

# PROCEEDINGS

OF THE

## EDINBURGH MATHEMATICAL SOCIETY

### CONTENTS

D. G. WEIR: The Propagation of a Constant Strength Shock through a Simple Wave	<i>page 277</i>
E. DEUTSCH: Evaluation of Certain Integrals Involving Bessel Functions	<i>page 285</i>
C. G. CHEHATA: Existence Theorem for Groups	<i>page 291</i>
JOHN S. PYM: A Note on the Kawada-into Theorem	<i>page 295</i>
P. SMITH: An Example of a Plane Shock of Variable Strength	<i>page 297</i>
J. C. COOKE: Some Further Triple Integral Equation Solutions	<i>page 303</i>
W. E. WILLIAMS: Integral Equation Formulation of some Three Part Boundary Value Problems	<i>page 317</i>
F. M. RAGAB: The Laplace Transform of the Modified Bessel Function $K(t^{\pm m}x)$ where $m = 1, 2, 3, \dots, n$	<i>page 325</i>
R. A. RANKIN: The Difference between Consecutive Prime Numbers V	<i>page 331</i>
F. HARARY AND A. HILL: On the Number of Crossings in a Complete Graph	<i>page 333</i>
BOOK REVIEWS	<i>page 339</i>
MATHEMATICAL NOTES	
E. SPENCE: Formulæ for Sums Involving a Reduced Set of Residues Modulo $n$	<i>page 347</i>
K. N. SRIVASTAVA: Dual Integral Equations with Bessel Function and Trigonometrical Kernels	<i>page 351</i>

LONDON: 59A WELBECK STREET, W.1

## THE EDINBURGH MATHEMATICAL SOCIETY

The Edinburgh Mathematical Society was instituted in 1883 for the promotion and extension of Mathematical Science—Pure and Applied.

Candidates for membership are nominated at one Ordinary Meeting of the Society and the candidature is voted upon at the next, a majority of at least two-thirds of the members present being necessary for election. Ordinary Members pay subscriptions to the funds of the Society at the times and of the amounts specified in the Rules. Members whose subscriptions are not in arrears receive free of charge one copy of each of the Society's publications. Additional copies and back numbers—as far as these are in print—are charged at a discount on the published price. Further information regarding membership may be obtained from the Secretary.

### PROCEEDINGS OF THE EDINBURGH MATHEMATICAL SOCIETY AND THE EDINBURGH MATHEMATICAL NOTES

The Society publishes the Proceedings of the Edinburgh Mathematical Society which contains papers embodying the results of research that is original in matter or manner and a section entitled *Notes* containing material of a less specialised nature. Members of the Society may submit papers for consideration with regard to publication; papers from non-members can be communicated by a member. Manuscripts of papers received cannot be accepted if not in a form suitable for submitting to the printer. Authors are advised to retain a copy of anything they may send for publication as the Society cannot accept responsibility for any loss. Manuscripts of papers for publication should be sent in the first instance to the Secretary.

Series I of the Proceedings consists of forty-four volumes published from 1886 to 1926. Series II consists of twelve complete volumes to date.

The Proceedings are published in parts and issued twice yearly. Four parts complete a volume of approximately 200 pages, and the Title Pages and Index are published in part 4 of each volume.

The prepaid subscription per volume is 60s. (U.S.A. and Canada \$10.00) post free. Single parts 15s. (U.S.A. and Canada \$2.50) net. Orders, and requests for prices and availability lists of in-print back numbers, should be addressed to the publishers,

Oliver and Boyd  
Tweeddale Court  
14 High Street  
Edinburgh 1

The Secretary will be pleased to receive gifts of back numbers of the Proceedings as certain of these are scarce and there is a demand from libraries for them.

All communications concerning the Library should be addressed to  
The Librarian  
The Edinburgh Mathematical Society  
20 Chambers Street  
Edinburgh 1

All other communications should be addressed to  
The Secretary  
The Edinburgh Mathematical Society  
20 Chambers Street  
Edinburgh 1

# CONTENTS

	PAGE
AITKEN, A. C. Note on a difference-product inequality	173
BOOK REVIEWS	115, 191, 255, 339
BOWDEN, N. A. On the zeros of a class of canonical products of integral order	247
BURLAK, J. A pair of dual integral equations occurring in diffraction theory	179
CHEHATA, C. G. Embedding theorems for groups	153
CHEHATA, C. G. Existence theorem for groups	291
COHEN, ECKFORD. An analogue of a result of Jacobsthal	139
COLLINS, W. D. On the solution of some axisymmetric boundary value problems by means of integral equations. VII. The electrostatic potential due to a spherical cap situated inside a circular cylinder	13
COLLINS, W. D. On the solution of some axisymmetric boundary value problems by means of integral equations. VIII. Potential problems for a circular annulus	235
COLLINS, W. D. Some axially symmetric stress distributions in elastic solids containing penny-shaped cracks. III. A crack in a circular beam	69
COOKE, J. C. Some further triple integral equation solutions	303
COXETER, H. S. M. The abstract group $G^{3, 7, 16}$	47
COXETER, H. S. M. The abstract group $G^{3, 7, 16}$ : a correction	189
DAVIES, I. J. Enumeration of certain subgroups of Abelian $p$ -groups	1
DEUTSCH, E. Evaluation of certain integrals involving Bessel functions	285
DIANANDA, P. H. A cyclic inequality and an extension of it. I.	79
DIANANDA, P. H. A cyclic inequality and an extension of it. II.	143
EASON, G. Thermal stress in anisotropic cylinders	159
ETHERINGTON, I. M. H. Note on quasigroups and trees	219
GEORGE, D. L. Numerical values of some integrals involving Bessel functions	87

HARARY, F. AND HILL, A. On the number of crossings in a complete graph	333
HILL, A. <i>See</i> Harary, F. and Hill, A.	
INGRAM, W. H. The $j$ -differential and its integral	85
JACK, HENRY. An application of the addition theorem for determinants	165
JACK, HENRY. An integral over the interior of a simplex	167
LESLIE, F. M. The motion of a flat plate from rest in a visco-elastic liquid	223
LOWENGRUB, M. AND SNEDDON, I. N. An axisymmetric boundary value problem of mixed type for a half-space	39
LOWNDES, J. S. Parseval relations for Kontorovich-Lebedev transforms	5
MACDONALD, I. D. On central series	175
MARTIN, M. H. Some aspects of uniqueness for solutions to boundary problems	25
MERCER, A. MCD. On integral transform pairs arising from second order differential equations	63
MAXFIELD, JOHN E. AND MINC, HENRYK. On the matrix equation $X'X = A$	125
MINC, HENRYK <i>See</i> Maxfield, John E. and Minc, Henryk	
OBITUARY NOTICE: H. W. Turnbull	273
PYM, JOHNS. A note on the Kawada-into theorem	295
RAGAB, F. M. The Laplace transform of the modified Bessel function $K(t^{\pm m}x)$ where $m = 1, 2, 3, \dots, n$	325
RANKIN, R. A. The difference between consecutive prime numbers V	331
SMITH, P. An example of a plane shock of variable strength	297
SNEDDON, I. N. <i>See</i> Lowengrub, M. and Sneddon, I. N.	
WATSON, G. N. A proof of Kirkman's hypothesis	131
WEIR, D. G. The propagation of a constant strength shock through a simple wave	277
WILLIAMSON, J. H. The Wiener-Pitt phenomenon on the half-line	37
WILLIAMS, W. E. Integral equation formulation of some three part boundary value problems	317
WOUK, ARTHUR: An algebraic problem in control theory	205

*The Edinburgh Mathematical Notes* appear at the end of each part
