THE SORBY CENTENNIAL SYMPOSIUM ON **THE HISTORY OF METALLURGY**

Edited by

C. S. SMITH
*Metallurgical Society Conferences
vol. 27*

This symposium was held to celebrate the
100th anniversary of the discovery of the
microstructure of steel by the great
scientist, Henry Clifton Sorby.

584 pp. illustrated. £7 16s.

The British Society for the History of Science

Student Membership

A new class of membership has been instituted by the Society, under the title Student membership.

"Students" of the Society must normally be below the age of 25 years and be undergoing a full- or part-time course of education at a school, college or university.

The Annual Subscription for "Students" is £1 10s. 0d. (\$4.50 U.S.).

Student membership entitles the holder to receive Parts of the Society's journal, as these are published, without additional charge, and to receive all the other privileges of Ordinary Membership, except a vote in matters affecting the running of the Society.

Further information about the Society will be found on the inside back cover of this journal.

British Men of Science

general editor Sir GAVIN de BEER

EDMOND HALLEY

ANGUS ARMITAGE

Dr. Armitage combines an historical evaluation, more elaborate than any previously undertaken, of Halley's scientific researches, particularly as they are presented in the *Philosophical Transactions*, with a complete account of his life and varied careers.

20 pages of half-tones, 28 line drawings 42s.

CHARLES SCOTT SHERRINGTON

RAGNAR GRANIT

Professor Granit first describes the kind of physiology of the nervous system Sherrington found in his youth, then assesses Sherrington's own achievements and their relevance to modern neurophysiology. A view of the man as well as the scientist.

16 pages of half-tones 42s.

ALMROTH WRIGHT

Sir ZACHARY COPE

The life and work of an innovator of genius. Wright introduced anti-typhoid inoculation and vaccine therapy; he was also a pioneer in the creation of institutes for medical research.

12 pages of half-tones, 11 figures June 42s.

NELSON

CAMBRIDGE

The History of Cell Respiration and Cytochrome

DAVID KEILIN. Edited by JOAN KEILIN

A personal and historical account of the development of the concept of intracellular respiration, from Galen to the present day, and the study of cytochromes. Professor Keilin discusses in particular MacNunn's discovery of histohaematin, the work leading up to the discovery of cytochrome and subsequent studies of it. 90s. net.

The Mathematical Practitioners of Hanoverian England, 1714 - 1840

E. G. R. TAYLOR

This book contains both a general study of the work of the Hanoverian mathematical practitioners, set against their social and historical background, and a catalogue giving both biographical and bibliographical details of over 2,200 practitioners who flourished in this period. It is a sequel to Professor Taylor's *Mathematical Practitioners of Tudor and Stuart England*, which is shortly to be re-issued. 84s. net.

SCIENCE, HISTORY & TECHNOLOGY

Book 1: 800-1840's

MAURICE GOLDSMITH

Member of Central Executive of the W.E.A., Director of the Science Information Service, Chairman of Advisory Committee of Guinness Awards for Science Teachers, Tutorial Lecturer on Science at London University.

H. J. FYRTH

Science Tutor in History and Economics in the Extra Mural Department of London University, he has a special interest in Trade Union Education.

These two authors have used their very considerable knowledge and understanding of science and history to explain how man's changing patterns of behaviour have affected, and been affected by, the increasingly rapid advancement of science and technology. In the words of a recent reviewer, "It is scholarly, but exciting and readable . . . it gives not only a knowledge of history and technology but a feeling for them too".

272 pages, many photographs, line drawings. 25/-.

THE CONCEPT OF ENERGY

ITS SIGNIFICANCE IN
FUNDAMENTAL THEORY AND PRACTICE

D W THEOBALD

This book, says Dr Theobald, is emphatically not a textbook on energy. It is rather an attempt to help us understand the concept of energy in the natural sciences. The uses of the term, its development with the increase in technological knowledge, its various roles today, are all discussed, and the possible physical reality of energy is considered.

All those for whom the concept of energy is a working tool will welcome this admirably lucid investigation. 42s

THE BRITISH SOCIETY FOR THE HISTORY OF SCIENCE

THE objects of the Society are to further the study of the history of science, by holding meetings for the reading and discussion of papers, and by facilitating the publication of relevant material.

The British Journal for the History of Science is the official organ of the Society.

Meetings are held in the Science Museum, Exhibition Road, South Kensington, London, S.W.7, usually in October, November, March and May. In addition a Winter Meeting is held in January and a Summer Meeting in June; neither of these meetings is necessarily held in London.

Membership is open to all persons approved by the Council of the Society, and elected at an Ordinary Meeting. The annual subscription is at present £2 10s. (for Students £1 10s.) and includes a free issue of the Society's Journal, which appears in June and December each year.

Those who wish to join the Society should write to the *Hon. Secretary*, Mr. J. A. Chaldecott, Science Museum, South Kensington, London, S.W.7.

Papers for inclusion in the Journal should be submitted to the *Hon. Editor*, Dr. M. P. Crosland, Department of Philosophy, The University, Leeds 2, from whom instructions may be obtained concerning the presentation and documentation of papers. All communications on editorial matters, and books for review, should be addressed to the Hon. Editor.

Particulars regarding advertising in the Journal may be obtained from the *Hon. Treasurer*, Mr. D. Chilton, Science Museum, South Kensington, London, S.W.7.

The British Journal for the History of Science is published by the Society. Four parts constitute one Volume; each part contains approximately 96 pages. The cover of each issue has a consecutive number for ease of collation in subsequent binding, e.g. No. 16 will be numbered: Vol. iv Part iv No. 16, and No. 17 will be: Vol. v Part i No. 17.

Order Forms, with lists of contents of Parts already published, are obtainable from the *Hon. Publications Secretary*, Dr. J. D. North, 39 Wellington Square, Oxford, to whom Orders for the Journal should be sent.

Whole Cloth Binding Cases lettered in Gold on spine and particulars of binding costs may be obtained from HEADLEY BROTHERS LTD., INVICTA PRESS, ASHFORD, KENT.
