CONFIDENCE

Bristol
TYPE 173

The Bristol Type 173 Twin Rotor Helicopter relies on Laycob as the main driving elements between engines and rotors

Rubber grunion blocks are used giving a cushioned drive there are no metal to metal contacts no lubrication therefore little maintenance

A Post card will see full technical data on its way to you

Laycob
Flexible Couplings

WESTLAND HELICOPTER SCHOOL

Britain's first and only Helicopter Pilot School has been operated by Westland Aircraft for some years past

Five Westland Helicopters are available
All-the-year-round courses enable pupils to qualify for a type rating on a British Commercial Pilot's Licence or Private Pilot's Licence, or if no British Licence is held, for a Certificate of Competence to fly Helicopters of the type specified

*The School is open
to all nationalities and
full particulars are
available from - -*

OBJECTS OF THE ASSOCIATION

The objects of the Association are to collect compile and disseminate information of a technical and semi technical nature pertaining to Helicopters and all other types of Rotating Wing Aircraft. The Association aims to work in close co operation with existing Aeronautical Bodies on matters affecting its objects and it may act as an Advisory Body in the promotion of legislation calculated to be of benefit to the development of Rotating Wing Aircraft

SYCAMORE

Sycamores are in quantity production for the British Services, and are already in operation with the Royal Air Force, the Army, the Royal Australian Air Force, the Royal Australian Navy, the Belgian Air Force and British European Airways.
