

people

“A quarterly magazine on
population and development”

Published on behalf of the International Planned
Parenthood Federation

Edited by John Rowley

People reports on worldwide efforts to break the cycle of poverty by linking improvements in nutrition, education, health, employment and living conditions with the planning of childbirth. It does so in human terms, reporting from the villages and shanty towns where the development battles are fought. It looks especially at ways of transforming the productive and reproductive lives of women whose contribution to sustainable development is frequently ignored.

Recent issues of **People** have looked at efforts around the world to help people build their own homes and upgrade their environment.

They have also reported on new efforts to bring about safer motherhood in countries where maternal death rates remain high.

Plants TODAY

ISSN: 0952-3855

Reduced rates
to BES/BSBI/SEB
members

A magazine for all those interested in plant science. Published in association with the British Ecological Society, the Botanical Society of the British Isles and the Society for Experimental Biology.

Editors Lindsay Haddon and Peter D. Moore

PLANTS TODAY is a topical magazine for anyone with an interest in plant science, be it in ecology, field botany, physiology, cell biology or biotechnology. It aims to cover the interests of amateur botanists as well as those professionals working in schools, colleges & universities, in research institutes or in industry. It should also appeal to students considering biology as a career, and to those with an interest in conservation or agriculture. Items of news and comment will complement features on matters of current interest, written by experts from the various areas of botany and its applications. Articles, although authoritative, will be presented and illustrated to make them of interest to those

with other specialities or a general botanical background. Its coverage of topical issues makes PLANTS TODAY a valuable means of keeping up-to-date with plant science.

Beginning in January 1988, PLANTS TODAY will appear six times a year and each issue of about 36 pages will have two centre pages in colour and good quality illustrations throughout. Each issue will contain material from several fields of interest and in addition to the regular review articles may have items on new books, forthcoming events and correspondence as well as articles forming part of a series.

A selection of forthcoming articles

Airborne pollution and trees

Terry Mansfield

Plant foraging

Mike Hutchings

Azolla and Chinese agriculture

D.J. Shi & David Hall

Putting genes into plants

John Bryant

Plants of the Coto Doñana

Peter Moore & Tony Stevenson

Geometry of plant leaves

John Chapman

Pelargonium and the perfume industry

B.V. Charlwood

Limestone heaths

John Etherington

Engineered potato hybrids

Mike Jones

Weed killers and plant physiology

Alan Dodge

Pollen and honey

John Cowan

Projected series include:

Advances in biotechnology

Plants of significance to science (genetics
agriculture evolution etc)

Plant habitats

Botanical Gardens

Subscription Information

PLANTS TODAY is published in association with the British Ecological Society, Botanical Society of the British Isles and the Society for Experimental Biology. Members of these societies can subscribe at the special price of £11.25 (North America US\$21.50) post free. The rates for other individuals are £15.00 (UK) US\$26.50 (North America) and £18.00

(elsewhere) post free. The rates for libraries and institutions are £45.50 (UK), US\$76.50 (North America) and £54.50 (elsewhere) post free. Schools are entitled to subscribe at the individual rates. ISSN 0952-3855.

A free specimen copy will be sent on request.

Please send all orders and requests for specimen copies to:
