

**JOURNAL OF
PLASMA PHYSICS**

JOURNAL OF PLASMA PHYSICS exists for the publication of experimental and theoretical research papers on plasma physics and its applications.

EDITOR

DR J. P. DOUGHERTY

*Department of Applied Mathematics and Theoretical Physics, University of Cambridge,
Silver Street, Cambridge, England*

ASSOCIATE EDITORS

PROF. D. BERSHADER

*Department of Aeronautics and Astronautics,
Stanford University, Stanford, California 94305, U.S.A.*

PROF. F. D. KAHN

*Department of Astronomy,
University of Manchester, Manchester 13, England*

PROF. W. B. THOMPSON

*Department of Physics,
University of California, La Jolla, California 92038, U.S.A.*

Authors wishing to have papers published in the **JOURNAL** should communicate them to any one of the persons named above, choosing one in their own country where possible.

Authors are urged to ensure that their papers are written clearly and attractively, in order that their work will be readily accessible to readers.

Manuscripts should be typed in double spacing on one side of the paper only, with references listed at the end in alphabetical order of authors. Drawings should be done in Indian ink on plain white or transparent paper, and should not be larger than 15 in. by 24 in. Lettering should be shown clearly in pencil for reproduction by the printer, and as far as possible information relating to a figure should be placed in the caption rather than on the figure. A typed list of captions should be provided at the end of the manuscript. Proofs of papers from overseas will usually be despatched to authors by airmail. There is no charge for publication. Authors are entitled to receive 50 offprints of a paper in the **JOURNAL** free of charge, and additional offprints can be purchased if ordered in advance.

JOURNAL OF PLASMA PHYSICS is published quarterly by Cambridge University Press, P.O. Box 92, London, N.W.1 and 32 East 57th Street, New York, N.Y. 10022.

Single parts cost £3 net (\$9.00 in the U.S.A.) plus postage.

Four parts form a volume. The subscription price of a volume (which includes postage) is £10 net (\$32.50 in the U.S.A.).

Copies of the journal for subscribers in the United States of America are sent by air to New York to arrive with minimum delay.

Second class postage paid at New York, N.Y.

CONTENTS TO VOLUME 3

PART 1 FEBRUARY 1969

Shock-like solutions of the electrostatic Vlasov equation. D. MONTGOMERY and G. JOYCE	page 1
Landau damping of long wavelength ion acoustic waves in a collision-free plasma with a gravity field. D. PARKINSON and K. SCHINDLER	13
A variational approach to the dynamic stability of high-density plasmas in magnetic containment devices. D. R. WELLS and J. NORWOOD	21
Longitudinal oscillations of a plasma having a Fermi distribution of electrons. M. GIBBONS	47
Small amplitude waves in high β plasmas. V. FORMISANO and C. F. KENNEL	55
A 337 μm CW maser interferometer for plasma diagnostics. J. CHAMBERLAIN, H. A. GEBBIE, A. GEORGE and J. D. E. BEYNON	75
Magnetohydrodynamic shock waves in non-aligned flow. S. MORIOKA and J. R. SPREITER	81
On the kinetic equation for resonant three-wave coupling. R. C. DAVIDSON and A. N. KAUFMAN	97
A modified truncation procedure for the BBGKY hierarchy. C. J. MYERSCOUGH	107
On the kinetic theory of stable and weakly unstable plasma. Part 2. A. ROGISTER and C. OBERMAN	119
REVIEW <i>The Statistical Theory of Non-Equilibrium Processes in a Plasma, by Yu. L. Klimontovich</i>	148

PART 2 MAY 1969

Diocotron instability in presence of a cold plasma. ALDO NOCENTINI	149
Kinetic theory of the stability of collisional plasma in curved magnetic field. K. JUNGWIRTH	155
Measurement of the electrical properties of a flowing plasma, including a critical comparison of probe experiment and theory. E. W. BILLINGTON	161
Transformation of waves and electron heating in a radially inhomogeneous plasma. V. KOPECKÝ, J. PREINHAEHLER and J. VÁCLAVÍK	179

Ion density and current distributions in a propagating current sheet, determined by microwave reflection technique. W. R. ELLIS and R. G. JAHN	page 189
Non-linear coupling of waves in a magnetized plasma with particle drift motions. H. WILHELMSSON	215
The growth and decay of resonant plasma oscillations excited by a small pulsed dipole. J. A. FEJER and WAI-MAO YU	227
More uniform perturbation theory of the Vlasov equation. G. J. LEWAK	243
Motion of a charged particle in superposed Heliotron and biconical cusp fields. M. P. SRIVASTAVA and P. K. BHAT	255
A new method of determining the transport coefficients for high pressure arcs from experimental data. L. B. KAPP and P. H. RICHARDS	269
Transverse instabilities in a collisionless plasma. A. SMITH	281
A quantitative quasi-linear analysis of waves in an anisotropic plasma. A. SMITH	295
REVIEW <i>Theory of Condenser Matter</i>	310

PART 3 SEPTEMBER 1969

On the structure of the boundary layer separating a neutral anisotropic plasma from a magnetic field. L. G. COHEN and I. M. COHEN	311
A guiding centre Vlasov equation and its application to Alfvén waves. J. A. FEJER and J. R. KAN	331
Theory of a thick dynamic positive-ion sheath. K. F. SANDER	353
A sensitive microwave interferometer for plasma diagnostics. J. R. WALLINGTON and J. D. E. BEYNON	371
Stochastic solution of the Boltzmann equation for thermal electrons in an attractive Coulombic potential. M. J. BELL and M. D. KOSTIN	377
Theoretical models for resonance oscillations of inhomogeneous plasmas. G. DORMAN	387
On the asymptotic stability of monotonic electrostatic collisionless shock waves. D. BISKAMP	411
Dispersion of inhomogeneous plasma streams. P. B. BURT	417
The effect of weak collisions on ion-acoustic wave instabilities in a current-carrying plasma. R. S. B. ONG and M. Y. YU	425
On the structure of collisionless magneto-plasma shock waves at super-critical Alfvén-Mach numbers. L. C. WOODS	435

MHD Rankine–Hugoniot equations applied to earth's bow shock. J. D. MIHALOV, C. P. SONNETT and J. H. WOLFE	page 449
On the modification of the Bernstein modes by electron-electron collisions S. R. WATSON and R. D. HARDING	465
Possibility of three waves coupling. A. M. POINTU, Y. POMEAU and A. CONSTANTIN	473
Higher order resonances in a plasma. G. J. LEWAK and C. S. CHEN	481
Statistical mechanics of a weakly turbulent stable plasma. E. ASSEO, G. BERTHOMIEU, J. HEYVAERTS and A. MANGENEY	499

PART 4 DECEMBER 1969

A collisionless shock in a plasma which is almost stable. A. SMITH	525
Drift waves in a slightly non-neutral plasma. A. NOCENTINI	543
On the influence of a radial electric field on the stability of a magnetically confined plasma. A. NOCENTINI	559
Stability of non-linear plasma waves. G. ROWLANDS	567
Non-linear transverse waves in a Vlasov plasma. S. P. GARY	577
Small amplitude transverse wave propagation in a weakly Langmuir turbulent plasma. N. BEL and J. HEYVAERTS	593
Saturation and camping of collisionless plasma wave echoes. J. COSTE and J. PEYRAUD	603
Hot plasma theory of whistler mode wave packet propagation along a non-uniform magnetic field. M. J. HOUGHTON	611
On the Rayleigh–Taylor instability in hydromagnetics with finite electrical resistivity and Hall current. S. SINGH and J. N. TANDON	633
The two stream instability in the 'resonance' model. E. INFELD and A. SKORUPSKI	643
The interface of a uniform plasma enveloped by the magnetic field of a system of line currents. C. SOZOU	651
Relativistic effects on non-linear waves in a cold collisionless plasma. Y. INOUE	661
On the structure of collisionless waves. J. B. FEDELE	673
Norman modes of oscillation in a higher-order Chew–Goldberger–Low plasma. A. E. SISSON and C. P. YU	691
REVIEW <i>Theory of Plasma Turbulence, by A. A. Vedenov</i>	709
INDEX TO VOLUME 3	711
