

Notes for contributors

A submission to Applied Probability is considered as a submission to either *Journal of Applied Probability* (JAP) or *Advances in Applied Probability* (AAP). Longer papers are typically published in AAP, but the assignment of papers between the two journals is made by the Executive Editor on an issue-by-issue basis. Short communications and letters specifically relating to papers appearing in either JAP or AAP are published in JAP.

Papers submitted to the Applied Probability journals are considered on the understanding that they have not been published previously and are not under consideration by another publication. Accepted papers will not be published elsewhere without the written permission of the Trust. Submitted papers should be in English. It is the author's responsibility to ensure an acceptable standard of language, and a paper failing to meet this requirement may go back to the author for rewriting before being sent out for review.

Papers should include: (i) a **short abstract** of 4–10 lines giving a non-mathematical description of the subject matter and results; (ii) a list of **keywords** detailing the contents; and (iii) a list of **classifications**, using the 2010 Mathematics Subject Classification scheme (<http://www.ams.org/msc/>). Letters to the Editor need not include these. To assist authors in writing papers in the Applied Probability style, they may use the L^AT_EX class file `aptpub.cls`, available from <http://www.appliedprobability.org/>. Use of this class file is not a condition of submission, but will considerably increase the speed at which papers are processed.

Papers should be submitted electronically through ScholarOne at <https://mc.manuscriptcentral.com/apjournals>. All submissions will be acknowledged on receipt.

Copyright

The copyright of all published papers is vested in the Applied Probability Trust. When a paper is accepted for publication, the Trust asks the authors to assign copyright by signing a form in which the terms of copyright are listed. Failure to do this promptly may delay or prevent publication.

Authorisation to photocopy items for internal or personal use, or the internal or personal use of specific clients, is granted by the Applied Probability Trust for libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the corresponding processing and royalty fees (see <http://www.copyright.com>) are paid directly to CCC, 222 Rosewood Drive, Danvers, MA 01923, USA. 0021–9002/19

Volume 60 Number 1

Original Articles

- 1 OSCAR PERALTA. A Markov jump process associated with the matrix-exponential distribution
- 14 KAYLA JAVIER AND BRIAN FRALIX. On the study of the running maximum and minimum level of level-dependent quasi-birth–death processes and related models
- 30 BERENICE ANNE NEUMANN. Nonlinear Markov chains with finite state space: invariant distributions and long-term behaviour
- 45 ALEXANDER IKSANOV, BOHDAN RASHYTOV AND IGOR SAMOILENKO. Renewal theory for iterated perturbed random walks on a general branching process tree: Early generations
- 68 OFFER KELLA AND MICHEL MANDJES. From reflected Lévy processes to stochastically monotone Markov processes via generalized inverses and supermodularity
- 85 REMCO VAN DER HOFSTAD, STELLA KAPODISTRIA, ZBIGNIEW PALMOWSKI AND SEVA SHNEER. Unified approach for solving exit problems for additive-increase and multiplicative-decrease processes
- 106 ONNO BOXMA, DAVID PERRY AND WOLFGANG STADJE. Stationary analysis of an (R, Q) inventory model with normal and emergency orders
- 127 DIEGO HERNÁNDEZ-BUSTOS AND DANIEL HERNÁNDEZ-HERNÁNDEZ. Portfolio management under drawdown constraint in discrete-time financial markets
- 148 N. N. LEONENKO AND M. D. RUIZ-MEDINA. Sojourn functionals for spatiotemporal Gaussian random fields with long memory
- 166 GURSHARN KAUR AND NEERAJA SAHASRABUDHE. Interacting urns on a finite directed graph
- 189 ANDRÉ GOLDMAN. A note related to the CS decomposition and the BK inequality for discrete determinantal processes
- 204 JOHN ARMSTRONG AND TIM KING. Anomalous recurrence of Markov chains on negatively curved manifolds
- 223 FEDERICO PIANOFORTE AND RICCARDO TURIN. Multivariate Poisson and Poisson process approximations with applications to Bernoulli sums and U -statistics
- 241 MUN-CHOL KIM, HUN O AND HO-JIN HWANG. Optimal stopping under g -Expectation with $L \exp(\mu\sqrt{2\log(1+L)})$ -integrable reward process
- 253 DAVID A. LEVIN AND CHANDAN TANKALA. Fast mixing of a randomized shift-register Markov chain
- 267 MIKHAIL LIFSHITS AND SERGEI NIKITIN. Large deviations of Poisson Telecom processes
- 284 YILUN SHANG. On connectivity and robustness of random graphs with inhomogeneity
- 295 NANNAN HAO AND MARKUS HEYDENREICH. Graph distances in scale-free percolation: the logarithmic case
- 314 TAKASHI OWADA. Limit theory for U -statistics under geometric and topological constraints with rare events
- 341 LEONARDO VIDELA. A transport process on graphs and its limiting distributions
- 358 KEYI ZENG, WEIWEI ZHUANG AND TAIZHONG HU. Dispersive orderings induced by differences of inter risk measures
- 366 APPLIED PROBABILITY TRUST PRIZES 2022
