# THE STRUCTURE OF BEHAVIOUR

**Maurice Merleau-Ponty**

*Translated by ALDEN L. FISHER*

'The book is pitched at the level of scientific experience and undertakes to prove that this experience itself does not make sense within the ontological perspectives which science spontaneously adopts. With painstaking analysis Merleau-Ponty demonstrates how frequently the very facts which science seeks to elucidate impel it to adopt uncritically assumptions about the life-world which it is then (because of its more restricted methods) unable to check.'
