Tables

1.1	CO_2 emissions (measured in metric tonnes per capita in 2020)	*page* 10
2.1	Energy resources and market forms	32
2.2	Behavioural anomalies	35
3.1	Energy resources and market forms	60
3.2	STATA regression output of OLS estimation	62
3.3	Values of residential energy price elasticities	64
3.4	Price elasticity in the industrial sector	69
3.5	Elasticity of substitution in the industrial sector between energy and capital	69
4.1	NPV and the power of discounting	80
4.2	Investment analysis	80
4.3	Calculating expected NPVs and standard deviations of projects A and B	84
4.4	LCoE comparison across different power plants	87
5.1	Cross-country energy consumption comparisons	107
5.2	Lifetime costs of cars	113
5.3	Lifetime costs of refrigerators	114
5.4	Factors contributing to energy efficiency gap	116
6.1	Estimated coefficients	132
6.2	Calculation of rate of return	140
7.1	Classical market failures and possible policy instruments	168
7.2	Market failures in the form of behavioural anomalies	168
7.3	Types of nudges	197
9.1	Introduction of a subsidy for energy-efficient renovation of buildings in some regions	237
