

## Contents

|  |             |
|--|-------------|
| Genomic effects of phytochemicals and their implication in the maintenance of health.<br><i>A. Scalbert &amp; S. Knasmüller</i>  | ES1–ES2     |
| Use of conventional and -omics based methods for health claims of dietary antioxidants:<br>a critical overview.<br><i>S. Knasmüller, A. Nersesyan, M. Mišák, C. Gerner, W. Mikulits, V. Ehrlich, C. Hoelzl,<br/>A. Szakmary &amp; K.-H. Wagner</i> | ES3–ES52    |
| Flavonoids and intestinal cancers.<br><i>R. Pierini, J. M. Gee, N. J. Belshaw &amp; I. T. Johnson</i>  | ES53–ES59   |
| Flavonoids: modulators of brain function?<br><i>J. P. E. Spencer</i>   | ES60–ES77   |
| Isoflavones and the prevention of breast and prostate cancer: new perspectives opened by<br>nutrigenomics.<br><i>C. Steiner, S. Arnould, A. Scalbert &amp; C. Manach</i>   | ES78–ES108  |
| Antioxidant phytochemicals against type 2 diabetes.<br><i>A. Dembinska-Kiec, O. Mykkänen, B. Kiec-Wilk &amp; H. Mykkänen</i>   | ES109–ES117 |
| Biological models for phytochemical research: from cell to human organism.<br><i>A. Mortensen, I. K. Sorensen, C. Wilde, S. Dragoni, D. Mullerová, O. Toussaint,<br/>Z. Zloch, G. Sgaragli &amp; J. Ovesná</i>                                     | ES118–ES126 |
| High throughput ‘omics’ approaches to assess the effects of phytochemicals in human<br>health studies.<br><i>J. Ovesná, O. Slabý, O. Toussaint, M. Kodíček, P. Maršák, V. Pouchová &amp; T. Vaněk</i>  | ES127–ES134 |
