## The Fountain of Privilege

Political Foundations of Markets in Old Regime France and England

"Political economy comes of age in this book. [It] practices what has so far merely been advocated, the melding of history, economics, and political science. . . . A masterpiece of social science."

—Donald N. McCloskey, author of *Second Thoughts*

California Series on Social Choice and Political Economy  
£37.50, \$45.00 cloth

FELICE A. BONADIO

## A. P. Giannini

Banker of America

Extending credit to ordinary working people, creating a financial empire through his branch banks, A. P. Giannini, son of Italian immigrants enabled California to advance faster than any other state in the decades before World War II. Bonadio's superior biography reveals the founder of

Bank of America in his many roles, most notably that of a bold, ruthless financial genius keenly aware of his minority status in a world dominated by the eastern Protestant elite.

DEVKA WEBER

## Dark Sweat, White Gold

California Farm Workers, Cotton, and the New Deal

"Belongs on the same shelf as Steinbeck's *The Grapes of Wrath* and McWilliams' *Factories in the Field*." —David Montejano, University of Texas

In her incisive analysis of the shaping of California's agricultural work force, Weber shows how the cultural background of Mexican and, later, Anglo-American workers, combined with the structure of capitalist cotton production and New Deal politics, forging a new form of labor relations.

£33.00, \$40.00 cloth, illustrated

ROBERT GARDELLA

## Harvesting Mountains

Fujian and the China Tea Trade, 1757-1937

Few commodities are as synonymous with any civilization as tea with China. Gardella analyzes the multifaceted influence of tea production and the tea trade upon Fujian, a premier tea-growing region, illuminating the economic, social, fiscal, and environmental ramifications of China's involvement with a dynamic world economy.

# Econometric Theory

CAMBRIDGE  
UNIVERSITY PRESS

**NEW FREQUENCY:**  
5 issues per year beginning in 1994

*Editor*  
Peter C.B. Phillips  
Cowles Foundation for Research in Economics

*Econometric Theory* is an international journal dedicated to advancing theoretical research in econometrics. The journal provides an authoritative, centralized, professional outlet for original contributions in all of the major areas of econometrics. As well as periodic book reviews and articles that embody original theoretical research, the journal publishes historical studies on the evolution of econometric thought and on major scholars. *Econometric Theory* also serves an educational role by the inclusion of an on-going "Problems and Solutions" series and by "ET Interviews" with pre-eminent scholars in the field.

## Reciprocity, U.S. Trade Policy, and the GATT Regime

CAROLYN RHODES

Rhodes examines the origins and impact of a core concept in the history of U.S. foreign economic policymaking. She argues that reciprocity—targeted retaliation against noncooperative actions by trading partners and specific rewards for cooperation—is a relatively effective way of establishing and maintaining an open international trading regime. \$32.50

## Leaving England

*Essays on British Emigration  
in the Nineteenth Century*

CHARLOTTE  
ERICKSON

The British Isles provided more overseas settlers than any country in continental Europe during the nineteenth century, but English emigrants to North America have remained largely invisible, partly for lack of records about their departure or their experiences. Here Erickson uses new sources to understand this long-neglected group and the nature of their lives in a new land. \$38.50

## Business and Banking

*Political Change and  
Economic Integration  
in Western Europe*

PAULETTE KURZER

"*Business and Banking* is the most perceptive analysis to date of the erosion of 'corporatism' in Europe and a major contribution to the study of that much-neglected actor in Europe and elsewhere, finance capital."—David R. Cameron, Yale University

## The Workplace before the Factory

*Artisans and Proletarians,  
1500–1800*

EDITED BY THOMAS  
MAX SAFLEY  
AND LEONARD  
N. ROSEN BAND

This book addresses the influence of the work process and technological innovation on labor and production before the Industrial Revolution. Covering a broad span of time, place, and enterprise, the authors discuss different kinds of industrial organizations—outwork, small shop, and centralized production. \$37.50 cloth, \$14.95 paper

## Labor Will Rule

*Sidney Hillman and  
the Rise of American Labor*

STEVEN FRASER

*New in Paper!* WINNER OF THE PHILIP TAFT PRIZE AS THE BEST BOOK IN AMERICAN LABOR HISTORY FOR 1991 "As this fine biography reveals, Sidney Hillman's willingness to develop innovative strategies for the dispossessed and the disadvantaged in our society can still be a source of inspiration, as well as quiet rebuke to those who prefer ostrichlike behavior in times of crisis and peacock pride in times of plenty."—Gregory Mantsios, *New York Times Book Review*. \$16.95

## Ideas, Interests, and American Trade Policy

JUDITH GOLDSTEIN

To citizens and political analysts alike, U.S. trade law is an incoherent conglomeration of policies, both liberal and protectionist. Seeking to understand the contradictions in American policy, Goldstein demonstrates the impact of the political past on today's trade decisions. # A History of Economic Theory

*Classic Contributions, 1720-1980*

JÜRIG NIEHANS

"The book is well-organized. Its chapters on monetary topics and marginalist writers are balanced and informative. Many economists neglected in other histories are here given their due. . . . As a convenient desk reference, this book has much to offer."—*Journal of Economic History*

*A History of Economic Theory* offers a comprehensive account of the builders and building blocks of modern mainstream economics. Jürg Niehans shows how the analytical tools used by economists have evolved from the eighteenth century to the present.

# Monopolistic Competition Theory

*Origins, Results, and Implications*

JAN KEPPLER

Economist Jan Keppler traces the development of monopolistic competition theory within the context of the political, economic, and historical developments of its time. He argues that the emergence of the theory was linked to politically motivated criticisms of liberal capitalism. Whether in the form of corporatist critiques in Germany and Italy or social reform movements in Great Britain and New Deal America, it provided economic arguments for market intervention and income redistribution.

Papers in *Economics and Philosophy* explore the foundations of economics as both a predictive/explanatory enterprise and a normative one. They examine the relevance of economic techniques, methods and conclusions to philosophical questions in ethics and social theory. The journal is designed to foster collaboration between economists and philosophers and to bridge the increasingly artificial boundaries between them. Each issue contains review essays, detailed book reviews, and continuing discussion on topics previously covered.

## **The Federal Civil Service System and the Problem of Bureaucracy**

*The Economics and Politics of Institutional Change*

**Ronald N. Johnson and Gary D. Libecap**

"Johnson and Libecap have written the most analytic history of the federal civil service. Their central insight is that the civil service was created and is sustained by both Congress and the president, Democrats and Republicans, primarily to prevent any single group from gaining undue control."—William A. Niskanen, chairman, Cato Institute

## **New Deals**

Business, Labor, and Politics in America, 1920-1935

**Colin Gordon**

Arguing that the labor and welfare law of the latter New Deal grew from a response to the competitive instability of the period, the origins and premises of the policies of the 1920s and 1930s are reassessed in the first major reinterpretation of the New Deal in thirty years.

## **The Castilian Crisis of the Seventeenth Century**

New Perspectives on the Economic and Social History of Seventeenth-Century Spain

**I.A.A. Thompson and Bartolome Yun, Editors**

This is a collection of recent revisionist essays on the economic and social history of seventeenth-century Castile by Spanish historians. The aim of the volume is to draw the attention of English-speaking scholars to the new approaches, techniques and source materials that have transformed Catalan economic and social history over the past two decades.

## **Family and Social Change**

The Household as a Process in an Industrializing Community

**Angelique Janssens**

This book examines the effects of nineteenth-century industrialization on the strength of relationships within the family and between generations. Dr. Janssens' quantitative approach reveals that although family life did go through some changes, early industrialization did not lead to the destruction of nineteenth-century family life, as the traditionally dominant view contended.

## **Making a Medical Market**

Doctors and Their Patients in English Society 1720-1911

**Anne Digby**

Anne Digby explores the neglected socio-economic history of medical practice, beginning with the first voluntary hospital in 1720 and ending with national health insurance in 1911. It looks at public appointments in hospitals and dispensaries, office under public welfare systems, and at private practice. In this innovative study, Anne Digby makes use of new sources of information, looks at ordinary rather than 'elite' doctors and analyses provincial rather than metropolitan practice.

## **Undermining the Japanese Miracle**

Work and Conflict in a Coalmining Community

**Matthew Allen**

This book is about the underside of Japan's economic miracle. It is an account of people who have been forgotten in Japan's push to industrialize in the postwar era: the coalminers of Chikuho on Japan's southernmost island. The dirty and neglected character of Chikuho is in stark contrast with Japan's prevailing image as an international leader in technology and an affluent, socially cohesive country. The book challenges the concepts of industrial harmony, cultural homogeneity and caring government that dominate much of the literature on Japan.

## The Medieval Super-Companies

A Study of the Peruzzi Company of Florence

**Edwin S. Hunt**

This analysis of the Peruzzi Company produces a radical reassessment of what made the Florentine super-companies so exceptional: commodity trading, especially in grain, which required heavy capital, sophisticated organization, and an international network. But the book also exposes the limitations of their financial power, and explodes the myth that the collapse of the Peruzzi and its joint-venture partner, the Bardi, was caused by bad loans to Edward III to finance his invasions of France.

## Business Interest Groups in Nineteenth Century Brazil

**Eugene Ridings**

This book is the first to describe the role of business interest groups, also known as pressure groups, in the development of Brazil during the nineteenth century. Business interest groups strongly affected the modernization and prosperity of agriculture, the pace of industrialization, and patterns of communications. The commercial associations, the most important of business interest groups, also may be seen as institutions through which ties of dependency to better-developed nations overseas were maintained.

## Forming a Colonial Economy, Australia 1810-1850

**N.G. Butlin**

This book is a comprehensive account of the development of Australia's colonial economy before the gold rushes. Noel Butlin's analysis of the developing economy provides background discussion of eighteenth-century British social, economic and military history, and detailed demographic analysis of the Australian population over sixty years. A key focus of the book is the extent to which the economy was independent or externally driven.

## Insider Lending

Banks, Personal Connections, and Economic Development in Industrial New England

**Naomi R. Lamoreaux**

In early nineteenth century New England, insider lending was an integral aspect of the banking system. Not only was the practice an accepted fact of economic life, but, as Naomi R. Lamoreaux argues, it enabled banks to play an important role in financing economic development. As the banking system evolved over the course of the century, however, lending practices became more impersonal and professional.

## Portrait of the Family Within the Total Economy

A Study in Longrun Dynamics, Australia 1788-1990

**Graeme Donald Snooks**

The household sector is the forgotten economy of the Western world. Yet it is an institution that plays a central role in the operation of economic systems, and in the way these systems change through time. This book looks at the role of the household economy in the process of economic change. It considers the household within the Total Economy and analyzes longrun dynamic processes in Western society.
