
THE ROYAL INSTITUTE OF NAVIGATION

Aims and Objects

The objects of the Institute are to unite in one body those who are concerned with or who are interested in navigation and to further its development. Navigation is conceived as applying to locomotion of all kinds and is perceived as encompassing aspects of: command and control, psychology and zoology, operational research, risk analysis, theoretical physics, operation in hostile environments, instrumentation, ergonomics, financial planning and law as well as electronics, astronomy, mathematics, cartography and other subjects traditionally associated with navigation.

The aims of the Institute are to encourage the creation and dissemination of knowledge through research and development, to co-ordinate information from all the disciplines involved, to provide a forum in which new ideas and new products can have the benefit of informed and professional scrutiny and to further education and communication.

The Institute initiates conferences and symposia on specific subjects and has a programme of meetings at which lectures are given and discussed. There are standing Special Interest Groups (SIGs) which keep under constant review pertinent aspects of navigation. The success of these Special Interest Groups is crucially dependent on the active involvement of members.

The SIGS include: Animal Navigation Group (ANG), Civil and Military Aviation Group (CMAG), General Aviation Navigation Group (GANG), History of Air Navigation Group (HANG), Land Vehicle Navigation Group (LVNG), Marine Traffic Navigation Group (MTNG), Navigation On Foot (NOF), Small Craft Group (SCG) and Satellite Special Interest Group (SATSIG).

The Institute publishes *The Journal of Navigation* four times a year. It contains papers which have been presented at meetings, other original papers and selected papers and reports from Special Interest Groups. The Institute also publishes *Navigation News* six times a year which contains a full account of the Institute's proceedings and activities. This includes Branch News, a record of current navigational work, a diary of events, topical articles, news about Membership and advertising. A great deal of the Institute's work is international in character and is co-ordinated with that of similar organizations in other countries.

Membership

There are seven classes of Membership of the Institute:

(1) HONORARY FELLOWS: Distinguished persons upon whom the Council may see fit to confer an honorary distinction.

(2) FELLOWS: Members, of at least three years' standing, holding certain qualifications laid down in the by-laws; these qualifications include having made a contribution of value to navigation.

(3) ASSOCIATE FELLOWS: Individuals who satisfy the Council of their high level of professional achievement or experience in the advancement of navigation operations, concepts or equipment.

(4) MEMBERS: Persons over twenty-one years of age who satisfy the Council of their interest in navigation.

(5) STUDENT MEMBERS: Persons under twenty-five years of age studying at a recognized school or university with a view to making navigation, or an allied interest, their career.

(6) CORPORATE MEMBERS: Organizations such as universities, navigation schools, government departments or companies, here and abroad, who are directly or indirectly interested in the science of navigation. Corporate Members are entitled to send representatives to all Institute meetings and to receive six copies of its publications. They are encouraged to take an active part in the Institute's work. Applications should be sent by letter addressed to the Director.

(7) RETIRED MEMBERS: Fellows or Members of 65 years of age or over who have paid no fewer than 6 annual subscriptions.

There is also Associateship of the Institute, which gives entitlement of Membership to one Special Interest Group SIG, but not to receipt of the *Journal of Navigation*.

Subscriptions

Annual subscriptions to the Institute are payable in advance as follows (prices are inclusive of vat):

Fellows	£123
Members and Associate Fellows	£113
Student Members	£15

THE JOURNAL OF NAVIGATION

VOLUME 62 NUMBER 3 JULY 2009

CONTENTS

- Improved Filter Strategies for Precise Geolocation of Unexploded Ordnance using IMU/GPS Integration** 365
Jong Ki Lee and Christopher Jekeli
- A Hidden Markov Model-Based Map-Matching Algorithm for Wheelchair Navigation** 383
Ming Ren and Hassan A. Karimi
- Verification of a Real-Time Attitude Determination Algorithm through Development of 48-Channel GPS Attitude Receiver Hardware** 397
Jaegyung Jang and Changdon Kee
- Alcock and Brown** 411
Terry Hayward
- The Controversial Skill of Columbus as a Navigator: An Enduring Historical Enigma** 417
Douglas T. Peck
- Shore-Based Pilotage: Pilot or Autopilot? Piloting as a Control Problem** 427
Karl Bruno and Margareta Lützhöft
- When is a VTS not a VTS?** 439
Captain Terry Hughes
- Behaviour Patterns in Crossing Situations** 443
John Kemp
- Review of Collision Avoidance and Path Planning Methods for Ships in Close Range Encounters** 455
CheeKuang Tam, Richard Bucknall and Alistair Greig
- Application of Computational Fluid Dynamics Simulations to the Analysis of Bank Effects in Restricted Waters** 477
D. C. Lo, Dong-Taur Su and Jan-Ming Chen
- New Algorithm for Great Elliptic Sailing (GES)** 493
Athanasios Pallikaris and George Latsas
- Quality Control in SBAS: Protection Levels and Reliability Levels** 509
João Oliveira and Christian Tiberius
- Modified High-Resolution Correlator Technique for Short-Delayed Multipath Mitigation** 523
Hyoungmin So, Ghangho Kim, Taikjin Lee, Sanghoon Jeon and Changdon Kee
- Klobuchar-Like Local Model of Quiet Space Weather GPS Ionospheric Delay for Northern Adriatic** 543
Renato Filjar, Tomislav Kos and Serdjo Kos
