Successor to thyroid extracts . . .

The Glaxo synthesis of laevo thyroxine — issued as L-Thyroxine-sodium *Glaxo* — has brought an end to the inconsistencies of thyroid therapy.

At last it has become possible to give the pure active principle in accurate doses by weight . . . at last individual response can be assessed and used as the basis for subsequent dosage.

And the preparation is far from expensive, comparing favourably in price with glandular extract.

L-THYROXINE-SODIUM Glaxo
pure synthetic thyroid hormone 

Tablets (0.05 mg.): 100, 2/9d ; 1,000, 20/- (0.1 mg.): 100, 4/3d ; 1,000, 32/-

The first British 8 Channel Electro Encephalograph

The Ediswan Mark II 8-channel Electro-Encephalograph is intended to cater both for the clinical requirements of most Hospitals, and for research purposes where a higher standard of performance is essential.

The provision of 8 channels considerably reduces the recording time per patient for routine clinical examination and permits simultaneous observation of occasional phenomena over a larger area than is possible with fewer channels, this being of particular value in the location of focal activity.

Direct ink writing is used on 8" wide paper, thus providing permanent records with lowest possible recording cost.

The Ediswan Mark II Electro-Encephalograph provides:

- 8 channels.
- *New Precision Moving Coil Recorder (substantially flat response up to 100 c/s).*
- *Built-in Input Selector Unit.*
- *High Stability—no Stabilising Transformer needed.*
- *Semi-tropical Rating.*
- *Twin Time Markers.*
- *High Reliability with Simple Maintenance.*
- *Low Cost per Channel.*

The Alpha and Omega of ELECTRO- ENCEPHALOGRAPHS

The Marconi 6-channel E.E.G. is the product of unremitting electrical development and exhaustive pre-production trials. In many parts of the world it has gained the confidence of operator and neurologist, many distinctive features contributing to an exemplary performance.

● **Balanced, high-gain amplifiers feeding into a six-channel recorder** ● **Frequency response extending from a fraction of a cycle up to 95 cycles for direct recording**
 ● **Additional amplification up to 5000 c/s** ● **Adjustable floor-stand with fifteen non-polarisable silver/silver chloride head-electrodes** ● **3-speed recordings with marker and timing pens.**

BARNWOOD HOUSE GLOUCESTER

CRICKLEY COURT—ONE OF THE SEPARATE VILLAS

A REGISTERED HOSPITAL, (outside the National Health Service) for the CARE and TREATMENT of LADIES and GENTLEMEN suffering from NERVOUS and MENTAL DISORDERS. Within two miles of the Western and London Midland Regional Railway Stations at Gloucester, the Hospital is easily accessible by rail from London and all parts of the United Kingdom. It is beautifully situated at the foot of the Cotswold Hills, and stands in its own grounds of over 300 acres. Voluntary Patients of both sexes are also received for treatment. Special accommodation is also provided at three villa residences, all of which stand in their own grounds and are entirely separate from the main Hospital. All the most modern methods of treatment including electric shock and prefrontal leucotomy are used.

SONERYL

*short sedation to
prolonged
narcosis*

One of the advantages of 'Soneryl' is the ease with which, by graduating the dose, the degree of action may be varied from the mildly sedative to the deeply hypnotic.

This is of particular interest in psychiatric practice for it enables the one drug to be used as a hypnotic in all the mental states from simple anxiety to intractable psychosis. It may be given for long periods with minimal side effects.

Generally 'Soneryl' is given orally in tablets (grains $1\frac{1}{2}$ in each), but for cases in which it is impracticable to give the drug by mouth, suppositories containing three, five or ten grains of 'Soneryl' are available.

Tablets in containers of
25, 100, and 500

Suppositories of gr. 3, gr. 5,
and gr. 10, in boxes of 5
