**TYPE 171** *for air/sea rescue or relief duties*

The general capabilities of the helicopter have frequently been demonstrated during recent years. In the rescuing of the wounded, the sick or the stranded from almost inaccessible places the helicopter in the role of 'lifeboat of the air' has exhibited but one of its many potential uses. The 'Bristol' Type 171 is a 4/5 seater helicopter designed to permit optimum utilisation in all aspects of civil industrial or military uses. With a sound basic design it provides full scope for modification to suit specialist requirements. Although Type 171 is the first 'Bristol' helicopter an unmatched record of forty years of aeronautical experience is the background to its design and construction.

OBJECTS OF THE ASSOCIATION

The objects of the Association are to collect compile and disseminate information of a technical and semi technical nature pertaining to Helicopters and all other types of Rotating Wing Aircraft  
 The Association aims to work in close co operation with existing Aeronautical Bodies on matters affecting its Objects and it may act as an Advisory Body in the promotion of legislation calculated to be of benefit to the development of Rotating Wing Aircraft

*Chosen for all British  
Helicopters built,  
building and projected  
which require engines  
of its power*
