# Nutrition Research Reviews

Available online at  
[www.journals.cambridge.org](http://www.journals.cambridge.org)

Published on behalf of The Nutrition Society by  
Cambridge University Press  
ISSN 0954-4224

# Nutrition Research Reviews

Volume 24, 2011 ISSN: 0954-4224

## Aims and Scope

*Nutrition Research Reviews* publishes comprehensive and challenging review articles on selected key topics in nutritional science. Authors are encouraged to take a critical approach in appraising the literature while also aiming to advance new concepts and hypotheses. The journal publishes both solicited and unsolicited articles.

*Nutrition Research Reviews* is published twice a year by Cambridge University Press on behalf of The Nutrition Society.

The contents page of this journal is available on the Internet before publication at <http://www.cambridge.org/nrr>

## Editorial Board

### Editor-in-Chief

Dr Graham C Burdge, *University of Southampton, UK*

### Address for correspondence

Dr Graham C Burdge, *Editor-in-Chief, Nutrition Research Reviews, Institute of Human Nutrition / DOHaD Division, Institute of Developmental Sciences Building, Mail point 887, Southampton General Hospital, Tremona Road, Southampton SO16 6YD, UK*

Tel: +44(0)23 80798663 Fax: +44(0)23 80795255 Email: [G.C.Burdge@soton.ac.uk](mailto:G.C.Burdge@soton.ac.uk)

### US Editor

Professor C M Weaver, *Purdue University, USA*

### Editors

Dr N Binns, *NMB Consulting Limited, Ireland*

Dr D Dardevet, *INRA, France*

Dr M Pufulete, *University of Bristol, UK*

### Editorial Advisors

Professor P J Aggett, *UK*

Dr M Ashwell, *Baldock, UK*

Dr D A Bender, *University College London, UK*

Dr J L Black, *Warrimoo, Australia*

Dr C Edwards, *Glasgow University, UK*

Dr S French, *Mars UK Ltd. Slough, UK*

Dr J Houdijk, *SAC, UK*

Professor D J Millward, *University of Surrey, UK*

Professor H J Powers, *University of Sheffield, UK*

Dr P Rogers, *University of Bristol, UK*

Professor N W Solomons, *CESSIAM, Guatemala*

Professor M Verstegen, *Wageningen University, Netherlands*

Dr K M Younger, *Dublin Institute of Technology, Ireland*

### Editorial staff

C Goodstein (*Publications Manager*), C Jackson (*Deputy Publications Manager*),  
C T Hughes, L Weeks and H Zdravics (*Publications Officers*), S Hui (*Publications Assistant*)

---

The Nutrition Society has as its objective the advancement of the scientific study of nutrition and its applications to the maintenance of human and animal health.

Application of membership is invited from anyone whose work has contributed to the scientific knowledge of nutrition, whether such work has been in the laboratory, the field or the clinic, and whether experimental, clinical, agricultural or statistical in nature. There is also a student membership scheme with reduced subscriptions.

Particulars of The Nutrition Society and application forms for membership are available from The Nutrition Society,  
10 Cambridge Court, 210 Shepherds Bush Road, London W6 7NJ, UK.

Tel: +44 (0)20 7602 0228, Fax: +44 (0)20 7602 1756, Email: [edoffice@nutsoc.org.uk](mailto:edoffice@nutsoc.org.uk)

The Nutrition Society Home Page is at <http://www.nutritionssociety.org>

Editor-in-Chief

Dr Graham C. Burdge  
University of Southampton, UK

**CAMBRIDGE**  
UNIVERSITY PRESS

**Nutrition Research Reviews**  
*Volume 24, 2011 ISSN: 0954-4224*

**Publishing, Production, Marketing, and**

**Subscription Sales Office:**

Cambridge University Press  
The Edinburgh Building  
Shaftesbury Road  
Cambridge CB2 8RU, UK

**For Customers in North America:**

Cambridge University Press  
Journals Fulfillment Department  
100 Brook Hill Drive  
West Nyack  
New York 10994-2133  
USA

**Publisher:** Katy Christomanou

*Nutrition Research Reviews* is an international journal published biannually (June and December) by Cambridge University Press on behalf of the Nutrition Society.

**Subscription information:**

Volume 24 2011 (2 issues)  
Internet/print package: £99/\$88 American only/€309 EU only  
Internet only: £153/\$274 Americas only/€388 EU only  
Print only: £87/\$63 Americas only/€286 EU only

**Back volumes** are available. Please contact Cambridge University Press for further information.

**Claims** for non-receipt of journal issues will be considered on their merit and only if the claim is received within six months of publication. Replacement copies supplied after this date will be chargeable.

**US POSTMASTERS:** please send address corrections to *Nutrition Research Reviews*, Cambridge University Press, 100 Brook Hill Drive, West Nyack, New York 10994-2133.

**Information for Authors:** The journal publishes both solicited and unsolicited review articles. For unsolicited material, authors are asked to submit a summary of the article to the Editor-in-chief in the first instance:

Dr Graham C Burdge,  
Editor-in-Chief, Nutrition Research Reviews,  
Institute of Human Nutrition / DOHaD Division,  
Institute of Developmental Sciences Building,  
Mail point 887, Southampton General Hospital,  
Tremona Road,  
Southampton SO16 6YD, UK  
Tel: +44(0)23 80798663  
Fax: +44(0)23 80795255  
Email: [G.C.Burdge@soton.ac.uk](mailto:G.C.Burdge@soton.ac.uk)

**Directions to Contributors:** if not printed in this issue, are available from the Editor-in-chief.

**Offprints:** The author (or main author) of an accepted paper will receive a free PDF of their paper and a voucher copy of the issue in which their paper has been published. Additional offprints are available for a fee and should be ordered at proof stage. **No page charges are levied by this journal.**

**Copyright:** As of July 2000 the copyright of all articles submitted to *Nutrition Research Reviews* are retained by the authors or their institutions. For articles prior to this date permission for reproduction of any part of the journal (text, figures, tables or other matter) in any form (on paper, microfiche or electronically) should be sought directly from the Society, at: The Publications Office, The Nutrition Society, 10 Cambridge Court, 210 Shepherds Bush Road, London W6 7NJ, UK.

**Disclaimer:** The information contained herein, including any expression of opinion and any projection or forecast, has been obtained from or is based upon sources believed by us to be reliable, but is not guaranteed as to accuracy or completeness. The information is supplied without obligation and on the understanding that any person who acts upon it or otherwise changes his/her position in reliance thereon does so entirely at his/her own risk. This journal is printed on acid-free paper from renewable sources. Printed in the UK by Bell & Bain Ltd., Glasgow.

This journal issue has been printed on FSC-certified paper and cover board. FSC is an independent, non-governmental, not-for-profit organization established to promote the responsible management of the world's forests. Please see [www.fsc.org](http://www.fsc.org) for information.

Subscribers may register for free access to the electronic version of *Nutrition Research Reviews*. For more information visit the website at: [journals.cambridge.org](http://journals.cambridge.org)

*Nutrition Research Reviews* is covered by the Science Citation Index<sup>®</sup>, Current Contents<sup>®</sup> / Agriculture, Biology & Environmental Sciences, SciSearch<sup>®</sup>, Research Alert<sup>®</sup>, Index to Scientific Reviews<sup>®</sup>, EMBASE/Excerpta Medica, Chemical Abstracts Services, CINAHL<sup>®</sup> Database, CAB ABSTRACTS<sup>®</sup>, Global Health, BIOSIS<sup>®</sup> Database, SIIC Databases

## Contents

Vol. 24 No. 1 June 2011

Vitamin D and cardiometabolic health: a review of the evidence	
<i>S. Muldowney &amp; M. Kiely</i>	
Introduction	1
Scope of review and approach	2
Vitamin D endocrine system	2
Links between vitamin D and CVD	2
CVD	3
Cardiometabolic syndrome	3
Glucose and insulin metabolism and type 2 diabetes	4
Clinical evidence – observational studies	5
Intervention studies	7
Obesity	8
Intervention studies	8
Elevated blood pressure	8
Clinical evidence – observational studies	9
Intervention trials	10
Dyslipidaemia	11
Clinical evidence – observational studies	11
Intervention trials	12
Inflammation	12
Clinical data	13
Intervention trials	13
Novel markers of CVD risk	14
Summary and future directions	14
Acknowledgements	15
References	15
Potential benefits of pro- and prebiotics on intestinal mucosal immunity and intestinal barrier in short bowel syndrome	
<i>C. N. Stoidis, E. P. Misiakos, P. Patapis, C. I. Fotiadis &amp; B. G. Spyropoulos</i>	
Short bowel syndrome	22
Intestinal barrier–bacterial translocation interaction	23
Syn-, pre- and probiotics	24
Animal and experimental studies on short bowel syndrome and probiotics	25
Clinical studies on short bowel syndrome and probiotics	26
Conclusion	27
Acknowledgements	27
References	27
Dietary therapy: a new strategy for management of chronic pelvic pain	
<i>F. Sesti, T. Capozzolo, A. Pietropolli, M. Collalti, M. R. Bollea &amp; E. Piccione</i>	
Introduction	31
Epidemiology and impact on quality of life	31
Aetiology	32
Diagnosis	32
Pathophysiology	32
Nociceptive pelvic pain	32
Inflammatory pelvic pain	32
Neuropathic pelvic pain	33
Chronic pelvic pain and oxidative stress	33
Therapeutic approach	34
Conventional treatments	34
Dietary therapy	35
Conclusions	36

Acknowledgements	36
References	37
Anorexia nervosa and nutritional assessment: contribution of body composition measurements	
<i>L. Mattar, N. Godart, J. C. Melchior &amp; C. Pichard</i>	
Body composition alterations in anorexia nervosa	40
Body composition-measuring techniques in anorexia nervosa	40
Basic anthropometric measurements: body height, weight and BMI	40
Brief description of body weight, height and BMI	40
Applicability and limitation of body weight and BMI	40
Skinfolds thickness, mid-upper arm circumference and waist-to-hip ratio	41
Brief description of skinfolds thickness	41
Applicability and limitation of skinfolds thickness in anorexia nervosa	41
Brief description of mid-upper arm circumference	41
Applicability and limitation of mid-upper arm circumference in anorexia nervosa	41
Brief description of waist-to-hip ratio	41
Applicability and limitation of waist-to-hip ratio in anorexia nervosa	41
Bioelectrical impedance analysis	41
Brief description of body impedance analysis	41
Applicability and limitation of body impedance analysis in anorexia nervosa	41
Dual-energy X-ray absorptiometry	42
Brief description of dual-energy X-ray absorptiometry	42
Applicability and limitation of dual-energy X-ray absorptiometry in anorexia nervosa	42
Some other methods: computed tomography and underwater weighing	43
Brief description of computed tomography	43
Applicability and limitation of computed tomography in anorexia nervosa	43
Brief description of underwater weighing	43
Applicability and limitation of underwater weighing in anorexia nervosa	43
Conclusion	43
Acknowledgements	43
References	44
The role of dietary nucleotides in single-stomached animals	
<i>N. Sauer, R. Mosenthin &amp; E. Bauer</i>	
Introduction	46
Biochemical and functional characteristics of nucleotides	47
Contents of nucleotides in milk and other food and feed ingredients	48
Biological effects of dietary nucleotides	49
Physiological, morphological and metabolic effects	49
Hepatic morphology and function	49
Lipid metabolism	50
Intestinal morphology and function	51
Immunological effects	52
Microbial effects	53
Zootechnical effects	54
Conclusions	54
Acknowledgements	56
References	56
Garlic in health and disease	
<i>S. V. Rana, R. Pal, K. Vaiphei, S. K. Sharma &amp; R. P. Ola</i>	
Introduction	60
Biochemistry	60
Chemical changes in garlic	60
Anti-carcinogenic actions of garlic	61
Medical uses of garlic	61
Antioxidant actions of garlic	61
Antilipaemic actions of garlic	63

Hepatoprotective actions of garlic	64
Other potential effects of garlic	65
Haematological effects	65
Antimicrobial effects	65
Antineoplastic effects	65
Potential toxicity of garlic	66
Doses of garlic and its compounds	67
Summary	68
Acknowledgements	68

Associations between dairy consumption and body weight: a review of the evidence and underlying mechanisms	
<i>A. Dougkas C. K. Reynolds, I. D. Givens, P. C. Elwood &amp; A. M. Minihane</i>	
Introduction	72
Obesity prevalence and projections	72
Dairy consumption patterns worldwide	73
Scope of the review and an overview of the strengths and limitations of available evidence	73
Epidemiological evidence of the effects of dairy product consumption on body composition	74
Evidence from cross-sectional studies	74
Evidence from baseline data in prospective studies examined in a cross-sectional manner	74
Evidence from prospective studies	76
Meta-analysis using the epidemiological evidence	78
Evidence from intervention trials of the effects of dairy product consumption on body composition	78
Evidence from intervention trials without energy restriction	79
Evidence from intervention trials with energy restriction	80
Intervention trials: dairy products <i>v.</i> dietary and supplemental calcium	81
Summary of the evidence based on epidemiological and intervention studies	81
Mechanism underlying the impact of dairy constituents on body-weight regulation	81
Mechanisms underlying the impact of calcium on body composition	82
Effects of calcium on adipocyte lipid metabolism	82
Evidence of calcium effects on fat oxidation	83
Evidence of calcium effects on fatty acid absorption and postprandial fat metabolism	83
Mechanisms and evidence of conjugated linoleic acid effects on body composition	84
Effects of medium-chain fatty acids on body composition	85
Effects of proteins on body composition	85
Mechanism underlying the impact of dairy constituents on appetite regulation	85
Food intake regulation	85
Long-term regulation of food intake	85
Short-term regulation of food intake	85
Dairy components and appetite regulation	86
Effects of dairy proteins	86
Effects of dairy carbohydrates	87
Effects of dairy fats	87
Effects of calcium	87
Evidence of dairy product effects on appetite regulation	87
Conclusions	89
Acknowledgements	90
References	90
Influence of nutrition on feline calcium oxalate urolithiasis with emphasis on endogenous oxalate synthesis	
<i>J. C. Dijkker, E. A. Plantinga, J. van Baal &amp; W. H. Hendriks</i>	
Introduction	96
Risk factors	97
Urine volume	97
Dietary factors affecting urine volume	98
Urinary oxalate	99
Factors influencing urinary oxalate: exogenous urinary oxalates	99
Factors influencing urinary oxalate: endogenous urinary oxalates	100
Dietary factors influencing endogenous urinary oxalate synthesis	103

Urinary calcium	103
Dietary factors influencing urinary calcium excretion	104
Urine pH	104
Dietary factors influencing urine pH	105
Urinary citrate	105
Urinary glycosaminoglycans	105
Conclusions	106

Ruminant and industrial sources of <i>trans</i> -fat and cardiovascular and diabetic diseases	
<i>A.-L. Tardy, B. Morio, J.-M. Chardigny &amp; C. Malpuech-Brugère</i>	
Introduction	111
<i>Trans</i> -fatty acids and cardiovascular risk biomarkers	112
Impact of <i>trans</i> -fatty acids on the risk of CHD	112
Impact of <i>trans</i> -fatty acids on markers of CHD	114
Effects of <i>trans</i> -fatty acids on HDL- and LDL-cholesterol	114
Relationship between <i>trans</i> -fatty acids and markers of haemostatic function	114
Relationship between <i>trans</i> -fatty acids and markers of inflammation and endothelial dysfunction	114
<i>Trans</i> -fatty acids and risks for type 2 diabetes	115
Effects of <i>trans</i> -fatty acids on glucose tolerance and type 2 diabetes	115
Effects of <i>trans</i> -fatty acids on insulin secretion by pancreatic $\beta$ -cells	115
Effects of <i>trans</i> -fatty acids on peripheral insulin sensitivity	116
Conclusion	116
Acknowledgements	116
