Experimental Agriculture publishes the results of research on crops, herbage and forage, with the main emphasis on field experiments carried out in the warmer climates of the world. It also includes accounts of new experimental techniques, discussions of specific problems met in countries where agricultural production is developing rapidly, review articles on new developments in scientific agriculture, and occasional papers on technical, economic and sociological aspects of farming systems. The journal is the successor to *The Empire Journal of Experimental Agriculture*.

Experimental Agriculture is published quarterly. Four parts form a volume.

Subscriptions may be sent to any bookseller or subscription agent or direct to Cambridge University Press, P.O. Box 92, London, N.W.1. Subscriptions in the U.S.A. and Canada should be sent to the American branch of the Press, 32 East 57th Street, New York, N.Y. 10022. The subscription price is £7.00 net (including postage) for an annual volume (\$23.00 in the U.S.A.), payable in advance; separate parts cost £2.00 net or \$6.50 each (plus postage).

Second class postage paid at New York, N.Y.

Back Volumes. Inquiries for Vols. 1-32 of *The Empire Journal of Experimental Agriculture* should be addressed to Wm Dawson & Sons Ltd, Cannon House, Folkestone, Kent. Previously published parts of *Experimental Agriculture* are available from the London or New York offices of Cambridge University Press.

NOTES FOR CONTRIBUTORS

Contributions will be welcomed from scientists of all nationalities, particularly those working in tropical and sub-tropical countries where up-to-date techniques of agricultural experimentation are helping in the rapid development of more modern methods of farm production. Contributions, which must be written in English, should be sent to the Editor, Professor J. P. Hudson, The Spinney, Wrington, Bristol.

Conditions of acceptance. Submission of a paper will be taken to imply that the material has not previously been published, and is not being considered for publication elsewhere. Papers published in *Experimental Agriculture* may not be reprinted or published in translation without permission from the Editor, given on behalf of the Editorial Board.

General lay-out. Before having their manuscripts typed contributors are asked to look carefully at the lay-out of other papers published in this journal, to ensure that their own papers, as submitted, conform as closely as possible to

the accepted pattern. This very much facilitates the work of the Editor and may often result in a paper being published earlier than if it requires a great deal of detailed editorial attention. Numerical data, which should only be included if they are essential to the argument, can be presented either in the form of tables or diagrams, but should never be shown in both ways. It is not the normal custom of the Journal to publish notes shorter than about 2000 words (4 pages) or longer than about 6000 words (12 pages including illustrations).

Typescripts. A top copy and one carbon copy of the script should be submitted, typed with double spacing, on one side of the paper only and with margins of about 1½ inches at the left-hand side and head of each sheet. Quarto size is preferred to foolscap.

Title. The development of automatic bibliographic methods, based on single-word indexing of the significant words in the title, makes it essential that the title of each paper should contain the maximum of relevant informa-

Tropical Agriculture

The journal of The Imperial College of Tropical Agriculture and
Faculty of Agriculture, University College of the West Indies

General editor: H. K. Ashby, M.A., Dip. Agric., A.I.C.T.A.
7, Linton Road, Oxford

Tropical Agriculture is the only journal published in English which deals with the agriculture of the tropics as a whole, and provides a valuable form of communication between scientists working on the major problems in different parts of the world.

The journal is published quarterly in January, April, July and October and serves over 90 countries. It covers such topics as:

Annual and perennial crops · Grassland · Livestock · Soil science · Mycology · Entomology · Ecology · The botany of economic crops · Problems of agricultural development including economic aspects · Book reviews.

Tropical Agriculture is essential reading for any scientist or farmer who wishes to keep abreast of the current advances in all areas of crop and animal production.

Annual Subscription £8 (\$20.00) post free
Single issues £2 post free

JOURNAL OF THE BRITISH GRASSLAND SOCIETY

This Journal is a medium for the publication of the results of research and practical experience in the realm of grassland husbandry and forage production.

EDITOR: A. G. G. HILL

Contents of Volume 25, No. 3, September 1970

THE HISTORY AND DEVELOPMENT OF THE BRITISH GRASSLAND SOCIETY. *Prof. Martin Jones*

THE USE OF CUTTING TREATMENTS DESIGNED TO SIMULATE DEFOLIATION BY SHEEP. *R. M. Morris*

RESEARCH NOTE: THE EFFECT OF CUTTING ON THE SUBSEQUENT GROWTH OF INTRODUCED RIBGRASS (*PLANTAGO LANCEOLATA*) SEEDLINGS. *D. H. Scarisbrick and J. L. Harvey*

SOME EFFECTS OF MECHANICAL TREATMENTS AND SURFACE SOWING ON ROUGH HILL GRAZINGS. *I. B. Warboys*

GRAZING BEHAVIOUR AND WEIGHT CHANGES IN CALVES TURNED OUT TO PASTURE. *J. M. Wilkinson and P. H. Cumberland*

REGROWTH OF S24 RYEGRASS AND ITS RELATION TO YIELD MEASUREMENT OF GRAZED SWARDS. *D. B. Wilson and M. J. Robson*

WHOLE-CROP WINTER BEANS (*VICIA FABIA* L.) FOR CONSERVATION. *Gillian Toynbee-Clarke*

A NOTE ON THE RELATIONSHIP BETWEEN LEAF RIGIDITY AND LEAF ANATOMY OF *LOLIUM PERENNE* L. *F. I. Sant and I. Rhodes*

CARBON, NITROGEN, PHOSPHORUS AND SULPHUR IN HERBAGE PLANT ROOTS. *D. C. Whitehead*

THE EFFECT OF NITROGENOUS FERTILIZER ON THE RATE OF GROWTH OF ITALIAN RYEGRASS. 3. GROWTH UP TO 10 WEEKS: NITROGEN CONTENT AND YIELD. *D. Wilman*

Published quarterly. Annual subscription £4, post free. Back numbers are still available, at the following prices; Volume 1, £1; volumes 2-17, £2 each; volumes 18-22, £3; subsequent volumes £4.

Orders to: The Secretary, British Grassland Society, Grassland Research Institute, Hurley, Berkshire, England.

ANIMAL PRODUCTION

Journal of the British Society of Animal Production

Contents of Volume 12, Part 4, November 1970 includes the following:

- ARTHUR, J. A. and ABPLANALP, H. Computer simulation of reciprocal recurrent selection with overdominant gene action.
- HINKS, C. J. M. Performance test procedures for meat production amongst dairy bulls used in AI.
- HINKS, C. J. M. The selection of dairy bulls for artificial insemination.
- HALE, R. W. An experiment on the selection of bacon pigs by high and low carcass densities.
- WOOD, P. D. P. Factors affecting accuracy in the evaluation of progeny tests of growth rate in cattle.
- KRUSE, V. Yield of colostrum and immunoglobulin in cattle at the first milking after parturition.
- KRUSE, V. Absorption of immunoglobulin from colostrum in newborn calves.
- JACKSON, N. and FORBES, T. J. The voluntary intake by cattle of four silages differing in dry matter content.
- ROBINSON, J. J. and FORBES, T. J. Studies on protein utilization by ewes during lactation.
- RUTTER, W. A comparison of the performance of suckled lambs with lambs weaned at seven weeks of age and either grazed or given concentrates.
- CRIGHTON, D. B. The induction of pregnancy during lactation in the sow: the effects of a treatment imposed at 21 days of lactation.
- LAND, R. B. The mating behaviour and semen characteristics of Finnish Landrace and Scottish Blackface rams.
- TRAIL, J. C. M., SACKER, G. D. and FISHER, I. L. Crossbreeding beef cattle in Western Uganda. 1. Performance of Ankole, Boran and Zebu cows.
- SACKER, G. D., TRAIL, J. C. M. and FISHER, I. L. Crossbreeding beef cattle in Western Uganda. 2. Environmental influences on body weight.
- TRAIL, J. C. M., SACKER, G. D. and FISHER, I. L. Crossbreeding beef cattle in Western Uganda. 3. Genetic analysis of body weight.
- KRUSE, V. A note on the estimation by simulation technique of the optimal colostrum dose and feeding time at first feeding after the calf's birth.
- GEDDE-DAHL, T. W. and STANDAL, N. A note on a tremor condition in adolescent pigs.
- FOOT, JANET Z. and GREENHALGH, J. F. D. A note on the relation between weights of alimentary tract contents, body fat and the uterus in Blackface ewes.
- BARKER, J. D. and LAND, R. B. A note on the fertility of hill ewes mated to Finnish Landrace and Border Leicester rams.
- GHORBAN, K., MOZAFAR, A. A., SEFIDBAKHT, N. and SIMHAE, E. A note on feedlot performance of Grey Shirazi sheep.

OLIVER & BOYD

33 Montgomery Street, Edinburgh EH7 55X, Scotland

RHODESIAN JOURNAL OF AGRICULTURAL RESEARCH

VOL. 8 No. 1

CONTENTS

1970

Animal Husbandry

- Effect of breed and nutritional plane on the chronology of teeth eruption in cattle
- Complete diets for dairy cows:
- Part 1. Reproductive performance, food intake and milk yield of cows on diets of different roughage content
- Part 2. Effect of roughage on milk composition and some by-products of rumen fermentation
- Part 3. Effects of dietary composition on utilization of metabolizable energy
- Growth of Friesland calves weaned on milk at different ages.

Crops

- Evapotranspiration and growth of cotton under moisture stress

Pastures

- Effects of grazing practices on regrowth of cleared indigenous woodland

Wildlife

- Agricultural utilization of semi-domesticated eland:
- Part 1. Introduction
- Part 2. Feeding habits and food preferences

Research Notes

- Net assimilation rates of maize varieties

Book Reviews

- Population Genetics in Animal Breeding
- Dictionary of Livestock Breeds
- Economics of Irrigation
- Generalized Soil Map of Angola

Published twice yearly. Annual Subscription R\$3.00. Individual numbers R\$1.50.
Back numbers available.

Specimen copies are available free of charge to libraries from
