

Erratum

Schorah, C. J. & Smithells, R. W.: Maternal vitamin nutrition and malformations of the neural tube. *Nutrition Research Reviews* (1991), 4, 33–49.

It has been brought to our attention that some data published in this review may have been unsound for reasons beyond the control of the authors. Consequently, the authors propose retraction of that part of the paper that relates to the uptake of [^{14}C]MTHF in NTD-associated cells compared with controls (Table 7 on page 43 and the penultimate paragraph on page 43).
