

QUATERNARY RESEARCH

Quaternary Research is an international journal devoted to the advancement of the interdisciplinary understanding of the Quaternary Period. We aim to publish articles of broad interest with relevance to more than one discipline, and that constitute a significant new contribution to Quaternary science. The journal's scope is global, building on its nearly 50-year history in advancing the understanding of earth and human history through interdisciplinary study of the last 2.7 million years. Research areas include geoarcheology, geochemistry and geophysics, geochronology, geomorphology, glaciology, neotectonics, paleobotany and paleoecology, paleoclimatology, paleogeography, paleohydrology, paleontology, paleoceanography, paleopedology, Quaternary geology, volcanology and tephrochronology.

Submit manuscripts online at <http://editorialmanager.com/qr>. See instructions for submitting your manuscripts at <https://www.cambridge.org/core/journals/quaternary-research/information/guide-for-authors>.

Subscription Information: *Quaternary Research* publishes six volumes per year. The journal is published on behalf of Quaternary Research Center by Cambridge University Press, One Liberty Plaza, 20th Floor, New York, NY 10006, USA. Annual subscription rates for Volumes 93–98 (2020): Institutional rate, print only: \$1,515.00 (£1074.00 + VAT). Institutional rate, online only: \$1,486.00 (£1055.00 + VAT). Institutional rate, print and online: \$1,576.00 (£1120.00 + VAT). For subscriptions, renewals, and address changes, please visit <https://www.cambridge.org/core/journals/quaternary-research/subscribe>. Email subscriptions_newyork@cambridge.org if you are in the Americas or journals@cambridge.org for the rest of the world.

Volume 94, March 2020

CONTENTS

RESEARCH ARTICLES

- 1–13 **Millennial-scale increase in winter precipitation in the southern Rocky Mountains during the Common Era**
Meredith C. Parish, W. John Calder and Bryan N. Shuman
- 14–30 **Chronological and geomorphological approach to the Holocene tephras from Tafí and Santa María valleys, NW Argentina**
Maria M. Sampietro-Vattuone, Walter A. Báez, José L. Peña-Monné and Alfonso Sola
- 31–45 **Holocene vegetation and climate change on the Colorado Plateau in southern Utah, USA**
Lisbeth A. Louderback, Christopher A. Kiehlertes and Joel C. Janetski
- 46–60 **Landscape changes in the southern Amazonian foreland basin during the Holocene inferred from Lake Ginebra, Beni, Bolivia**
Katerine Escobar-Torrez, Marie-Pierre Ledru, Teresa Ortúñoz, Umberto Lombardo and Jean-François Renno
- 61–79 **Crustal subsidence inferred from reconstruction of the Pleistocene–Holocene palaeogeography in the northern Lake Inba area, central Japan**
Takashi Chiba, Shigeo Sugihara, Yoshiaki Matsushima, Yusuke Arai and Kunihiko Endo
- 80–93 **Age of the Berlin moraine complex, New Hampshire, USA, and implications for ice sheet dynamics and climate during Termination 1**
Gordon R.M. Bromley, Brenda L. Hall, Woodrow B. Thompson and Thomas V. Lowell
- 94–120 **Tectonism and volcanism enhanced by deglaciation events in southern Iceland**
Brigitte Van Vliet-Lanoë, Françoise Bergerat, Pascal Allemand, Christophe Innocent, Hervé Guillou, Thibault Cavailhes, Águst Guðmundsson, Gilles Chazot, Jean-Luc Schneider, Philippe Grandjean, Céline Liorzou and Sophie Passot
- 121–136 **Luminescence chronology and lithic technology of Tianhuadong Cave, an early Upper Pleistocene Paleolithic site in southwest China**
Yue Hu, Qijun Ruan, Jianhui Liu, Ben Marwick and Bo Li
- 137–155 **Geoarchaeological insights into the location of Indus settlements on the plains of northwest India**
Sayantani Neogi, Charles A.I. French, Julie A. Durcan, Ravindra N. Singh and Cameron A. Petrie
- 156–173 **Reconstructing Saharan dust transport to the Eastern Mediterranean Sea during the last 180 ka using endmember modelling of grain size data**
Sarah Beuscher, Werner Ehrmann, Stefan Krüger and Gerhard Schmiedl
- 174–194 **A sediment-mixing process model of till genesis, using texture and clay mineralogy data from Saginaw lobe (Michigan, USA) tills**
Randall J. Schaetzl, Christopher Baish, Patrick M. Colgan, Jarrod Knauff, Thomas Bilintoh, Dan Wanyama, Michelle Church, Kevin McKeehan, Albert Fulton and Alan F. Arbogast
- 195–209 **Reconstruction of sea-surface temperatures in the Canary Islands during Marine Isotope Stage 11**
Thibault Clauzel, Chloé Maréchal, François Fourel, Abel Barral, Romain Amiot, Juan-Francisco Betancort, Alejandro Lomoschitz, Joaquín Meco and Christophe Lécuyer

LETTER TO THE EDITORS

- 210–211 **A multi-proxy study of changing environmental conditions in a Younger Dryas sequence in southwestern Manitoba, Canada — Comment on the paper by Teller et al., *Quaternary Research* Volume 93, 60–87**
Ryan P. Breslawski, Abigail E. Fisher and Ian A. Jorgeson
- 212–213 **A multi-proxy study of changing environmental conditions in a Younger Dryas sequence in southwestern Manitoba, Canada: Response to comments by Breslawski et al., *Quaternary Research* Volume 94, 210–211**
Allen West, James Kennett, James Teller and Matthew Boyd

ERRATUM

- 214–216 **Lake-level changes and hominin occupations in the arid Turkana Basin during volcanic closure of the Omo River outflows to the Indian Ocean – Response to comments by Schuster and Nutz, *Quaternary Research* 92(2), pp. 598–600 – ERRATUM**
Xavier Boës, Sandrine Prat, Vincent Arrighi, Craig Feibel, Bereket Haileab, Jason Lewis and Sonia Harmand
