 1990 Mathematics Subject Classification Scheme. Authors are encouraged to use TeX typesetting software to prepare their papers. The LaTeX macro package is especially recommended, and a class file, together with a brief guide is available from the Society's Website. Once an article has reached its final form and is accepted for publication, authors will be asked to supply the appropriate electronic file. This should be a single file, with any relevant macros included in the preamble, and named after the article number (as assigned by the Society, e.g. `ems0431.tex`).

Figures in PostScript form are also welcome, and should be submitted at the same time as the TeX file for the paper.

One proof is supplied, which should be corrected and returned promptly. Excessive corrections may be charged to authors. Fifty free offprints will be supplied if ordered on a form returned with the proof.

Addresses of editors

C. M. Campbell
Mathematical Institute
University of St Andrews
North Haugh
St Andrews KY16 9SS

A. M. Etheridge
Department of Statistics
Oxford University
1 South Parks Road
Oxford OX1 3TG

C. Maclachlan

Proceedings of the Edinburgh Mathematical Society

VOLUME 42 (SERIES II), PART 2

JUNE 1999

Period polynomials and congruences for Hecke algebras	217
<i>Winifried Hohnen</i>	
Optimal functions for a periodic uncertainty principle and multiresolution analysis	225
<i>Jürgen Prestin and Ewald Quak</i>	
Interpolation restricted to decreasing functions and Lorentz spaces	243
<i>Joan Cerdà and Joaquim Martín</i>	
Computing eigenvalues of Sturm-Liouville systems of Bessel type	257
<i>A. Boumenir and B. Chanane</i>	
The “maximal” tensor product of operator spaces	267
<i>Timur Oikhberg and Gilles Pisier</i>	
Real interpolation for divisible cones	285
<i>María J. Carro, Stefan Ericsson and Lars-Erik Persson</i>	
C*-ideals generated by polynomials	305
<i>Paul Tapper</i>	
A Bernstein-Gabber-Joseph theorem for affine algebras	311
<i>V. V. Bavula and T. H. Lenagan</i>	
Some natural subgroups of the Nottingham group	333
<i>Rachel Camina</i>	
Interaction of some meromorphic solutions of the KdV equation	341
<i>M. Kovalyov and K. M. Lee</i>	
Positive solutions and eigenvalues of conjugate boundary value problems	349
<i>Ravi P. Agarwal, Martin Bohner and Patricia J. Y. Wong</i>	
The cover associated to a (1,3)-polarized bielliptic abelian surface and its branch locus	375
<i>Gianfranco Casnati</i>	
Action of finite groups on Rees algebras and Gorensteinness in invariant subrings	393
<i>Shin-Ichiro Iai</i>	
A generalization of the Bernstein polynomials	403
<i>Halil Oruç and George M. Phillips</i>	
Asymptotic behaviour of solutions to the Becker-Döring equations	415
<i>J. Carr and R. M. Dunwell</i>	
Book Reviews	425
