

NUTRITIONAL HISTORY, 1940-47

PROCEEDINGS OF THE NUTRITION SOCIETY

The five volumes of Proceedings published by The Nutrition Society during the war years and immediately after present a unique picture of nutritional practice in Britain under wartime conditions and also, by virtue of the First International Nutrition Congress ever held (July, 1946), of the position in several other European countries and in the United States, surveyed after the end of hostilities.

These five volumes are indispensable to any library consulted by students of nutritional science. Some sets are still available and can be obtained from the Publishers at an inclusive cost (unbound) of £5 for the five volumes: they will quote a special price for bound sets. There are also separate copies of Volumes 1 to 4: these will be available until exhausted, at a price of £1 per volume.

All inquiries and remittances should be sent to the publishers
