## Studies in New Testament Ethics

WILLIAM LILLIE

In view of the current revival of Biblical Theology the author looks at what the New Testament as a whole teaches both on more theoretical questions like the doctrine of Natural Law, the authority of conscience or the contribution of knowledge to the good life and on more practical questions like the use of wealth, the place of work or the nature of marriage and divorce. In conclusion Dr Lillie, who is lecturer in Biblical Study at Aberdeen University, attempts an analysis of the two central ethical concepts of the New Testament—self-denial and love. **Price 18s. net**

## The Scrolls and Christian Origins

**The Rev. Professor M. BLACK DD FBA** Have the Scrolls any light to shed on the origins of Christianity? This is the main problem which is investigated in this book. It is divided into two parts, historical and theological. The first examines the question of the origins and identity of the Qumran sect: the sect of the scrolls is the same as the ancient Jewish sect of the Essenes, and crystallized out of the older movement of the Hasidaeans of Maccabaeian times. The second part discusses the religious institutions and theological conceptions of the scrolls, in particular those which seem to possess some relationship or resemblance to any Christian ideas or institutions.

## An Introduction to Christian Doctrine

**T. E. JESSOP** 'His book is quite first-rate and one is reminded of the work of the late Dr A. E. Taylor... Professor Jessop has noticed... the eager and even wistful interest in religious matters which, even since the war, has been evinced by many who are outside the Church.'

## New Testament Introduction

**A. WIKENHAUSER** 'The treatment... is clear, informed and sensible. Well-deserved praise has already been given to the chapter on form-criticism and should be given to the chapter on textual criticism. It will be useful to students... The long bibliographies giving details of Roman Catholic continental scholarship, will be specially useful to specialists... This work will impress non-Catholics as remarkably open-minded.'
