Off-beat Biologist

The autobiography of
Alan S. Parkes

Sir Alan Parkes divides his story into six parts. Part I comprises a bird's eye survey of his career from early days to retirement and after, the emphasis being on his thirty years' service with the Medical Research Council. Part II describes the greater part of his original work in, among others, chapters entitled Studies in Mammalian Reproduction, Exciting Times in Endocrinology, and The Rise of Cryobiology. Part III records his contact with organisations dealing mainly with man, and Part IV with those dealing with animals. Part V, the longest section, describes spreading the light by conferences of many different kinds and by means of books and journals: Professor Parkes was instrumental in starting the *Journal of Biosocial Science*. Part VI, which gives his thoughts on bioethics, on research and the scientist, and on himself, is perhaps the most revealing.

Published by the Galton Foundation, Cambridge, England, 1985. 485 pp, 22 illustrations. Price £20.00, US\$30.00. ISBN 0 907232 05 1.
