

GLACIOLOGICAL LITERATURE

THIS is a selected list of glaciological literature on the scientific study of snow and ice and of their effects on the earth; for the literature on polar expeditions, and also on the "applied" aspects of glaciology, such as snow ploughs, readers should consult the bibliographies in each issue of the *Polar Record*. For Russian material the system of transliteration used is that agreed by the U.S. Board on Geographic Names and the Permanent Committee on Geographical Names for British Official Use in 1947. Readers can greatly assist by sending reprints of their publications to the Society, or by informing Dr. J. W. Glen of publications of glaciological interest. It should be noted that the Society does not necessarily hold copies of the items in this list, and also that the Society does not possess facilities for microfilming or photocopying.

GENERAL GLACIOLOGY

- GIOVINETTO, M. B. Results of glaciological research in Antarctica. *U.S. Antarctic Projects Officer. Bulletin*, Vol. 4, No. 7, 1963, p. 2-7. [Summary of recent advances in knowledge.]
- LORIUS, C. Terre Adélie. Campagne d'été 1961-1962. *Glaciologie. Territoire des Terres Australes et Antarctiques Françaises. Expéditions Polaires Françaises (Missions Paul-Émile Victor)*, Publication No. 241, 1963, 109 p. [Results of 1961-62 field season in Terre Adélie including positions and elevations of markers, mean annual temperature, accumulation, coastal regression, electrical conductivity measurements on melted snow, firn and ice. English and Russian summaries.]
- NANGERONI, G., and VANNI, M. The activities of the Italian Glaciological Committee on the occasion of the International Geophysical Year. *Bulletin de l'Association Internationale d'Hydrologie Scientifique*, 8e An., No. 3, 1963, p. 97-100.
- ØSTREM, G. Comparative crystallographic studies on ice from ice-cored moraines, snow-banks, and glaciers. *Geografiske Annaler*, Vol. 45, No. 4, 1963, p. 210-40. [Detailed and fully illustrated account of ice crystal sizes in different snow and ice deposits.]
- PAL'GOV, N. N. (ed.) *Mezhdunarodnyy Geofizicheskiy God. Glyatsiologicheskiye issledovaniya v period MGG: Zailiyskiy i Kirgizskiy Alatau, Altay* [International Geophysical Year. Glaciological investigations during the period of the I.G.Y.: Zailiyskiy and Kirgizskiy Alatau, Altay]. Vyp. 4. Alma-Ata, Izdatel'stvo Akademii Nauk Kazakhskoy SSR [Publishing House of the Academy of Sciences of the Kazakh S.S.R.], 1964. 168 p. [Fourth of series of publications of I.G.Y. results of which first three were entitled *Zailiyskiy i Dzhungarskiy Alatau*. Contains following papers, all in Russian with English summaries: N. N. Pal'gov, "Glaciers of Kazakhstan and their main regime features", p. 5-27; N. N. Pal'gov, "On discharge of thawing waters from firn field of mountain glaciers", p. 28-43; Ye. N. Vilesov, "The change of heat content of the active layer of glacier ice", p. 44-53; K. G. Makarevich, "New glaciological studies in glaciers in the Talgar basin of the Zailiyskiy Alatau", p. 54-70; K. G. Makarevich, "Problems of the regime of the left Talgar glaciers", p. 71-82; T. Ya. Tkachyk, "Direct radiation in the Zailiyskiy Alatau range mountainous zone", p. 83-90; R. G. Golovkova, Yu. S. Dyukareva, and N. D. Yegorova, "Comparative characteristics of meteorological and actinometric indices at glaciers on the upper Malaya Almatinka and Talgar rivers", p. 91-104; R. G. Golovkova, K. Sh. Diyarova, and N. D. Yegorova, "Main ablation factors of the Lednik Shokalskogo in the Zailiyskiy Alatau range", p. 105-10; N. D. Yegorova, "Meteorological conditions of the glacierized zone in the Zailiyskiy Alatau range", p. 111-25; N. Ya. Barvenko, "Some features of glacial movement regime of the Maloalmatinskaya group of glaciers in the Zailiyskiy Alatau range", p. 126-42; V. V. Zamoruyev, "Geomorphological observations on the Berel'skiy Lednik during the summer of 1960", p. 143-49; Ye. V. Maksimov, "Results of glaciological observations in the western part of the northern slopes of Kirgizskiy Alatau", p. 150-61; G. A. Tokmagambetov and V. N. Goluber, "The texture and structure of buried ice in the moraines of the Maloalmatinskaya glaciers", p. 162-67.]
- ROBIN, G. de Q. Glaciology. *Endeavour*, Vol. 23, No. 89, 1964, p. 102-07. [Description of the development of study of ice as a plastic material.]
- STRETON, N. A. Some peculiarities of ice formation in MacRobertson Land. *Australian Meteorological Magazine*, No. 37, 1962, p. 29-34. [Rift in Amery Ice Shelf, inland mountain top "ice boulders" and formation of large open water pool in winter sea ice.]
- TALJAARD, J. J. Advances in knowledge of Antarctic topography, ice and meteorology since 1955. *South Africa. Weather Bureau. News Letter*, No. 161, 1962, p. 131-37.

GLACIOLOGICAL INSTRUMENTS AND METHODS

- BEAUMONT, R. T., and WORK, R. A. Snow sampling results from three samplers. *Bulletin de l'Association Internationale d'Hydrologie Scientifique*, 8e An., No. 4, 1963, p. 74-78. [Tests of two new designs and the Federal Snow Sampler.]
- BONNEMA, D. J. Jagsneemeters op Antarktika. *South Africa. Weather Bureau. News Letter*, No. 164, 1962, p. 178-79. [History of drift-snow meters and details of meter used on second South African Antarctic Expedition, 1961.]
- BREUCK, W. de. *Un appareil pour découper les carottes de sondage dans la glace*. Bruxelles, Presses Universitaires de Bruxelles, 1962. 4 leaves. [Description of simple apparatus for cutting firn and ice cores from drillings.]
- SCHWERDTFEGER, P. An analogue computer for solving growth problems of floating ice. *Gelands Beiträge zur Geophysik*, Bd. 73, Ht. 1, 1964, p. 44-52. [Electrical device to predict ice thickness from surface temperature data.]
- SCHWERDTFEGER, P. Measurement of conducted flow of heat in a sea ice cover. *Nature*, Vol. 200, No. 4908, 1963, p. 769. [Method of measurement.]

PHYSICS OF ICE

- BARTHAKUR, N., and MAYBANK, J. Anomalous behaviour of some amino-acids as ice nucleators. *Nature*, Vol. 200, No. 4909, 1963, p. 866-68. [Experiments and discussion of mechanism.]
- BOWDEN, F. P., and TABOR, D. *The friction and lubrication of solids. Part II.* Oxford, Clarendon Press, 1964. xx, 544 p. [Ch. 8, p. 128-48, on friction, adhesion and deformation properties of ice and solid krypton; ch. 9, p. 149-58, on friction of ski on snow and ice.]
- FUKUTA, N. Ice nucleation by metaldehyde. *Nature*, Vol. 199, No. 4892, 1963, p. 475-76.
- KUROIWA, D. Internal friction of ice. *Contributions from the Institute of Low Temperature Science (Sapporo)*, Ser. A, No. 18, 1964, p. 1-62. [Paper in three parts: (1) the internal friction of H_2O and D_2O ice, and the influence of chemical impurities on mechanical damping, p. 1-37; (2) the grain boundary internal friction of ice, p. 38-48; (3) the internal friction of natural glacier ice, p. 49-62.]
- LATHAM, J. Charge transfer associated with temperature gradients in ice. *Nature*, Vol. 200, No. 4911, 1963, p. 1087. [Test of theory. Deviations shown to be due to surface effects.]
- LATHAM, J. Charge transfer associated with temperature gradients in ice crystals grown in a diffusion chamber. *Quarterly Journal of the Royal Meteorological Society*, Vol. 90, No. 385, 1964, p. 266-74. [Experiments on charge acquired during growth and on contact between ice crystals at different temperatures.]
- LIST, R. Zur Thermodynamik von Schwammeisansätzen an langsam rotierenden Zylindern. *Winterbericht des Eidgenössischen Institutes für Schne- und Lawinenforschung*, Nr. 25, 1962, p. 105-09. [Study of the accretion of ice on slowly rotating cylinders. Also published as *Eidgenössische Kommission zum Studium der Hagelbildung und Hagelabwehr Wissenschaftliche Mitteilungen*, Nr. 42, 1963.]
- MATTHEWS, J. B., and MASON, B. J. Electrification accompanying melting of ice and snow. *Quarterly Journal of the Royal Meteorological Society*, Vol. 89, No. 381, 1963, p. 376-80.
- MOSSOP, S. C. Atmospheric ice nuclei. *Zeitschrift für angewandte Mathematik und Physik*, Vol. 14, Fasc. 5, 1963, p. 456-86. [Review article. 147 literature references. French summary.]
- TOWNSEND, A. A. Natural convection in water over an ice surface. *Quarterly Journal of the Royal Meteorological Society*, Vol. 90, No. 385, 1964, p. 248-59.

LAND ICE. GLACIERS. ICE SHELVES

- AVSYUK, G. A. Iskusstvennoye usileniye tayniya gornykh lednikov [Artificial acceleration of glacier thawing]. *Priroda [Nature]*, 1963, No. 7, p. 61-66. [Methods used in Central Asia.]
- BONDAREV, L. G. *Ocherki po oledeneniyu massive Ak-Shiyak* [Essays on the glacierization of the Ak-Shiyak massif]. Frunze, Izdatel'stvo Akademii Nauk Kirgizskoy SSR [Publishing House of the Academy of Sciences of the Kirgiz S.S.R.], 1963. 202 p. [Discussion of basis of I.G.Y. results.]
- BUYNITSKIY, V. Kh. *Shel'fovyye l'dy Antarktiki, ikh morfologiya, vnutrennyaya struktura i proiskhozhdeniye* [Ice shelves of the Antarctic, their morphology, internal structure and origin]. *Vestnik Leningradskogo Universiteta [Messenger of Leningrad University]*, No. 18, 1963, p. 82-101. [General discussion, with list of essential facts about 55 ice shelves.]
- CHANG, F. K. Seismic wave studies in northwest Marie Byrd Land, Antarctica. *Bulletin of the Seismological Society of America*, Vol. 54, No. 1, 1964, p. 51-65. [Relation between seismic wave velocity and other physical properties of ice and snow.]
- EPSTEIN, S., and others. Oxygen-isotope ratios in Antarctic snow, firn and ice, by S. Epstein, R. P. Sharp and I. Goddard. *Journal of Geology*, Vol. 71, No. 6, 1963, p. 698-720. [O-isotope ratios in snow as a technique for measuring annual accumulation, and as a reflection of climatic changes in Antarctica.]
- EYTHÓRSSON, J. Brúarjökull hlaupinn. *Jökull*, Ár 13, No. 3, 1963, p. 19-21. [Re-advance since 1890 of the eastern half of the margin by about 9 km. while western half had only advanced about 3 km. English summary.]
- EYTHÓRSSON, J. Variation of Iceland glaciers 1931-1960. *Jökull*, Ár 13, No. 3, 1963, p. 31-33. [General recession.]
- GEORGII, H.-W. Der Spurenstoffgehalt des Gletschereises. *Polarforschung*, Bd. 5, Jahrg. 32, Ht. 1-2, 1962 [pub. 1963], p. 140-44. [The concentration of ions in glacier ice from Hintereisferner (Austria) is much less than in new precipitation whereas in ice from Axel Heiberg Island it is not. This is explained by the mechanism of formation of glacier grains.]
- GIOVINETTO, M. B., and BEHRENDT, J. C. The area of ice shelves in Antarctica. *Polar Record*, Vol. 12, No. 77, 1964, p. 171-73. [Discussion of differences between estimates by I. A. Suyetova and Giovinetto.]
- GLEN, J. W. Glaciers. *Times Science Review*, Spring, 1964, p. 12-14. [General review of present knowledge.]
- GONFIANTINI, R., and others. Geographical variations of oxygen-18/oxygen-16 ratio in surface snow and ice from Queen Maud Land, Antarctica, by R. Gonfiantini, V. Togliatti, E. Tongiorgi, W. de Breuck and E. Picciotto. *Nature*, Vol. 197, No. 4872, 1963, p. 1096-98.

ERRATUM

Vol. 5, No. 38, p. 221, caption to Fig. 2:

For "Early spring condition"
read "Late summer condition".

DUPLICATE PAPERS

Some duplicate papers in the Society's Library are still available for distribution to members. Application for a list of these should be made to the Editor at Little Dane, Biddenden, Ashford, Kent, England.
