1 *MRS Communications* is publishing high-quality, rigorously reviewed materials science communications within **14 days of acceptance**.

2 *MRS Communications* received its **first Impact Factor (IF)** from the 2012 Thomson Science Citation Index (SCI) Journal Citation Reports® in record time—based upon only the first published issue and just one year of citations. Watch for our building success in 2014!

3 *MRS Communications* offers an **Open Access** publication option with, for a limited time only, a reduced article processing charge.

4 *MRS Communications* is a digital journal. Readers enjoy a **variety of access options** including mobile format, dynamic page-turning edition, and iTunes and Android apps.

5 *MRS Communications* has published high-impact papers in its first three volumes. Look for each new issue at www.journals.cambridge.org/mrc. **Prospectives articles**, a unique feature of this journal, include:

Materials processing strategies for colloidal quantum dot solar cells: advances, present-day limitations, and pathways to improvement

Graham H. Carey, Kang W. Chou, Buyi Yan, Ahmad R. Kirmani, Aram Amassian, Edward H. Sargent

Hairy nanoparticle assemblies as one-component functional polymer nanocomposites: opportunities and challenges

Nikhil J. Fernandes, Hilmar Koerner, Emmanuel P. Giannelis, Richard A. Vaia

Recent developments in ductile bulk metallic glass composites

Michael Ferry, Kevin Laws, Christopher White, David Miskovic, Karl Shamlaye, Wangiang Xu, Olga Biletska

Catalytic polymeric nanoreactors: more than a solid supported catalyst

Pepa Cotanda, Nikos Petzetakis, Rachel K. O'Reilly

Spectroscopic imaging in PFM: new opportunities for studying polarization dynamics in ferroelectrics and multiferroics

Rama Krishnan Vasudevan, Stephen Jesse, Yunseok Kim, Amit Kumar, Sergei V. Kalinin

Biomaterials-based strategies for the engineering of mechanically active soft tissues

Zhixiang Tong and Xinqiao Jia

About the Materials Research Society

The Materials Research Society (MRS) is a not-for-profit scientific association founded in 1973 to promote interdisciplinary goal-oriented basic research on materials of technological importance. Membership in the Society includes almost 16,000 scientists from industrial, government, and university research laboratories in the United States and abroad.

The Society's interdisciplinary approach to the exchange of technical information is qualitatively different from that provided by single-discipline professional societies because it promotes technical exchange across the various fields of science affecting materials development. MRS sponsors three major international annual meetings encompassing many topical symposia, as well as numerous single-topic scientific meetings each year. It recognizes professional and technical excellence, conducts tutorials, and fosters technical exchange in various local geographical regions through Section activities and Student Chapters on university campuses.

MRS publishes symposia proceedings, the *MRS Bulletin*, and other volumes on current scientific developments. The *Journal of Materials Research*, the archival journal spanning fundamental developments in materials science, is published twenty-four times a year by Cambridge University Press for the MRS.

MRS Communications is a full-color letters and perspectives journal focused on groundbreaking work across the spectrum of materials research.

MRS is an Affiliated Society of the American Institute of Physics and participates in the international arena of materials research through associations with professional organizations such as the International Union of Materials Research Societies.

For further information on the Society's activities, contact MRS Headquarters, 506 Keystone Drive, Warrendale, PA 15086-7573; telephone (724) 779-3003; fax (724) 779-8313.
