Subglottic stenosis in adults and children
Bone anchored hearing aids
Medialisation thyroplasty
Deep neck abscess drainage
Temporal bone fractures

Electrode-induced cochlear damage
Vestibular rehabilitation in the elderly
Auditory processing in the elderly
Facial nerve injuries
Cholesteatoma pathophysiology

Founded in 1887
By Morell Mackenzie and Norris Wolfenden

Medicine

Books and Journals from
Cambridge University Press

The Cambridge Medicine programme focuses its book publishing in a defined set of core clinical areas with our great strength in the clinical brain sciences. Other specialties of significant focus include reproductive medicine/obstetrics and gynaecology, anaesthesia and critical care, emergency medicine and pathology.

Our journals programme covers a broad spectrum of medical disciplines including emergency and disaster medicine, epidemiology and infectious diseases, biomedical science, genetics, nutrition, mental health and psychiatry, and neuroscience.

We partner with many learned societies including The Society for Healthcare Epidemiology of America, and the Neuroscience Education Institute, and the Royal College of Obstetricians and Gynaecologists.
