

## **The Helicopter Association of Great Britain**

### **LECTURE PROGRAMME 1957-58**

**All Lectures take place in The Library, Royal Aeronautical Society, 4 Hamilton Place, London, W 1, at 6 p m**

**Friday, October 4th, 1957**

**"TILT WING AIRCRAFT IN COMPARISON WITH OTHER VTOL AND STOL SYSTEMS,"** by W Z Stepniewski, Dipl Ing, A F I Ae S (Vertol Aircraft Corporation, Morton, Pa, U S A)

**Friday, November 8th, 1957**

**"DISCUSSION ON THE PROBLEMS RELATING TO THE INSTALLATION AND OPERATION OF RADIO EQUIPMENT IN HELICOPTERS"** Introduction by D W Griffiths, M S L A E (Airwork Ltd)

**Friday, December 6th, 1957**

**"THE DIGITAL COMPUTER AS A HELICOPTER FLIGHT SIMULATOR,"** by J M Harrison, A F R Ae S (Westland Aircraft Ltd)

**Friday, January 10th, 1958**

**"BOOST SYSTEMS FOR HELICOPTER GAS TURBINES,"** by A W Morley, Ph D, A F R Ae S (D Napier & Son Ltd)

**Friday, February 7th, 1958**

**"WIND TUNNEL TESTING OF HELICOPTER MODELS,"** by M S Hooper, F R Ae S (The Fairey Aviation Company Ltd)

**Friday, March 7th, 1958**

**"SOME WAYS OF OBTAINING AN INTEGRATED AIRCRAFT,"** by Dr D Kuchemann, F R Ae S (Royal Aircraft Establishment, Farnborough)

**Friday, April 11th, 1958**

**"POWERED LIFT SYSTEMS,"** by Charles H Zimmerman, M S, F I Ae S (National Advisory Committee for Aeronautics, Langley Field, Va, U S A)

**Friday, May 9th, 1958**

**"CANADIAN RESEARCH IN THE FIELD OF HELICOPTER ICING,"** by J R Stallabrass, B Sc (Eng), Grad I E E, M C A I, (National Research Council, Ottawa)

**Friday, June 6th, 1958**

**"TURBINE HELICOPTERS,"** by D L Hollis Williams, B Sc, F R Ae S (Westland Aircraft Ltd)

## TRANSMISSION

The Bristol Type 171 Sycamore Helicopter uses LAYRUB as the main drive between engine and rotor

Layrub couplings use rubber trunnion blocks as the main driving elements giving a fully cushioned drive. As there are no metal to metal contacts no lubrication is required therefore little or no maintenance.

Other well-known British aircraft on which Layrub is used either as auxiliary or main drive include Bristol Type 173 Helicopter and Bristol Britannia

A post-card will see full technical data on its way to you

AT ITS BEST

# **Westland WESSEX**

The Wessex is the first helicopter in the world to go into production powered by a free-turbine engine. During the first flight of the prototype earlier this year it was airborne for sixty-five minutes. Subsequently it has made a series of successful test flights of varying duration.

The free-turbine engine gives the Wessex advantages of supreme economic and operational importance.

**It enables the helicopter to be airborne from a cold start within 45 seconds**

**It uses the same fuel as jet aircraft, thus eliminating the necessity to store two types of fuel on airfields and aircraft carriers**

**It reduces the noise element inherent in piston engined helicopters to an unobtrusive purr**

**It reduces vibration to the minimum, which means less wear on components, and greater comfort for passengers and crew**

**The compactness and light weight of the engine allow for increased payload**

The Wessex has been ordered for the Royal Navy for anti-submarine duties.

It is powered by a single Napier Gazelle free-turbine engine.
