

CROSSROADS

*Congress, the President,
and Central America, 1976-1993*

Cynthia Arnson, Americas Watch
Second Edition

This is an expanded and updated edition of a book originally published by Pantheon in 1989 about the struggles over the formulation and implementation of U.S. foreign policy toward Central America during the critical period of the last twelve years. Cynthia Arnson incorporates substantial amounts of new primary source and recently declassified material coming out of the Iran-Contra trials and other Freedom of Information Act requests in this new edition of *Crossroads*. She also includes an entirely new chapter that carries the story of the Nicaragua and El Salvador policy debates to the end of the Bush Administration.

Praise for the first edition:

"A highly informative year-by-year account of the making of United States policy toward El Salvador and Nicaragua in the Reagan era. Ms. Arnson, a former Congressional aide who [taught] international relations at American University, provides a careful and noninflammatory reading of the issues that both divided and united the two branches of government—no mean feat considering how highly charged a subject this remains." —*The New York Times Book Review*

"This especially insightful and well-documented account draws on declassified U.S. government documents as well as the author's interviews with policymakers in both branches of government." —*Latin American Research Review*

Reconsidering the Democratic Public

EDITED BY

GEORGE E. MARCUS AND RUSSELL L. HANSON

“Political science has the bad habit of trying to keep normative theory and empirical research in separate compartments. This book shows that interesting and important things can happen when you bring democratic theory and the study of democratic politics together. Experiments like this could help revitalize the discipline. And the heartening substantive news is that democracy may be a more viable form of government, that the people may be more likely to govern themselves wisely and well, than political science has sometimes suggested.”

—Charles W. Anderson, University of Wisconsin

“The editors of this anthology bring together both the empirical researcher and the political philosopher in an effort to reassess the future of democracy. The result is a series of stimulating essays that focus more or less on a singular theme: given that society has become so hyper-fragmented and that political life reflects this radical pluralism, how realistic are the classical democratic ideas of citizenship and self-governance? The editors’ introductory essay is a masterful overview of the issues as well as a dazzling synthesis of the divergent arguments and positions taken by the contributors. Highly recommended for specialists and upper-division and graduate students.”

COPS ACROSS BORDERS

*The Internationalization of
U.S. Criminal Law Enforcement*
Ethan A. Nadelmann

"Ethan Nadelmann, who has become widely known as an advocate of drug legalization, proves in this book that he is an important scholar of international law enforcement. By casting his study of law enforcement across the borders, he has broken new criminological ground. Nadelmann's study of the development of the tangled, tight, and problematic relationship between U.S. foreign policy and U.S. law enforcement will enlighten, and even fascinate, students in both areas."

—Jerome H. Skolnick, University of California, Berkeley

"Nadelmann's outstanding book illuminates with impressive detail a dimension of security policy about which we know far too little, the international activities of national police forces. This book opens up a new area of research for students of international relations."

—Peter Katzenstein, Cornell University

"Ethan Nadelmann has produced a remarkable piece of scholarship. Blending the study of international relations and criminal justice within a long-term historical framework, *Cops Across Borders* casts important new light on U. S. foreign policy, the war on drugs, and likely claims to U. S. hegemony in the emerging post-Cold War international arena."

—Peter H. Smith, University of California, San Diego
