

NOTES FOR CONTRIBUTORS

Detailed instructions for preparation and submission of manuscripts can be found on the Cambridge University Press website:

http://assets.cambridge.org/jbs/jbs_ifc.pdf

The *Journal of Biosocial Science* publishes original papers, short reports, reviews, lectures, debates and book reviews dealing with social aspects of human biology, including reproduction and its control, gerontology, ecology, genetics and applied psychology, with biological aspects of the social sciences, including sociology, social anthropology and education, with social and biological elements of nutrition, growth and development, health and epidemiology, and with biosocial aspects of demography. Preference is given to material that is clearly interdisciplinary.

Papers are considered for publication on the understanding that they have not been, nor will be, published elsewhere in whole or in part, and that, where customary, they have been approved for publication by the relevant Head of Department. The Editor is not responsible for any loss or damage to manuscripts or illustrations and his decision on all editorial matters is final. The Editor reserves the right to make minor literary emendations but manuscripts will not be substantially altered without consultation with the author. The author is responsible for the accuracy of quotations, tabular matter and references.

Submissions: Manuscripts should be submitted as email attachments to the Editor on email address: **cmg26@cam.ac.uk**. Please send a pdf of the complete paper with line numbers added, along with a copy of the text and tables in Word and press-quality figures prepared according to the online instructions. Simple charts can be sent as Excel files. Other figures should be sent as high-resolution graphics files (minimum 300 dpi) or pdfs with embedded fonts. Note that the journal does not use colour, and figures are reproduced in black/white/grey tones.

Preparation of Manuscripts: Papers should be written in English using British spelling (as in the *Oxford Concise Dictionary*). Note that the following are not allowed in the journal: personal pronouns (I, we, our etc.), endnotes, footnotes. Manuscripts should bear the title of the paper, authors' names, a *brief* address (not full postal address) for each co-author and a short running heading (maximum 50 characters and spaces). A short summary consisting of one unnumbered paragraph should precede the text. Papers are generally divided into Introduction, Methods, Results, Discussion and Reference sections, but deviations from this format are acceptable. Acknowledgments should be made a separate section at the end of the text.

Short Reports: Short Reports should be of an overall maximum length of 2000 words, including summary and references. If tables and/or figures are included (maximum of one page), the text should be limited to 1500 words.

Debates: A section is reserved for publishing comments (maximum 500 words) on papers appearing in previous issues. Authors whose papers are involved will be given the opportunity for simultaneous response.

Printed in the United Kingdom by Henry Ling Limited, at the Dorset Press, Dorchester DT1 1HD.
